Ecoviolence Links Among Environment Population And Security:

Ecoviolence Thomas Homer-Dixon, Jessica Blitt, 1998-09-03 Ecoviolence explores links between environmental scarcities of key renewable resources such as cropland fresh water and forests and violent rebellions insurgencies and ethnic clashes in developing countries Detailed contemporary studies of civil violence in Chiapas Gaza South Africa Pakistan and Rwanda show how environmental scarcity has played a limited to significant role in causing social instability in each of these contexts Drawing upon theory and key findings from the case studies the authors suggest that environmental scarcity will worsen in many poor countries in coming decades and will become an increasingly important cause of major civil violence

The Environmental Dimension of Asian Security In-t'aek Hyön, Miranda Alice Schreurs, 2007 Northeast Asia is a region with highly disparate levels of industrialization and political systems It also contains some very troubling security flashpoints the Taiwan Strait the Korean Peninsula and the East China Sea China's rapacious quest for energy and rapid industrial expansion have led to intense international competition with Japan and the United States and internal instability as well North Korea poses two distinct environmental security threats famine refugees and the regime's use of nuclear blackmail for subsidized energy Yet there is very little regional cooperation despite the need to manage disputes over energy natural resources and pervasive pollution The Environmental Dimension of Asian Security examines these issues through a regional environmental security complex that explores the potential for greater intersubjective understandings of regional environmental and natural resource problems and greater institutional collaboration and management

Environmental Security and Gender Nicole Detraz, 2014-08-21 Over the past 20 years scholars policymakers and the media have increasingly recognized the links between both traditional and non traditional security issues and the changing

condition of the global environment Concepts such as environmental security and resource conflict have been used to hint at these significant linkages While there has been a good deal of scholarly work conducted that seeks to identify the ways that actors link these concepts there has been little examination of the intersection between approaches to environmental security and gender This book explores this intersection to provide an insight into the gendered nature of both global environmental politics and security studies It examines how the issues of security and the environment are linked to theory and practice and the extent to which gender informs these discussions By adopting a feminist environmental security discourse this book provides crucial redefinitions of key concepts and offers new insights into the ways we understand security environment connections Case studies evaluate if and how environment and security discourses are being used to understand a range of environmental issues and how a feminist environmental security discourse contributes to our understanding of security environment connections This multidisciplinary volume draws on literature from the environmental sciences security studies and sociology to highlight the complex human insecurities that often accompany environmental change As conceptualizations of security continue to shift and broaden to include environmental issues and concerns it is imperative that gender informs the debate

International Security, Peace, Development and Environment - Volume I

Ursula Oswald Spring, 2009-08-30 International Security Peace Development and Environment is a component of Encyclopedia of Institutional and Infrastructural Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias The Theme on International Security Peace Development and Environment deals in seven parts and two volumes with a myriad of issues of great relevance to our world such as human social gender and environmental security the transition in earth history from the holocene to the anthropocene potentially causing disasters and increasing resource scarcity limits to growth use of natural resources sustainable livelihood and productive system through technology rise of conflicts due to scarce and polluted resources and the concentration of humans in limited spaces of big cities the gender violence peace education and peace teaching as mechanisms to strengthen citizenship and to improve the understanding of cultural diversity mechanisms to strengthen the resistance against monopolist interests in the present global world and whistle blowing as a phenomenon to protect social peace and civil resistance The presentation culminates with a discussion on the means of active nonviolence to reinforce democratic behavior and to reduce tensions and violent outcomes in a complex world These two volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers and NGOs

