Web Based Learning in K 12 Classrooms examines inquiry-based learning, online interaction, displaying student work online, Internet accessibility for students with disabilities, initiating school counselors into e-learning technologies, the role of government in virtual schools, Web-based schools in California, Virginia, Pennsylvania, Vermont, and Texas, a 13 category classification system for online educational resources, the ATLAS model for program implementation, evaluations of more than 1,000 pieces of online information, articles, research reports, news, and statistics, and 900 Web applications, tutorials, drills, games, and tests with evaluation criteria.
