The Philosophy of Economics Daniel M. Hausman,1994-02-25 Expanded and updated coverage of such key areas as positivism and economic methodology as well as special methodological problems and perspectives enhances this new edition of twenty two classic and more recent pivotal investigations into the philosophy of economics

Economics as a Moral Science Peter Rona,Laszlo Zsolnai,2017-04-13 The book is reclaiming economics as a moral science It argues that ethics is a relevant and inseparable aspect of all levels of economic activity from individual and organizational to societal and global Taking ethical considerations into account is needed in explaining and predicting the behavior of economic agents as well as in evaluating and designing economic policies and mechanisms The unique feature of the book is that it not only analyzes ethics and

economics on an abstract level but puts behavioral institutional and systemic issues together for a robust and human view of economic functioning. It sees economic facts as interwoven with human intentionality and ethical content, a domain where utility calculations and moral considerations co-determine the behavior of economic agents and the outcomes of their activities. The book employs the personalist approach that sees human persons endowed with free will and conscience as the basic agents of economic life and defines human flourishing as the final end of economic activities. The book demonstrates that economics can gain a lot in meaning and also in analytical power by reuniting itself with ethics.

Modern Concepts of the Theory of the Firm Günter Fandel, Uschi Backes-Gellner, Manfred Schlüter, Joerg E. Staufenbiel, 2013-03-09. This volume contains the results of the International Conference on Managing Enterprises of the New Economy by Modern Concepts of the Theory of the Firm which took place in Hagen from 12-14 December 2002. The conference was organised jointly by the FernUniversität in Hagen and the Erich Gutenberg Arbeitsgemeinschaft in Cologne. The Deutsche Forschungsgemeinschaft, the FernUniversität and the Märkische Bank in Hagen provided generous financial support for the conference and in fact enabled its implementation and the publication of this record of the proceedings. We would like to express our gratitude to the sponsors for their support. The aim of the conference was the exchange of academic experience with regard to new approaches to and extensions of the theory of the firm that can be used to solve the problems of New Economy companies. The starting point was the practical experience that the owners and managers of New Economy companies paid too little attention to functional company controls in the general euphoria regarding future economic trends and that because of this the enterprises got into difficulties or were faced with threats to their survival. These control deficits were detected equally in the areas of sales, production, personnel, planning, organisation and finance and in the arrangement of management and control structures. Deficiencies in company evaluations and accounting led to investors experiencing severe disappointment on the loss of their invested capital.

Great Economic Thinkers from Antiquity to the Historical School Bertram Schefold, 2016-03-31. This book contains commentaries from the series *Klassiker der Nationalökonomie* (classics of economics) which have been translated into English for the first time. This selection focuses on neglected but notable writers in a deserted sub-discipline, localising the beginning of economic science not with Adam Smith but with the moral question of usury and the good life in Antiquity. Bertram Schefold's choice of authors for the *Klassiker* series which he has edited since 1991 and his comments on the various re-edited works are proof of his highly original and thought-provoking interpretation of the history of economic thought. HET. This volume is an important contribution to HET not only because it delivers original and fresh insights about such well-known figures as Aristotle, Jevons or Wicksell but also because it deals with authors and ideas who have been forgotten or neglected in the previous literature. In this regard, Schefold's book could prove to be seminal for the field of the history of economic thought for in the age of globalisation our usual restriction to the thinkers of Western Europe and the USA might eventually be overcome. This book will give the reader a far broader view of economics.

compared to that of the latest research This volume is suitable for those who are interested in and study history of economic thought as well as economic theory and philosophy

Handbook on the Economics and Theory of the Firm Michael Dietrich, Jackie Krafft, 2012-01-01 This unique Handbook explores both the economics of the firm and the theory of the firm two areas which are traditionally treated separately in the literature On the one hand the former refers to the structure organization and boundaries of the firm while the latter is devoted to the analysis of behaviours and strategies in particular market contexts the novel concept underpinning this authoritative volume is that these two areas closely interact and that a framework must be articulated in order to illustrate how linkages can be created This interpretative framework is comprehensively developed in the editors introduction and the expert contributors more than fifty academics of renowned authority further elaborate on the linkages in the seven comprehensive sections that follow encompassing background equilibrium and new institutional theories the multinational firm dynamic approaches to the firm modern issues firms strategies and economic policy and the firm Bridging economics and theory of the firm and providing both technical and institutional perspectives on real corporations this path breaking Handbook will prove an invaluable resource for academics researchers and students in the fields of economics heterodox economics business and management and industrial organization

Contemporary Economic Issues in Developing Countries John Baffoe-Bonnie, Mohammed Khayum, 2003-04-30 Important lessons for policy makers are provided here as contributors evaluate the effectiveness of domestic economic policies and the recommendations of international organizations such as the World Bank regarding the economic development of developing countries Challenges posed by debt problems corruption population dynamics poverty and the absence of adequate human and physical capital are highlighted Contributors cast doubts on the conclusions of the prevailing theories of economic development with patterns of economic change over the course of the 20th century Their findings point out the issue of inadequate social capability as a critical factor in understanding the lack of economic development in many developing countries They suggest that contemporary theorizing tends to pinpoint necessary but insufficient conditions for the successful implementation of development strategies in these countries
