*Philosophy and the Metaphysical Achievements of Education* Ryan McInerney,2021-06-17

Tracing the deep connections between philosophy and education Ryan McInerney argues that we must use philosophy to reflect on the significance of educational practice to all human endeavour He uses a broad approach which takes in the relationships governing philosophy education and language to reveal education s fundamental achievements and metaphysical significance The realization of educational ideals and policies are read alongside growing skepticism regarding the theoretical and practical significance of philosophical thinking and the emphasis on resource efficiency and measurable outcomes which characterise schooling today It is from this context that McInerney defends the value inherent to the philosophy of education Drawing upon contemporary continental and analytic thinkers including Nietzsche Gadamer and Wittgenstein McInerney charts the role of education in shaping the child s metaphysical transformation through language acquisition Connecting early years and primary school education McInerney pinpoints rationality as the crucial factor which produces critical thinking beings He presents the pursuit of philosophically minded education as a rational pursuit which enables us to philosophise and educate others in turn dispensing with the epistemological and conceptual foundationalisms of the past

**Brain, Decision Making and Mental Health** Nima Rezaei,2023-01-01 Brain Decision Making and Mental

Health acknowledges that thinking is not a constant phenomenon but varies considerably across cultures Critical thinking is particularly important in bridging thinking divisions and its applicability across sciences particularly medical sciences We see critical thinking as educable and the arts as means to achieve this purpose We address the multidimensional relationship between thinking and health and related mechanisms Thinking mainly affects emotion regulation and executive function in

other words both mental and physical health are related as a function of thoughts Considering the thinking feeling emotion regulation executive function pathway it would be reasonable to propose thinking capacities based interventions to impact emotion regulation and executive function such as mindfulness and psychotherapy We review decision making taking place in integrated and social contexts and discuss the decision making styles decision outcomes relation Finally artificial thinking and intelligence prepare us for decision making outside the human mind      Education and Free Will Johan

Dahlbeck,2018-10-09 Education and Free Will critically assesses and makes use of Spinoza s insights on human freedom to construe an account of education that is compatible with causal determinism without sacrificing the educational goal of increasing students autonomy and self determination Offering a thorough investigation into the philosophical position of causal determinism Dahlbeck discusses Spinoza s view of self determination and presents his own suggestions for an education for autonomy from a causal determinist point of view The book begins by outlining the free will problem in education before expanding on a philosophical understanding of autonomy and how it is seen as an educational ideal It considers Spinoza s determinism and discusses his denial of moral responsibility Later chapters consider the relationship between causal determinism and autonomy the educational implications of understanding free will and how free will can be utilised as a valuable fiction in education This book will be of great interest to academics and postgraduate students in the field of education especially those with an interest in moral education and philosophy of education It will also be of interest to those in the fields of philosophy and psychology and specifically those focusing on the free will problem on Spinoza studies and on the relation between moral psychology and external influence      **Artificial General and Super Intelligence in**

The contributors write from a variety of standpoints offering many interpretations of what liberalism might mean in educational terms.

**A New Education for a New Economy: From Human Capital to Human Flourishing** Tal Gilead, 2024-06-03 Providing an in-depth novel analysis of education's role in today's economy by scrutinizing its theoretical underpinnings, this volume critiques the suitability of the current dominant economic framework for education and for shaping educational policymaking worldwide. Critically examining the history and philosophy that underpin our present societal understanding of the link between economics and education, the book argues for an urgent redefining of education's role in the economy based on intellectual foundations that significantly differ from our current dominant conceptions. Across seven chapters, the book posits that the adoption of a new philosophical framework, the reshaping of economic and educational aims, and the adjustment of our educational system are each necessary to better promote human flourishing. Ultimately providing a platform to entirely reconsider the idea that the primary aim of education is to serve the economic system, in particular economic growth, this book will appeal to scholars, researchers, and postgraduate students studying educational policy, the philosophy of education, and the history of education more broadly. Education policymakers and academics studying education and the economy may also find this book of interest.
