Finding Jobs David Card,Rebecca Blank,2000-06-29 Do plummeting welfare caseloads and rising employment prove that welfare reform policies have succeeded or is this success due primarily to the job explosion created by today s robust economy With roughly one to two million people expected to leave welfare in the coming decades uncertainty about their long term prospects troubles many social scientists Finding Jobs offers a thorough examination of the low skill labor market and its capacity to sustain this rising tide of workers many of whom are single mothers with limited education Each chapter examines specific trends in the labor market to ask such questions as How secure are these low skill jobs particularly in the event of a recession What can these workers expect in terms of wage growth and career advancement opportunities How will a surge in the workforce affect opportunities for those already employed in low skill jobs Finding Jobs offers both good and bad news about work and welfare reform Although the research presented in this book demonstrates that it is possible to find jobs for people who have traditionally relied on public assistance it also offers cautionary evidence that today s strong economy may mask enduring underlying problems Finding Jobs shows that the low wage labor market is particularly vulnerable to economic downswings and that lower skilled workers enjoy less job stability Several chapters illustrate why financial incentives such as the Earned Income Tax Credit EITC are as essential to encouraging workforce participation as job search programs Other chapters show the importance of including provisions for health insurance and of increasing subsidies for child care to assist the large population of working single mothers affected by welfare reform Finding Jobs also examines the potential costs of new welfare restrictions It looks at how states can improve their flexibility in imposing time limits on families receiving welfare and calls into question the cutbacks in eligibility for immigrants who traditionally have relied less on public assistance than their native born counterparts Finding Jobs is an informative and wide ranging inquiry into the issues raised by welfare reform Based on comprehensive new data this volume offers valuable guidance to policymakers looking to design policies that will increase work raise incomes and lower poverty in changing economic conditions

Rosenbaum, Caitlin E. Ahearn, Janet E. Rosenbaum, Janet Rosenbaum, 2017-09-02 College for all has become the new American dream Most high school students today express a desire to attend college and 90% of on time high school graduates enroll in higher education in the eight years following high school Yet degree completion rates remain low for non traditional students students who are older low income or have poor academic achievement even at community colleges that endeavor to serve them What can colleges do to reduce dropouts In Bridging the Gaps education scholars James Rosenbaum Caitlin Ahearn and Janet Rosenbaum argue that when institutions focus only on bachelor s degrees and traditional college procedures they ignore other pathways to educational and career success Using multiple longitudinal studies the authors evaluate the shortcomings and successes of community colleges and investigate how these institutions can promote alternatives to BAs and traditional college procedures to increase graduation rates and improve job payoffs The authors find that sub baccalaureate credentials associate degrees and college certificates can improve employment outcomes Young adults who complete these credentials have higher employment rates earnings autonomy career opportunities and job satisfaction than those who enroll but do not complete credentials Sub BA credentials can be completed at community college in less time than bachelor s degrees making them an affordable option for many low income students Bridging the Gaps shows that when community colleges overemphasize bachelor s degrees they tend to funnel resources into remedial programs and try to get low performing students on track for a BA Yet remedial programs have inconsistent success rates and can create unrealistic expectations leading struggling students to drop out before completing any degree The authors show that colleges can devise procedures that reduce remedial placements and help students discover unseen abilities attain valued credentials get good jobs and progress on degree ladders to higher credentials To turn college for all into a reality community college students must be aware of their multiple credential and career options Bridging the Gaps shows how colleges can create new pathways for non traditional students to achieve success in their schooling and careers
