Education In An Age Of Nihilism:

Education in an Age of Nihilism Nigel Blake, 2000 This book addresses concerns about educational and moral standards in a world increasingly characterised by nihilism On the one hand there is widespread anxiety that standards are falling on the other new machinery of accountability and inspection to show that they are not The authors in this book state that we cannot avoid nihilism if we are simply laissez faire about values neither can we reduce them to standards of performance nor must we return to traditional values They state that we need to create a new set of values based on a critical assessment of contemporary practice in the light of a number of philosophical texts that address the question of nihilism including the work of Nietzsche

Reclaiming Education in the Age of PISA Vasco d'Agnese, 2017-08-23 Reclaiming Education in the Age of PISA provides a critical analysis of the OECD's educational agenda and its main tool namely PISA Programme for International Student Assessment Based on an analysis of the OECD's public documents including publications webpages and videos d'Agnese argues that PISA is not just an assessment tool but rather an all encompassing framework that intends to govern education schooling living and society worldwide This creation of what d'Agnese calls a life brand raises concerns that education and learning are becoming wares and that consequently we run the risk of transforming schools into providers and teachers into agents of preconceived learning packages In pursuing only one concept of education and a very narrow one at that d'Agnese argues that OECD not only narrows down education to a mere reproductive process but that such an approach also erases the basic rules by which living develops and evolves In this sense PISA is but another form of authoritarian teaching authoritarian teaching being understood as any and every educational project which sets aims and purposes of education without giving the possibility to discuss and challenge such aims and purposes Reclaiming Education in the Age of PISA suggests a different educational logic emphasizing that schooling is not just a place to produce the correct skills but is also a matter of experimentation hesitation and wait one in which teachers and students attempt to dwell in pure potentiality for growth Providing a strong argument that a different way to conceive of schooling deserves our attention this book will be essential reading for academics researchers and postgraduates in the fields of educational philosophy and theory inclusive education and social justice It should also be of interest to policymakers and educational activists

Past, Present, and Future Possibilities for Philosophy and History of Education Stefan Ramaekers, Naomi Hodgson, 2018-08-17 On the occasion of the retirement of Paul Smeyers this book considers the state and status of the philosophy and history of education today Over the last 20 years the conditions in which research takes place have changed considerably They have done so in ways that are often less than favourable to disciplines such as history and philosophy of education and the space and time for the practices that constitute these disciplines of reading of writing of collegiality is increasingly under pressure During this time the Research Community on the History and Philosophy of Educational Research has convened annually to bring its critical lenses to bear on these emergent conditions and to suggest ways that educational research might or ought to be done otherwise As co founder and co convenor of the Research Community this volume explores and recounts Paul Smeyers development of Wittgensteinian scholarship and its legacy in education his formative role in the development of philosophy of education as an international field his many international collaborations the useless educational philosophical deepening of concepts and the wider educational philosophical import of this This gives rise to consideration of the failure of these fields to halt the changes in the governance and status of the university that threatens them and those practices that remain and that are emerging in academia that we wish to protect to pass on to the next generation of researchers in these fields

Educational Research: Why 'What Works' Doesn't Work Paul Smeyers, Marc Depaepe, 2007-01-07 Education and educational research according to the current fashion are supposed to be concerned with what works to the exclusion of all other considerations All over the world and particularly in the English speaking countries governments look for means of improving student achievement as measured by standardized test scores Although such improvements are often to be welcomed they do not answer all significant questions about what constitutes good education Also the research on which they are based is not the only legitimate way to do educational research Social research and therefore educational research cannot ignore the distinctive nature of what it studies a social activity where questions of meaning and value cannot be eliminated and where interpretation and judgment play a crucial role In this book distinguished philosophers and historians of education from 6 countries focus on the problematical nature of the search for what works in educational contexts in practice as well as in theory Beginning with specific problems they move on to more general and theoretical considerations seeking to go beyond over simple ideas about cause and effect and the rhetoric of performativity that currently has educational thinking in its grip Freedom of inquiry in educational research can no longer be taken for granted Narrow definitions of what constitutes scientific research funding criteria that enforce particular research methods and policy decision processes that ignore any research that is not narrowly utilitarian create a context in many countries that discourages scholarship of a more speculative exploratory or critical sort This book brings together an exceptional combination of international and cross disciplinary scholars who bring the perspectives of history and philosophy of science to ask How did we arrive at this place and Where is educational research heading The book illuminates the anti intellectual consequences of a what works mentality in education and shows that the ostensibly scientific revolution in educational research in fact reflects an ahistorical and conceptually muddled understanding of what actually constitutes science This book could not be more timely and important Nicholas C Burbules Grayce Wicall Gauthier Professor University of Illinois With research increasingly tied to State policies with the instrumental purpose of guiding school reforms the volume provides an important historical and philosophical questioning of the possibilities limitations and challenges of education research Internationally leading scholars engage in a significant conversation that is sophisticated and nuanced for understanding contemporary debates Thomas S Popkewitz the University of Wisconsin Madison USA This publication is realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of

Russell Re Manning, Carlotta Santini, 2022-10-24 The place or absence of God in Nietzsche's thought remains central and controversial Nietzsche's proclamation of the death of God is one of the most famous and parodied slogans in modern philosophy seeming to encapsulate the nineteenth century loss of religious faith in the affirmation that God has turned out to be our oldest lie and yet the nature of Nietzsche's own theology is far from clear This volume engages with Nietzsche's arguments about God theology and religion The volume extends the discussion to an engagement of Nietzsche with alternative models of God with ancient Greek religions and with discussions of diversity race class gender sex in conjunction with religion The chapters examine Nietzsche's genealogy of religion and his claims about the place of God and theology in the history of Western thought that faith of the Christians which was also Plato's faith as well as his engagements with alternative conceptions of God The volume also examines the historical and contemporary reception of Nietzsche's arguments about God by religious and non religious thinkers asking to what extent Nietzsche's philosophy of God speaks to the challenges of today's globalized philosophy and religion **Ahuman Pedagogy** Jessie L. Beier, Jan

Jagodzinski, 2022-07-14 This book brings together a collection of multi disciplinary voices to discuss debate and devise a series of ahuman pedagogical proposals that aim to address the challenging ecological political social economic and aesthetic

milieu within which education is situated today Attending to contemporary calls to decenter all too human educational research and practice while also coming to terms with the limits and inheritances through which such calls are made possible in the first place this book aims to interrogate but also invent what we are calling an ahuman pedagogy Organized in three main sections Conjuring an Ahuman Pedagogy Machinic Re distributions and Non pedagogies for Unthought Futures this multi disciplinary experiment in ahuman pedagogies for the age of the Anthropocene offers an experimental albeit always speculative and incomplete series of pedagogical proposals that work to unthink and counter actualize educational futures as usual
