Economics Of Airborne Emissions:

The Economics of Airborne Emissions Douglas R. Mackintosh,1973 **The Economics of Airborne Emissions** Douglas R. Mackintosh,1973 *The Economic Geography of Air Transportation* John T. Bowen,2010-04-05 Drawing upon hundreds of mainly secondary sources this book answers three questions how did air transportation develop in the century after the Wright Brothers what does it mean to live in an airborne world and what is the future of aviation in this century

Economic Instruments for Air Pollution Control Ger Klaassen,Finn R. Førsund,2012-12-06 Economic theory and empirical models suggest that economic instruments should help us to meet environmental goals at lower cost Practical experience however shows that the cost savings of emission trading are smaller than expected and charges usually have had small incentive impacts This book gives the first comprehensive review of economic theory simulation models and practical experience with the use of economic instruments The book focuses on air pollution control Part I examines theoretical aspects and simulation modeling in a national context Part II surveys the practical experience in a variety of countries Part III explores international issues such as joint implementation Because of its unique blend of theoretical and empirical research the book will prove interesting for both economists and those interested in environmental policy **Acid Rain and**

Emissions Trading Roger K. Raufer,Stephen L. Feldman,1987 Presents a comprehensive examination of the concerns surrounding the implementation of the market approach for dealing with acid rain JOURNAL OF ECONOMIC LITERATURE

Air Transport Economics Bijan Vasigh,Brian Pearce,2024-01-26 Air Transport Economics From Theory to Applications uniquely merges the institutional and technical aspects of the aviation industry with their theoretical economic underpinnings Its integrative approach offers a fresh point of view that will find favor with many students of aviation This fourth edition has undergone extensive updates throughout It features new material addressing the impact of COVID 19 on the air transport industry and the efforts made by both the industry and governments to facilitate recovery A new chapter examines the impact of air transport on climate change and how government policies to address this issue could reshape the industry Additionally alongside expanded coverage of revenue management and pricing decisions this fourth edition incorporates case studies that give real world examples to reflect current industry practices Moreover there is a discussion of the latest computer applications that enhance the effectiveness of the new techniques This book offers a self contained theory and applications oriented text for individuals aspiring to enter the aviation industry as a practicing professional in the management area It will be of the greatest relevance to undergraduate and graduate students aiming to acquire a comprehensive grasp of the economics of the aviation industry The review questions at the end of each chapter have been expanded considerably and an online assignment has been introduced for each chapter This book will also appeal to many professionals who seek an accessible and practical explanation of the underlying economic forces that shape the industry

Economic Reform and Environmental Performance in Transition Economies Gordon Hughes,Magda Lovei,1999-01-01 transition has proved to be a much longer and more difficult process than most had anticipated and progress has varied By 1998 only one country Poland which embarked on economic reform before the rest of the region had reestablished sustained economic growth and surpassed the pretransition level of real gross domestic product GDP From Economic Reform and Environmental Performance in Transition Economies Most global economy and environmental watchers expect the transition to a market economy to yield environmental benefits The changing incentives that a market economy introduces should foster more efficient production better use of resources and increased community input The advanced reformers of the Central and Eastern European CEE countries proved this to be the case They improved energy efficiency and reduced

emissions intensity of pollutants The slower reforming countries of the Newly Independent States NIS also experienced lower pollution However that downturn coincided with the economic decline which shut down many major polluters This report reviews progress in environmental trends since transition began It looks at air and water pollution and health indicators in the trends and in light of the environmental issues identified in the Environmental Action Programme for Central and Eastern Europe It continues and builds on the World Bank s work in analyzing the environmental effects of transition restructuring and privatization with a view to identifying priority areas for investment and policy initiatives The report will interest environmental policy makers and practitioners

Controlling Automobile Air Pollution Virginia McConnell,2018-12-20 This volume includes many of the most influential and interesting academic articles related to the economics of mobile source pollution control The papers included explore why vehicles and vehicle markets are unique provide estimates of the type and magnitude of the social costs of driving and examine estimation methods and estimates of the various elasticities of vehicle demand Analysis of the social costs and policies to reduce both traditional air pollutants and greenhouse gas emissions are included Selected articles review the range of evaluation of both regulatory and market based approaches to controlling emissions The complexity of the effects of different policies are emphasized and the unintended consequences of regulation are explored in the context of vehicle emissions reduction policies

Global Economic and Environmental Aspects of Biofuels David Pimentel,2012-04-02 Biofuels and food are dependent on the same resources for production land water and energy The conjuncture of food energy and climate crises demands a new direction in how to harness agriculture to the joint tasks of energy saving emissions reduction and food security *Global Economic and Environmental Aspects of Biofuels* focuses on the all
