Economy and Society in Burgundy Since 1850 Robert Aldrich, 2023-01-20 First Published in 1984 *Economy and Society in Burgundy Since 1850* provides a comprehensive overview of the modern history of Burgundy. Burgundy is best known for its wine and its capital of Dijon is most often associated with mustard. Yet the region's modern history is more than a history of gastronomy. The coming of the railways in the 1850s greatly changed the economic life of the area, spurring the growth of Dijon and contributing to rural depopulation. Agricultural crises throughout the nineteenth century, such as the phylloxera epidemic in the vineyards, caused further dislocation in rural life. Even in the twentieth century, the countryside remained agricultural, while the city of Dijon owes its dynamism to the expansion of the service sector rather than to heavy industry. This book argues that this evolution, modernisation without industrialization, is not a matter of economic retardation but of the suitability of the region's natural resources and the intentional choice of its population. Rich in archival sources, this book is an interesting read for scholars and researchers of French history, European history, and modern history.

War, State, and Society in England and the Netherlands 1477-1559 Steven Gunn, David Grummitt, Hans Cools, 2007-11-15 Comparing England and the Netherlands in the age of warrior princes such as Henry VIII and Charles V, the book examines the development of new military and fiscal institutions and asks how mobilization for war changed political relationships throughout society.

In Search of the True West Esther Kingston-Mann, 1998-12-21 This groundbreaking work documents Russian efforts to appropriate Western solutions to the problem of economic backwardness since the time of Catherine the Great. Entangled then as now with issues of cultural borrowing, educated Russians searched for Western nations' ideas and social groups that embodied universal economic truths applicable to their own country. Esther Kingston-Mann describes Russian Westernization, which emphasized German as well as Anglo-U.S. economics, while she raises important questions about core values of Western culture and how cultural values and priorities are determined. This is the first historical account of the significant role played by Russian social scientists in nineteenth-century Western economic and social thought. In an era of rapid Western colonial expansion, the Russian quest for the right Western economic model became more urgent. Was Russia condemned to the fate of India if it did not become an England? In the 1900s, Russian liberal economists emphasized cultural difference and historical context, while Marxists and prerevolutionary government reformers declared that inexorable economic laws doomed peasants and their medieval communities. On the eve of 1917, both the tsarist regime and its leading critics agreed that Russia must choose between Western-style progress or feudal stagnation. And when peasants and communes survived until Stalin's time, he mercilessly destroyed them in the name of progress. Today, Russia's painful modernizing traditions shape the policies of contemporary reformers who seem as certain as their predecessors that

The French Communist Party in the Fifth Republic David Scott Bell, Byron Criddle, 1994 This up to date analysis of the French Communist Party sees it as an entirely unconventional political force not a normal party vying for office but a Leninist bureaucracy armed with an apocalyptic mission to deliver humanity from capitalism Its interests have been defined as part of an outpost of a world revolutionary movement and whilst its strategies may have varied they have done so in order to serve Soviet foreign policy purposes D S Bell and Byron Criddle trace the history of the Communist Party in France from its origins They focus in particular on the period since 1958 and explore the Party s unique organizational structures and international loyalties They examine structure and ideology relations with the Socialist party electoral performance and the 1980 s decline in the Party s fortunes This study will be essential reading for all students of contemporary French history and politics

War and Society in Medieval and Early Modern Britain Diana E. S. Dunn, 2000 Nine historians examine three

English civil wars that during King Stephen's reign the Wars of the Roses and that of the 17th century. Their concern is with the interaction of war and society rather than with details of individual campaigns and battles. They place the conflicts within the wider European context and developments in warfare on the continent. Distributed in the US by ISBS c Book News Inc

Inventing Luxembourg, 2010 The grand duchy of Luxembourg was created after the Napoleonic Wars but at the time there was no nation that identified with the emergent state. This book analyses how politicians, scholars and artists have initiated and contributed to nation building processes in Luxembourg since the nineteenth century processes that as this book argues are still ongoing. The focus rests on three types of representations of nationhood: a shared past, a common homeland and a national language. History was written so as to justify the country's political independence. Territorial borders shifted meaning constantly, repositioning the national community. The local dialect initially considered German variant was gradually transformed into the national language Luxembourgish. **American Book Publishing Record**

