Stephen Chaikind,William J. Fowler,2013-09-05 The 2001 Yearbook of the AEFA reaffirms the connections between the field of education finance and the wider education community Among the topics it examines are curricula reform outcome assessment accountability community control and privatization 2001 **Money, Politics, and**

Law Karen DeMoss,Kenneth K. Wong,2013-09-13 This yearbook offers research and insights to stimulate thought inform debates and explore future research directions **Leading from the Inside Out** David Grubb,Lynda Tredway,2015-12-03

This book proposes that the collective responsibility of teachers as classroom and school leaders working together to solve their own problems provides the fulcrum of school change It makes the case that teachers and school leaders do not operate in a vacuum but rather they work within the larger context of policy and other social influences Grubb and Tredway provide the building blocks of history policy and social analysis that are necessary if teachers are to be effective in the collective school a place where adults thrive as learners and are able to co create joyful learning experiences for children and youth By encouraging teachers to move out of the individual classroom and to think critically and institutionally about the schools they would like to work in about their own responsibilities for creating such schools about the range of policies from outside the school and how they can influence those policies rather than being subjected to them this book shows that a teacher s influence is not limited to the classroom and students but can significantly shape and inform external policies and decisions

The Politics of Education Policy in an Era of Inequality Sonya Douglass,Janelle T. Scott,Gary L. Anderson,2018-12-07 In a context of increased politicization led by state and federal policymakers corporate reformers and for profit educational organizations The Politics of Education Policy in an Era of Inequality explores a new vision for leading schools grounded in culturally relevant advocacy and social justice theories This timely volume tackles the origins and implications of growing accountability for educational leaders and reconsiders the role that educational leaders should and can play in education policy and political processes This book provides a critical perspective and analysis of today s education policy landscape and leadership practice explores the challenges and opportunities associated with teaching in and leading schools and examines the structural political and cultural interactions among school principals district leaders and state and federal policy actors An important resource for practicing and aspiring leaders The Politics of Education Policy in an Era of Inequality shares a theoretical framework and strategies for building bridges between education researchers practitioners and policymakers

The Money Myth W. Norton Grubb,2009-01-15 Can money buy high quality education Studies find only a weak relationship between public school funding and educational outcomes In The Money Myth W Norton Grubb proposes a

powerful paradigm shift in the way we think about why some schools thrive and others fail The greatest inequalities in America s schools lie in factors other than fiscal support Fundamental differences in resources other than money for example in leadership instruction and tracking policies explain the deepening divide in the success of our nation s schoolchildren The Money Myth establishes several principles for a bold new approach to education reform Drawing on a national longitudinal dataset collected over twelve years Grubb makes a crucial distinction between simple resources and those compound complex and abstract resources that cannot be readily bought Money can buy simple resources such as higher teacher salaries and smaller class sizes but these resources are actually some of the weakest predictors of educational outcomes On the other hand complex resources pertaining to school practices are astonishingly strong predictors of success Grubb finds that tracking policies have the most profound and consistent impact on student outcomes over time Schools often relegate low performing students particularly minorities to vocational remedial and special education tracks So even in well funded schools resources may never reach the students who need them most Grubb also finds that innovation in the classroom has a critical impact on student success Here too America s schools are stratified Teachers in underperforming schools tend to devote significant amounts of time to administration and discipline while instructors in highly ranked schools dedicate the bulk of their time to engaged learning using varied pedagogical approaches Effective schools distribute leadership among many instructors and administrators and they foster a sense of both trust and accountability These schools have a clear mission and coherent agenda for reaching goals Underperforming schools by contrast implement a variety of fragmented reforms and practices without developing a unified plan This phenomenon is perhaps most powerfully visible in the negative repercussions of No Child Left Behind In a frantic attempt to meet federal standards and raise test scores quickly more and more schools are turning to scripted off the shelf curricula These practices discourage student engagement suppress teacher creativity and hold little promise of improving learning beyond the most basic skills Grubb shows that infusions of money alone won t eradicate inequality in America s schools We need to address the vast differences in the way school communities operate By looking beyond school finance The Money Myth gets to the core reasons why education in America is so unequal and provides clear recommendations for addressing this chronic national problem

School Choice Policies and

Outcomes Walter Feinberg, Christopher Lubienski, 2008-10-16 Perhaps no school reform has generated as much interest and controversy in recent years as the proposal to have parents select their children s schools Opponents of school choice fear that rolling back the government s role will lead to profit driven financial scandals sectarianism and increased class and racial isolation School choice advocates believe that state provision oversight and regulation stifle entrepreneurial creativity The contributors to this volume not only provide a clear assessment of the logic and evidence supporting the different sides of the debate but also unmask the assumptions about the relationship between markets government and educational achievement Their message is that neither markets nor government alone will guarantee freedom equality achievement or

community If choice is to improve education and advance equality then educational policy cannot be placed on automatic and left to the free market Rather choice policy must be deliberately directed toward meeting these goals and this book shows how that could be accomplished Annual Yearbook of the American Education Finance Association American Education Finance Association,19?? *Spheres of Justice in Education* Deborah A.
