The Brontës in Context

Marianne Thormählen, 2012-11 Crammed with information The Brontës in Context shows how the Brontës fiction interacts with the spirit of the time

Charles Knight Valerie Gray, 2017-11-30 Charles Knight Educator Publisher Writer is the first modern book length study of this important nineteenth century educational reformer author and publisher Though he made significant contributions during his lifetime to the cause of popular education providing inexpensive but quality reading material for the newly literate working classes Knight has been largely ignored by scholars This neglect the author suggests may be related to Knight's association with the controversial Society for the Diffusion of Useful Knowledge and to the use scholars make of Knight's Penny Magazine and his two volumes on political economy to support their arguments on theories of social control and other issues The author argues that Knight's reputation has suffered as a result She reexamines the

evidence to offer fresh assessments of Knight's life and work that illuminate his genuine achievements. She concludes with an evaluation of Knight's role as an innovative publisher who used the latest techniques to provide the emerging mass readership with unique combinations of text and image in his many pictorial books and periodicals. Conquest of Mind David de Giustino, 2016-06-17 First published in 1975. This study examines one of the popular scientific philosophies of the nineteenth century. The first part deals with the reception and diffusion of phrenology in Britain, its usefulness to various professions and its challenge to traditional religion. The second part considers the application of phrenology in two separate social movements: prison reform and national education. This title will be of interest to students of history and philosophy.

Barbara Bodichon's Epistolary Education Meritxell Simon-Martin, 2020-06-30. This book brings together feminist histories in education with an innovative approach to epistolary narrative analytics. In deploying the notion of the epistolary bildung, the author rigorously and eloquently shows how the correspondence of Barbara Bodichon can shed fresh light in a range of personal problems and public issues in women's lives which remain relevant today. Maria Tamboukou, Professor of Feminist Studies, University of East London, UK. This book assesses Barbara Bodichon's significance in the history of the women's movement in Britain by elaborating a conceptualisation of letters as sources of feminist development. Bodichon was the leader of the first women's suffrage committee in England, which collected 1,500 signatures in favour of the female vote, a petition presented in the House of Commons by sympathising MPs to support the amendment of the 1867 Reform Bill. This book explores the significance of letter exchange in Barbara Bodichon's feminist becoming as she managed to mobilize partisans and secure signatures by means of chains of friendship letters spreading across the country. For letters functioned as platforms where concomitantly to her making sense of her experiential input, Bodichon adopted, redefined and challenged circulating discourses, transforming them in the process and hence contributing to the production of feminist knowledge intersubjectively and collaboratively in dialogue with her addressees. At the crossroads of history of feminism, gender history and history of women's education, this book explores the significance of letter exchange in Bodichon's development into one of the galvanizing figures of the women's rights movement in Victorian England. *A History of Western Educational Ideas* Professor Peter Gordon, Professor Denis Lawton, 2019-11-26. It is important that all those concerned with education—parents, teachers, administrators and policymakers—should have a reasonable understanding of the present system and how it has developed, sometimes over a period of many years. This work traces the development of Western educational ideas from the Greek society of Socrates, Plato and Aristotle to the ideas and ideologies behind some of the controversial issues in education today. This book discusses the continuous development of educational thought over three millennia. The focus upon the history of ideas in this volume is partly an attempt to move history of education away from an approach based on great men to technological, economic and political influences on ideas and beliefs. It reviews many issues ranging from the purposes of education from the earliest times to the challenge of postmodernism in the present century. The authors provide an accessible

and thought provoking guide to the educational ideas that underlie practice **A Companion to Eighteenth-Century Europe** Peter H.
