essays and discussion with Fulbright scholar Mr Tasawar Baig and Professor David Earnest at Old Dominion University Some ideas and thoughts were also inspired by Professor Robert Putnam at the Harvard University John F Kennedy School of Government and Professor Zbigniew Kazimierz Brzezinski former US National Security Advisor when they did lectures and special discussion with me at Old Dominion University in 2009 and 2012 respectively In The Third Wave 1991 Samuel Huntington explains various sociopolitical factors caused radical political changes in developing countries His analysis shows that for Africa the main obstacle for building democracy is economy While for East Asia and the Middle East the major obstacle are culture and religion Huntington s analysis oversimplified the driving factors of democratization in specific case such as China a hybrid of Capitalist economy and communist politics This paper measures the current democratization of Chinese politics from three perspectives social capital rapid economic development and radical social movement Thus the grand question is whether these factors can lead to a regime change in China The author draws a conclusion that the radical political change is possible but not desirable in Chinese politics In the eyes of rising Chinese middle Class a Singaporean political transformation or South Korean democratization is more favored than radical democratization Following the US Presidential election China went through a one week meeting of the 18th National Congress starting on November 8 2012 Without much surprise Xi replaced Hu becoming the core of Chinese communist power The power transition seems to be smooth in Chinese media coverage However anecdotes rumors unofficial reports and foreign news exposed the political battle behind the stage President Xi is now facing a stark different situation compared to Hu Today China is the world s second largest economy At the same time China is experiencing rising mass disturbance every year As a non democracy leaders past experience network and personality can greatly influence state policies With more people getting rich and educated the mass claim the mismatch between Chinese politics and economy Other than changing domestic Chinese politics China has drawn much attention internationally China s presence in Africa and the Middle East tightens the nerves of U S policy makers Is China a peaceful or benign riser Where is China heading toward What interests are Chinese companies pursuing and what strategies are they using globally The book investigates these questions in different chapters Globalization is the current trend As a propeller China s participation in global trade greatly shapes world order In return global trade also produced effects on China s domestic labor market particularly on the traditional Chinese women labors This book is a sound recipe integrating both faces of China domestically and internationally

The Third Wave Samuel P. Huntington, 2012-09-06 Between 1974 and 1990 more than thirty countries in southern Europe Latin America East Asia and Eastern Europe shifted from authoritarian to democratic systems of government This global democratic revolution is probably the most important political trend in the late twentieth century In The Third Wave Samuel P Huntington analyzes the causes and nature of these democratic transitions evaluates the prospects for stability of the new democracies and explores the possibility of more countries becoming democratic The recent transitions he argues are the third major wave of democratization in the modern world Each of the two previous waves was followed by a reverse wave in which some countries shifted back to authoritarian government Using concrete examples empirical evidence and insightful analysis Huntington provides neither a theory nor a history of the third wave but an explanation of why and how it occurred Factors responsible for the democratic trend include the legitimacy dilemmas of authoritarian regimes economic and social development the changed role of the Catholic Church the impact of the United States the European Community and the Soviet Union and the snowballing phenomenon change in one country stimulating change in others Five key elite groups within and outside the nondemocratic regime played roles in shaping the various ways democratization occurred Compromise was key to all democratizations and elections and nonviolent tactics also were central New democracies must deal with the torturer problem and the praetorian problem and attempt to develop democratic values and processes Disillusionment with democracy Huntington argues is necessary to consolidating democracy He concludes the book with an analysis of the political economic and cultural factors that will decide whether or not the third wave continues Several Guidelines for Democratizers offer specific practical suggestions for initiating and carrying out reform Huntington s emphasis on practical application makes this book a valuable tool for anyone engaged in the democratization process At this volatile time in history Huntington s assessment of the processes of democratization is indispensable to understanding the future of democracy in the world