, 1984-12 **Continental Plans for European Union 1939-1945** Walter Lipgens, Wilfried Loth, 2019-11-05 No detailed description available for Continental Plans for European Union 1939-1945 **Regions in Europe** Patrick Le Gales, Christian Lequesne, 2006-02-27 Regions in Europe explores the state of regional politics in an increasingly integrated Europe. It argues that the predicted rise of increased political power at the regional level has failed to materialise and is fraught with paradox. In doing so, this study locates regions in relation to European integration, globalisation, the nation state, local government and comparative and national perspectives. Using case studies of the main players in Europe including Germany, France, UK, Italy, Spain, the Netherlands, Belgium, the contributors show how and why European regions remain remarkably weak in European governance. **Transforming the State** Marta VanLandingham, 2021-07-26 In the thirteenth and fourteenth centuries the Crown of Aragon was among the most active powers of the Mediterranean world. This volume examines the attempt by its ruling dynasty to rationalize its court so as to expand the monarchy's ability to gather and deploy resources in support of royal ambitions. Because change in medieval institutions however is based as much on exigency and personality as on political theory and program, this volume also focuses on the way in which the processes of transformation functioned at a human level. The book explores the quotidian operations of the various bureaus of the court as well as their social milieu, paying particular attention to the correlation between programmatic ideal and reality. **Spotlights on Incunabula** Anette Hagan, 2023-11-13 The five hundred years from the 1450s to the 1950s represent an extraordinarily rich quarry for evidence of incunabula sales, collecting and use. What book lists reveal about publishing and reading habits in late fifteenth century Venice, how a Scottish librarian went about acquiring incunabula during World War II and the international workshop connections glimpsed through early Hungarian bindings are among the topics explored in this volume. Library professionals aim spotlights on French plague tracts, Deventer as a printing place, the use of incunabula in learned societies in the nineteenth century and incunabula collecting by monks and universities in England and Scotland. **Legions of Pigs in the**

Early Medieval West Jamie Kreiner, 2020-10-27 An exploration of life in the early medieval West using pigs as a lens to investigate agriculture ecology economy and philosophy In the early medieval West from North Africa to the British Isles pigs were a crucial part of agriculture and culture In this fascinating book Jamie Kreiner examines how this ubiquitous species was integrated into early medieval ecologies and transformed the way that people thought about the world around them In this world even the smallest things could have far reaching consequences Kreiner tracks the interlocking relationships between pigs and humans by drawing on textual and visual evidence bioarchaeology and settlement archaeology and mammal biology She shows how early medieval communities bent their own lives in order to accommodate these tricky animals and how in the process they reconfigured their agrarian regimes their fiscal policies and their very identities In the end even the pig s own identity was transformed at the close of the early Middle Ages it had become a riveting metaphor for Christianity itself

"Agency, Visuality and Society at the Chartreuse de Champmol " SherryC.M. Lindquist, 2017-07-05 Grounded in archival sources this interdisciplinary study explores the profound historical significance of the mausoleum of the Valois Dukes of Burgundy the Chartreuse de Champmol Although the monument is well known as the site of pivotal works of art by Claus Sluter Melchior Broederlam Jean de Beaumetz and others until now art historians have not considered how these works functioned at the center of a complex social matrix Sherry Lindquist here considers the sacred subjects of the various sculptures and paintings not merely as devotional tools or theological statements but as profoundly influential social instruments that negotiated complex interactions of power Lindquist s sophisticated discussion coordinates analysis of primary sources with the most up to date scholarship in the field of art history not only with respect to late medieval Burgundian art but also to more theoretical questions pertaining to reception

A Widow's Vengeance after the Wars of Religion Tom Hamilton, 2024-01-16 Paris 1599 At the end of the French Wars of Religion the widow Ren e Chevalier instigated the prosecution of the military captain Mathurin Delacanche who had committed multiple acts of rape homicide and theft against the villagers who lived around her chateau near the cathedral city of Sens But how could Chevalier win her case when King Henri IV s Edict of Nantes ordered that the recent troubles should be forgotten as things that had never been A Widow s Vengeance after the Wars of Religion is a dramatic account of the impact of the

troubles on daily life Based on neglected archival sources and an exceptional criminal trial it recovers the experiences of women peasants and foot soldiers who are marginalized in most historical studies Tom Hamilton shows how this trial contributed to a wider struggle for justice and an end to violence in postwar France People throughout the society of the Old Regime did not consider rape and pillage as inevitable consequences of war and denounced soldiers illicit violence when they were given the chance As a result the early modern laws of war need to be understood not only as the idealistic invention of great legal thinkers but also as a practical framework that enabled magistrates to do justice for plaintiffs and witnesses like Chevalier and the villagers who lived under her protection
