**Energy Economics in Britain** Paul Tempest, 2012-12-06 Paul Tempest Energy economics is in national policy a vital point of intersection where Government industry finance research and many other interests meet In Britain it is not a recognised profession or academic discipline in its own right Perhaps it is part of our national style and heritage that it never should be so compartmentalised Indeed energy economics is an interest which cannot easily be constrained within even national boundaries international energy markets impinge everywhere through external demand supply and price affecting profoundly every aspect of the economy THE BRITISH INSTITUTE OF ENERGY ECONOMICS Over the last few years an increasing need has been widely perceived for free and open discussion of the major energy and economic issues of the day Easy communication and the joint implementation of technological progress seem worldwide the safest route to resolving national and international problems Such co-operation and interchange also bring into the light national and local political myopia bureaucratic inertia academic dogma and the distortions of an imperfect market system      Technical Innovation and British Economic Performance Keith Pavitt, 2016-01-01      **Energy Abstracts for Policy Analysis** ,1987-07

*Britain's Economy* Aubrey Jones, 1985-11-21 It has long been recognised that Britain has declined relatively to other countries although there are differences of view both on the beginning of the decline and its causes The author pinpoints two causes first a technological inferiority which has resulted in the country's exporting goods of poorer quality and importing goods of higher quality secondly the tendency for an upward pressure on incomes from a society of political equals where each individual has expectations of a level of income reasonably comparable with others The claims of different groups are easily accommodated in a semi-monopolistic industrial structure and are passed on in higher prices Keynes recognised the latter problem of cost push but his intellectual revolution was not accompanied by a change of institutions which continued to act in accordance with an earlier tradition The present Government has reached a false diagnosis in ascribing the country's problems to too much money It has therefore worsened the situation and weakened such hopes as there were of improvement

**Metallurgical Bulletin** ,1928      **Electricity and Energy Policy in Britain, France and the United States Since 1945** Martin Chick, 2007-01-01 it is a valuable and laudable work I found it interesting and helpful to have an account of the parallel developments in the other two countries An analysis of important aspects of British and French energy policy development based on primary sources is a worthwhile contribution A broad comparative synthesis of energy policy in the three countries

is also a worthwhile contribution John Neufeld EH NET The main objective of this very interesting book is to analyse from economic history and political economy perspectives the similarities and differences in the forms that the electricity sector has been organized and the ways that energy policy has developed in Britain France and the US The book s organization and the clarity of the writing make for a highly rewarding read Chick has dedicated many years to studying the electricity sector and this book demonstrates his mastery of this complex industry Chick s book will be of decided interest to energy specialists but it will also appeal to a broader readership including economic historians political economists and other social scientists who wish to understand the crucial role that energy has played in international politics economic growth and human welfare during the period since the Second World War Judith Clifton The Economic History Review Chick s superb study of this crucial sector goes right to the heart of a number of problems associated with markets and government casting light on each It also sheds light in unexpected areas and in particular on the history of economic thought Above all this volume succeeds admirably in fusing the best techniques of business and economic history to show why history matters for present day policy Roger Middleton Business History This history of the post WWII electricity supply industry in France Great Britain and the US is well researched and well written The author draws on newly available archival material to develop a sophisticated deeply informed portrayal of the evolutionary process in each nation This well crafted industrial history should be of interest to practitioners and policy makers as well as students and scholars Highly recommended R C Singleton Choice

Nationalisation regulation privatisation beyond polemics history lessons by Martin Chick Alain Beltran Universit Panth on Sorbonne France International economic history is not just concerned with flows of capital and goods It involves comparisons of the economic policy and organisation of specific economic sectors In this excellent book Martin Chick examines energy policy issues policy formation policy makers and their advisers in USA France and Britain drawing on original archive sources He brings out the importance of strategic issues including security in the switch from coal to oil and natural gas the European debate on coal and steel pricing in electricity supply and finally privatisation and liberalisation of markets It is a fine exercise in political economy and will appeal to scholars and students of politics as well as of history economics and business studies Robert Millward University of Manchester UK Analyzing the work of economic theorists and policy practitioners from the 1840s to the present this sophisticated historical account helps scholars understand better the profound obstacles to making successful energy policy today In particular the cross national study highlights the primacy of social political and historical forces over rational economic theory demonstrating that energy policy making has never been and will likely never become a pure science based on cherished academic principles such as marginal cost pricing Richard Hirsh Consortium on Energy Restructuring Virginia Tech US Martin Chick s overview of the formation and implementation of energy policy in three countries since 1945 is a remarkable achievement Writing clearly confidently a **Journal of the British Nuclear Energy Conference** British Nuclear Energy Conference,1958 **DPR/INF** ,1961 **ERDA Energy**
