Handbook of Classroom Management Carolyn M. Evertson, Carol S. Weinstein, 2013-10-31 Classroom management is a topic of enduring concern for teachers administrators and the public It consistently ranks as the first or second most serious educational problem in the eyes of the general public and beginning teachers consistently rank it as their most pressing concern during their early teaching years Management problems continue to be a major cause of teacher burnout and job dissatisfaction Strangely despite this enduring concern on the part of educators and the public few researchers have chosen to focus on classroom management or to identify themselves with this critical field The Handbook of Classroom Management has four primary goals 1 to clarify the term classroom management 2 to demonstrate to scholars and practitioners that there is a distinct body of knowledge that directly addresses teachers managerial tasks 3 to bring together disparate lines of research and encourage conversations across different areas of inquiry and 4 to promote a vigorous agenda for future research in this area To this end 47 chapters have been organized into 10 sections each chapter written by a recognized expert in that area Cutting across the sections and chapters are the following themes First positive teacher student relationships are seen as the very core of effective classroom management Second classroom management is viewed as a social and moral curriculum Third external reward and punishment strategies are not seen as optimal for promoting academic and social emotional growth and self regulated behavior Fourth to create orderly productive environments teachers must take into account student characteristics such as age developmental level race ethnicity cultural background socioeconomic status and ableness Like

other research handbooks the Handbook of Classroom Management provides an indispensable reference volume for scholars teacher educators in service practitioners and the academic libraries serving these audiences It is also appropriate for graduate courses wholly or partly devoted to the study of classroom management Schooling the Symbolic Animal Margaret Eisenhart,Bradley A. Levinson,2000 This anthology introduces some of the most influential literature shaping our understanding of the social and cultural foundations of education today Together the selections provide students a range of approaches for interpreting and designing educational experiences worthy of the multicultural societies of our present and future The reprinted selections are contextualized in new interpretive essays written specifically for this volume **Educational Leadership for Ethics and Social Justice** Anthony H. Normore,Jeffrey S. Brooks,2014-01-01 The purpose of this book is to examine and learn lessons from the way leadership for social justice is conceptualized in several disciplines and to consider how these lessons might improve the preparation and practice of school leaders In particular we examine philosophy anthropology sociology economics political science public policy and psychology Our contention is that the field of educational leadership might consider taking a step backward in order to take several forward That is educational leadership researchers might re examine social justice both in terms of social and individual dynamics and as disciplinary specific multidisciplinary and interdisciplinary phenomenon By adopting this approach we can connect and extend long established lines of conceptual and empirical inquiry and thereby gain insights that may otherwise be overlooked or assumed This holds great promise for generating refining and testing theories of social justice in educational leadership and will help strengthen already vibrant lines of inquiry That is rather than citing a single or a few works out of their disciplinary context it might be more fruitful to situate educational leadership for social justice research in their respective traditions This could be carried out by extending extant lines of inquiry in educational leadership research and then incorporating lessons gleaned from this work into innovative practice For example why not more clearly establish lines of educational leadership and justice research into the Philosophy of Social Justice Economics of Social Justice Political Studies of Social Justice Sociology of Social Justice Anthropology of Social Justice and the Public Policy of Social Justice as focused and discrete areas of inquiry Once this new orientation toward the knowledge base of social justice and educational leadership is laid we might then seek to explore some of the natural connections between traditions before ultimately investigating justice in educational leadership through a free association of ideas as the worlds of practice and research co construct a new language they can use to discuss educational leadership Such an endeavor may demand

reconceptualization of both the processes and products of collaborative research and the communication of findings but it will demand a breaking down of methodological and epistemological biases and a more meaningful level and type of engagement between primary and applied knowledge bases
