**The Community Food Forest Handbook** Catherine Bukowski, John Munsell, 2018-08-21 Collaboration and leadership strategies for long term success Fueled by the popularity of permaculture and agroecology community food forests are capturing the imaginations of people in neighborhoods towns and cities across the United States Along with community gardens and farmers markets community food forests are an avenue toward creating access to nutritious food and promoting environmental sustainability where we live Interest in installing them in public spaces is on the rise People are the most vital component of community food forests but while we know more than ever about how to design food forests the ways in which to best organize and lead groups of people involved with these projects has received relatively little attention In The Community Food Forest Handbook Catherine Bukowski and John Munsell dive into the civic aspects of community food forests drawing on observations group meetings and interviews at over 20 projects across the country and their own experience creating and managing a food forest They combine the stories and strategies gathered during their research with concepts of community development and project management to outline steps for creating lasting public food forests that positively impact communities Rather than rehash food forest design which classic books such as Forest Gardening and Edible Forest Gardens address in great detail The Community Food Forest Handbook uses systems thinking and draws on social change theory to focus on how to work with diverse groups of people when conceiving of designing and implementing a community food forest To find practical ground the authors use management phases to highlight the ebb and flow of

community capitals from a project's inception to its completion. They also explore examples of positive feedbacks that are often unexpected but offer avenues for enhancing the success of a community food forest. The Community Food Forest Handbook provides readers with helpful ideas for building and sustaining momentum working with diverse public and private stakeholders integrating assorted civic interests and visions within one project creating safe and attractive sites navigating community policies positively affecting public perception and managing site evolution and adaptation. Its concepts and examples showcase the complexities of community food forests highlighting the human resilience of those who learn and experience what is possible when they collaborate on a shared vision for their community. A highly useful guide based on the collective wisdom of people and communities who are defining this practice as they develop it on the ground. The thoughtful analysis of planning strategies and numerous case studies of active projects help us all understand what community food forests are and can be for the future. **FOREST GARDENS FOR URBAN HOMES** JESSE. HEIS, 2025      **Paradise Lot** Eric Toensmeier, Jonathan Bates, 2013-02-08 In this vivid and engaging work Eric Toensmeier entices us with his journey as an example explaining what to do and what mistakes to avoid to develop our own versions of an edible urban paradise. Toby Hemenway author of *Gaia's Garden*. When Eric Toensmeier and Jonathan Bates moved into a duplex in a run-down part of Holyoke, Massachusetts, the tenth of an acre lot was barren ground and bad soil peppered with broken pieces of concrete, asphalt, and brick. The two friends got to work designing what would become not just another urban farm but a permaculture paradise replete with perennial broccoli, paw paws, bananas, and moringa—all told more than two hundred low-maintenance edible plants in an innovative food forest on a small city lot. The garden intended to function like a natural ecosystem with the plants themselves providing most of the garden's needs for fertility, pest control, and weed suppression; also features an edible water garden, a year-round unheated greenhouse, tropical crops, urban poultry, and even silkworms. In telling the story of Paradise Lot, Toensmeier explains the principles and practices of permaculture, the choice of exotic and unusual food plants, the techniques of design and cultivation, and of course the adventures, mistakes, and do-overs in the process. Packed full of detailed, useful information about designing a highly productive permaculture garden, *Paradise Lot* is also a funny and charming story of two single guys, both plant nerds, with a wild plan to realize the garden of their dreams and meet women to share it with. Amazingly, on both counts, they succeed. This is permaculture for the rest of us. Best of all, *Paradise Lot* is fun to read. It overflows with love, love of plants, love of land, love of adventuring on the edge of knowledge, and love of living. It's hard to put down. I read it in two large gulps. Carol Deppe author of *The Resilient Gardener* and *Breed Your Own Vegetable Varieties*.

*Urbanization and Affordances that Promote Well-Being for (Urban) People and for a Healthy Biosphere* Stephan Barthel, Marketta Kyttä, 2020-01-30 The world is urbanizing at an unprecedented rate It is estimated that in the near future urban landscapes for another ca 2.7 billion people will be built on planet Earth approximately converting land equivalent to the size of South Africa Such land conversion coupled with citizen densification increasing inequalities shifting diets and emerging technologies challenge human well being and pose ever increasing demand for resources generated by the Biosphere This Research Topic concentrates on the

various ways urbanization can promote individual well being mental physical and social health as well as ecological health a healthy Biosphere What kind of affordances for human health promotion can urbanization include What kinds of affordances for a psychological connection with nature can urbanization include What kinds of nudges for pro environmental behavior and consumption decreasing detrimental consumption behaviors can be actively designed in urban settings The Research Topic at hand uses a transactional approach where an affordance can be understood as a non deterministic in situ precondition for a human activity enabled by relations between abilities of an individual with features of an environment We encourage a broad definition of the concept of affordances where the environment must not be restricted to the material biophysical environment alone but also could be combined with social immaterial features We see that the transactional approach of this Research Topic posits that meaning arises in relations between humans and their environment that it will be equally applicable to natural and designed environments and that it doesn't regard dichotomies like city contra nature or social contra ecological Hence this Research Topic is interested in if the transactional approach can be used as a conceptual tool not only for promotion of mental physical and social health in cities but simultaneously for unraveling relations at the micro scale in cities which can be used for solutions that also promote a healthy Biosphere **Gaia's Garden** Toby
