and discussion with Fulbright scholar Mr Tasawar Baig and Professor David Earnest at Old Dominion University Some ideas and thoughts were also inspired by Professor Robert Putnam at the Harvard University John F Kennedy School of Government and Professor Zbigniew Kazimierz Brzezinski former US National Security Advisor when they did lectures and special discussion with me at Old Dominion University in 2009 and 2012 respectively In The Third Wave 1991 Samuel Huntington explains various sociopolitical factors caused radical political changes in developing countries His analysis shows that for Africa the main obstacle for building democracy is economy While for East Asia and the Middle East the major obstacle are culture and religion Huntington s analysis oversimplified the driving factors of democratization in specific case such as China a hybrid of Capitalist economy and communist politics This paper measures the current democratization of Chinese politics from three perspectives social capital rapid economic development and radical social movement Thus the grand question is whether these factors can lead to a regime change in China The author draws a conclusion that the radical political change is possible but not desirable in Chinese politics In the eyes of rising Chinese middle Class a Singaporean political transformation or South Korean democratization is more favored than radical democratization Following the US Presidential election China went through a one week meeting of the 18th National Congress starting on November 8 2012 Without much surprise Xi replaced Hu becoming the core of Chinese communist power The power transition seems to be smooth in Chinese media coverage However anecdotes rumors unofficial reports and foreign news exposed the political battle behind the stage President Xi is now facing a stark different situation compared to Hu Today China is the world s second largest economy At the same time China is experiencing rising mass disturbance every year As a non democracy leaders past experience network and personality can greatly influence state policies With more people getting rich and educated the mass claim the mismatch between Chinese politics and economy Other than changing domestic Chinese politics China has drawn much attention internationally China s presence in Africa and the Middle East tightens the nerves of U S policy makers Is China a peaceful or benign riser Where is China heading toward What interests are Chinese companies pursuing and what strategies are they using globally The book investigates these questions in different chapters Globalization is the current trend As a propeller China s participation in global trade greatly shapes world order In return global trade also produced effects on China s domestic labor market particularly on the traditional Chinese women labors This book is a sound recipe integrating both faces of China domestically and internationally *The Handbook of Political, Social, and Economic Transformation* Wolfgang Merkel, Raj Kollmorgen, Hans-Jürgen Wagener, 2019-01-25 Political social and economic transformation is a complex historical phenomenon It can adequately be analysed only by a multidisciplinary approach The Handbook brings together an international team of scholars who are specialists in their respective research fields It introduces the most important areas theories and methods in transformation research with particular attention placed on the historical and comparative dimension Although focussing on post communist and other democratic

transformations in our epoch the Handbook therefore presents and discusses not only their problems paths and developments but also deals with the antecedent waves beginning with the Meiji Restoration in Japan in 1868 and its aftermath The book is structured into six parts Starting with basic concepts as systems actors and institutions Section I it gives an overview over major theoretical approaches and research methods Sections II and III The connection of theory and method with their application is essential allowing special insights into the past and opens analytical avenues for transformation research in the future Section IV provides a historically oriented description or interpretation of particular waves or types of societal transformation With a clear focus on present transformations the contributions to Section V provide a description and discussion of the problems structures actors and courses of the transformations within different spheres of civil society politics law and economics Finally brief lexicographic entries in Section VI delineate research perspectives and facts about relevant issues of societal transformation Each of the 79 contributions contains a concise list of the most important research literature
