Economy Of The Unlost:

Economy of the Unlost Anne Carson, 2009-04-11 The ancient Greek lyric poet Simonides of Keos was the first poet in the Western tradition to take money for poetic composition From this starting point Anne Carson launches an exploration poetic in its own right of the idea of poetic economy She offers a reading of certain of Simonides texts and aligns these with writings of the modern Romanian poet Paul Celan a Jew and survivor of the Holocaust whose economies of language are notorious Asking such questions as What is lost when words are wasted and Who profits when words are saved Carson reveals the two poets striking commonalities In Carson s view Simonides and Celan share a similar mentality or disposition toward the world language and the work of the poet Economy of the Unlost begins by showing how each of the two poets stands in a state of alienation between two worlds In Simonides case the gift economy of fifth century b c Greece was giving way to one based on money and commodities while Celan s life spanned pre and post Holocaust worlds and he himself writing in German became estranged from his native language Carson goes on to consider various aspects of the two poets techniques for coming to grips with the invisible through the visible world A focus on the genre of the epitaph grants insights into the kinds of exchange the poets envision between the living and the dead Assessing the impact on Simonidean composition of the material fact of inscription on stone Carson suggests that a need for brevity influenced the exactitude and clarity of Simonides style and proposes a comparison with Celan s interest in the negative design of printmaking both poets though in different ways employ a kind of negative image making cutting away all that is superfluous This book s juxtaposition of the two poets illuminates their differences Simonides fundamental faith in the power of the word Celan s ultimate despair as well as their similarities it provides fertile ground for the virtuosic interplay of Carson s scholarship and her poetic sensibility

The Art of Astonishment Alice

Brittan, 2022-02-24 First Place Winner in Non Fiction from the 2023 Next Generation Indie Book Awards Part literary history part personal memoir Alice Brittan's beautifully written *The Art of Astonishment* explores the rich intellectual religious and philosophical history of the gift and tells the interconnected story of grace where it comes from and what it is believed to accomplish Covering a remarkable range of materials from *The Epic of Gilgamesh* *The Iliad* and the tragedies of Classical Greece through the brothers Grimm and Montaigne to C S Lewis Toni Morrison J M Coetzee Elena Ferrante Karl Ove Knausgaard and Jhumpa Lahiri Brittan moves with ease from personal story to myth to theology to literature and analysis examining the nature of social and communal obligation the role of the intellectual in times of crisis and the pleasures of reading In the 21st century we might imagine grace as a striking and refined quality that is pleasurable to encounter but certainly not fundamental to anyone's existence or to the beliefs and practices that hold us together or drive us apart For millennia though it has been recognized as essential to the vitality of inner life as well as to the large scale shifts in perspective and legislation that improve the way we live as a society Grace is also astonishing always as the enormously insightful readings in *The Art of Astonishment* show Brittan reveals the concept's breadth as sacred and secular ancient and recent lived and literary And in so doing she shows us how the act of reading is like grace social but personal pleasurable and essential

The Ancient Economy Joseph Gilbert Manning, Ian Morris, 2005 Historians and archaeologists normally assume that the economies of ancient Greece and Rome between about 1000 BC and AD 500 were distinct from those of Egypt and the Near East However very different kinds of evidence survive from each of these areas and specialists have as a result developed very different methods of analysis for each region This book marks the first time that historians and archaeologists of Egypt the Near East Greece and Rome have come together with sociologists political scientists and economists to ask whether the differences between accounts of these regions reflect real economic differences in the past or are merely a function of variations in the surviving evidence and the intellectual traditions that have grown up around it The contributors describe the types of evidence available and demonstrate the need for clearer thought about the relationships between evidence and models in ancient economic history laying the foundations for a new comparative account of economic structures and growth in the ancient Mediterranean world

From Cohen to Carson Ian Rae,2008-03-26 From Cohen to Carson provides the first book length analysis of one of Canada s most distinctive fields of literary production Ian Rae argues that Canadian poets have turned to the novel because of the limitations of the lyric but have used lyric methods puns symbolism repetition juxtaposition to create a mode of narrative that contrasts sharply with the descriptive conventions of realist and plot driven novels *Communities of Memory* William James Booth,2018-07-05 Memory has fueled merciless violent strife and it has been at the core of reconciliation and reconstruction It has been used to justify great crimes and yet it is central to the pursuit of justice In these and more everyday ways we live surrounded by memory individual and social in our habits our names the places where we live street names libraries archives and our citizenship institutions and laws Still we wonder what to make of memory and its gifts though sometimes we are hardly even certain that they are gifts Of the many chambers in this vast palace I mean to ask particularly after the place of memory in politics in the identity of political communities and in their practices of doing justice from the Preface W James Booth seeks to understand the place of memory in the identity ethics and practices of justice of political communities Identity is he believes a particular kind of continuity across time one central to the possibility of agency and responsibility and memory plays a central role in grounding that continuity Memory identity takes two forms a habitlike form the deep presence of the past that is part of a life led in common and a more fragile vulnerable form in which memory struggles to preserve identity through time notably in bearing witness a form of memory work deeply bound up with the identity of political communities Booth argues that memory holds a defining place in determining how justice is administered Memory is tied to the very possibility of an ethical community one responsible for its own past able to make commitments for the future and driven to seek justice Underneath and motivating the politics of memory understood as contests over the writing of history over memorials museums and canons he writes there lies an intertwining of memory identity and justice *Communities of Memory* both argues for and maps out that intertwining

Economies of Scale Ann Keniston,2023-12-15 This book offers the first sustained study of the ways 21st century North American poems engage with financialization It

argues that recent poems about economics not only discuss but enact concerns with containment and agency essential to the contemporary financialized economy by manipulating the seemingly old fashioned figures of synecdoche the representation of the whole by the part and prosopopeia or personification Its four body chapters offer in depth readings of the work of eleven formally culturally and thematically diverse contemporary U S and Canadian poets who variously consider labor consumerism debt and the derivative form the Coda reads several recent poems about reparations in terms of an emerging tendency to emphasize the historical racialized and ethical contexts of contemporary economics As the book explores financialization s representation in recent poetry it redresses arguments that poetry is irrelevant to contemporary culture
