**for Human Development** Lesley Joy Powell, Simon McGrath, 2019-03-15 Focusing on reimagining the purpose of vocational education and training VET and grounded in the reality of a small cohort of young South Africans and an institution seeking to serve them Skills for Human Development moves beyond the inadequacies of the dominant human capital orthodoxy to present a rich theoretical and practical alternative for VET Offering a human development and capability approach it brings social justice to the forefront of the discussion of VET s purpose at the national institutional and individual levels In doing so this book insists that VET should be about enlarging peoples opportunities to live a flourishing life rather than simply being about narrow employability and productivity It argues that human development approaches while acknowledging the importance of work in its broadest sense offer a better way of bringing together VET and development than the current human capital inspired orthodoxy Offering a transformative vision for skills development this book Considers the potential contribution skills development could make to broader human development as well as to economic development Points to an alternative approach to the current and flawed deficit assumptions of VET learners Presents for the first time an alternative evaluative frame for judging VET purpose and quality Presents a timely account of current vocational and education training that is high on the agenda of international policymakers Taking a broad perspective Skills for Human Development presents a comprehensive and unique framework which bridges theory policy and practice to give VET institutions a new way of thinking about their practice and VET policymakers a new way of engaging with global messages of sustainable human development It is a vital resource for those working on the human development and skills approach in multiple disciplines and offers a grounding framework for international policymakers interested in this growing area *The Delusion of*

*Knowledge Transfer* Susanne Koch, Peter Weingart, 2016-12-13 With the rise of the knowledge for development paradigm expert advice has become a prime instrument of foreign aid At the same time it has been object of repeated criticism the chronic failure of technical assistance a notion under which advice is commonly subsumed has been documented in a host of studies Nonetheless international organisations continue to send advisors promising to increase the effectiveness of expert support if their technocratic recommendations are taken up This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation Based on empirical evidence from South Africa and Tanzania the authors show that aid related advisory processes are inevitably obstructed by colliding interests political pressures and hierarchical relations that impede knowledge transfer and mutual learning As a result recipient governments find themselves caught in a perpetual cycle of dependency continuously advised by experts who

convey the shifting paradigms and agendas of their respective donor governments For young democracies the persistent presence of external actors is hazardous ultimately it poses a threat to the legitimacy of their governments if their policy making becomes more responsive to foreign demands than to the preferences and needs of their citizens      **The Delusion of Knowledge Transfer** Susanne Koch,Peter Weingart,2016-12-13 With the rise of the knowledge for development paradigm expert advice has become a prime instrument of foreign aid At the same time it has been object of repeated criticism the chronic failure of technical assistance a notion under which advice is commonly subsumed has been documented in a host of studies Nonetheless international organisations continue to send advisors promising to increase the effectiveness of expert support if their technocratic recommendations are taken up This book reveals fundamental problems of expert advice in the context of aid that concern issues of power and legitimacy rather than merely flaws of implementation Based on empirical evidence from South Africa and Tanzania the authors show that aid related advisory processes are inevitably obstructed by colliding interests political pressures and hierarchical relations that impede knowledge transfer and mutual learning As a result recipient governments find themselves caught in a perpetual cycle of dependency continuously advised by experts who convey the shifting paradigms and agendas of their respective donor governments For young democracies the persistent presence of external actors is hazardous ultimately it poses a threat to the legitimacy of their governments if their policy making becomes more responsive to foreign demands than to the preferences and needs of their citizens      *Reorienting Educational Efforts for Sustainable Development* Rajeswari Namagiri Gorana,Preeti Rawat Kanaujia,2016-07-01 Education in South Asia has a renewed agenda which can enable societies to leapfrog development that is sustainable such that the individual is prepared for his her involvement responsibility and commitment to local and global discussions of our common future This book on South Asia will focus on initiatives under the Education for Sustainable Development ESD umbrella and discuss the challenges opportunities issues and strategies in the countries of the region It presents these initiatives of Environmental Education ESD vis vis the administrative economic social cultural and ecological realities of each country at various levels of policy planning implementation and evaluation The discussions in this book extend beyond formal education systems like schools higher education pre service and in service teacher preparation to community education and education initiatives conceptualized with the goal of sustainability All initiatives will demonstrate how each country in its own pace contributing to move ESD from the periphery to the core of education initiatives