Violent Environments

Nancy Lee Peluso, Michael Watts, 2001 Do environmental problems and processes produce violence Current U S policy about environmental conflict and scholarly work on environmental security assume direct causal links between population growth resource scarcity and violence This belief a staple of governmental decision making during both Clinton administrations and widely held in the environmental security

field depends on particular assumptions about the nature of the state the role of population growth and the causes of environmental degradation The conventional understanding of environmental security and its assumptions about the relation between violence and the environment are challenged and refuted in *Violent Environments* Chapters by geographers historians anthropologists and sociologists include accounts of ethnic war in Indonesia petro violence in Nigeria and Ecuador wildlife conservation in Tanzania and friendly fire at Russia's nuclear weapons sites *Violent Environments* portrays violence as a site specific phenomenon rooted in local histories and societies yet connected to larger processes of material transformation and power relations The authors argue that specific resource environments including tropical forests and oil reserves and environmental processes such as deforestation conservation or resource abundance are constituted by and in part constitute the political economy of access to and control over resources *Violent Environments* demands new approaches to an international set of complex problems powerfully arguing for deeper more ethnographically informed analyses of the circumstances and processes that cause violence

International Security Roland Dannreuther, 2014-01-28 *International Security* is a cutting edge analysis of the key security challenges and developments in the post Cold War world Drawing on a wide range of contemporary examples from the Iraq war to the rise of China it is an essential guide for students and policy makers seeking to understand the theoretical and empirical debates over the fast changing nature of international security today The book is organized into four main parts Part 1 provides an analytical framework for the book identifying the most significant post Cold War shifts in international security and recent theoretical developments in security studies Part 2 analyses the root causes for contemporary warfare the dilemmas and debates over military intervention and the role played by the UN NATO and other organizations in maintaining international peace and security Part 3 assesses the challenges of environmental security including the threat of resource based conflict most notably over oil and water and the perceived security challenges of international migration Part 4 discusses the new security challenges posed by international terrorism the proliferation of weapons of mass destruction and cyber warfare It explores the strategies and policies adopted by the United States particularly in the aftermath of 9 11 and assesses the implications of the rise of China and other emerging powers This book will be essential reading for students and analysts of international relations international security and strategic studies

Africa's Population: In Search of a Demographic Dividend Hans Groth, John F. May, 2017-05-23 This book examines the promises as well as the challenges the demographic dividend brings to sub Saharan Africa as fertility rates in the region fall and the labor force grows It offers a detailed analysis of what conditions must be met in order for the region to take full economic advantage of ongoing population dynamics As the book makes clear the region will need to accelerate reforms to cope with its

demographic transition in particular the decline of fertility The continent will need to foster human capital formation through renewed efforts in the areas of education health and employment This will entail a true vision and determination on the part of African leaders and their development partners The book will help readers to gain solid knowledge of the demographic trends and provide insights into socioeconomic policies that eventually might lead sub Saharan Africa into a successful future

Environment, Scarcity, and Violence Thomas F. Homer-Dixon, 2010-07-01 The Earth's human population is expected to pass eight billion by the year 2025 while rapid growth in the global economy will spur ever increasing demands for natural resources The world will consequently face growing scarcities of such vital renewable resources as cropland fresh water and forests Thomas Homer Dixon argues in this sobering book that these environmental scarcities will have profound social consequences contributing to insurrections ethnic clashes urban unrest and other forms of civil violence especially in the developing world Homer Dixon synthesizes work from a wide range of international research projects to develop a detailed model of the sources of environmental scarcity He refers to water shortages in China population growth in sub Saharan Africa and land distribution in Mexico for example to show that scarcities stem from the degradation and depletion of renewable resources the increased demand for these resources and or their unequal distribution He shows that these scarcities can lead to deepened poverty large scale migrations sharpened social cleavages and weakened institutions And he describes the kinds of violence that can result from these social effects arguing that conflicts in Chiapas Mexico and ongoing turmoil in many African and Asian countries for instance are already partly a consequence of scarcity Homer Dixon is careful to point out that the effects of environmental scarcity are indirect and act in combination with other social political and economic stresses He also acknowledges that human ingenuity can reduce the likelihood of conflict particularly in countries with efficient markets capable states and an educated populace But he argues that the violent consequences of scarcity should not be underestimated especially when about half the world's population depends directly on local renewables for their day to day well being In the next decades he writes growing scarcities will affect billions of people with unprecedented severity and at an unparalleled scale and pace Clearly written and forcefully argued this book will become the standard work on the complex relationship between environmental scarcities and human violence
