Educational Administration An Australian Perspective:

Educational Administration Judith Chapman, 2020-08-04 Both the theory and practice of educational administration have undergone major changes in recent years There is now more theoretical diversity in the field than at any other time with influences from traditional and post positivist science subjectivism ethics critical theory and cultural studies Similarly social political and economic factors have brought about new approaches to practice Schools administration in particular is increasingly being dominated by decentralization and pressures for accountability on curriculum and educational outcomes Educational Administration is the first Australian text to offer a comprehensive survey of theory context and practice It includes chapters from leading Australian scholars such as Richard Bates Hedley Beare Brian Caldwell Gabriele Lakowski and Fazal Rizvi Future School Administration Clive A. J. Dimmock, 2000 The contributors in this book discuss key issues facing schools and school systems from both Western and Asian cultural perspectives In doing so they expose both the similarities and differences convergence and divergence of school leadership in the two regions A number of themes that are currently hot policy issues run through the book including school performance school effectiveness leadership and management school design improvement and change and the globalization and internationalization of policies and policy reforms **Educational Administration and History** Tanya Fitzgerald, Helen Gunter, 2013-10-18 In the past 40 years there have been a number of significant developments across the fields of educational administration and history In this volume the authors have selected a number of key issues to illustrate and trace these changes The seven articles by leading scholars in the field offer an analysis of contemporary educational administration history and policy debates and how this has impacted on teachers leaders schools and the education sector This book offers readers a valuable insight into continuing and contemporary debates in the field and the authors offer a refreshing interpretation of these debates This book provides a rich analysis from a range of theoretical methodological perspectives and highlights the extent to which these debates remain a contemporary concern This book was published as a special issue of the Journal of Educational Administration and History The Aesthetic Dimensions of Educational Administration & Leadership Eugenie A. Samier, Richard Bates, 2006-11-22 The question of aesthetics as a theoretical framework for thinking about modern leadership issues in educational settings is an emergent area of inquiry that is receiving considerable attention There is a growing sense that the mechanistic approach to leadership which has been widely encouraged over the last ten years is sterile and that a more philosophical approach is now required This approach is covered here taking into account the importance of aesthetics on all aspects of the administrative and leadership world the ways ideas and ideals are created how their expression is conveyed the impact they have on interpersonal relationships and the organisational environment that carries and reinforces them and the moral boundaries or limits that can be established or exceeded While presenting a significant departure from conventional studies in the field the international contributors reflect a continuity of thought on administrative and

Samier,with Adam G. Stanley,2008-03-01 This collection explores the political philosophy and theory foundations for educational administration and leadership as they influence our understanding analysis and practice in the field The first section Political Philosophy The Foundations discusses the work of such writers as Machiavelli Kant and Hegel Hayek Habermas and Bourdieu as their theories apply to the educational context The second section Political Analysis The Critique examines various types of political analyses such as the politics of the policy process minority politics civil society micro politics community politics and cosmopolitan theory The last section Current Political Controversies The Practice addresses current topical issues of a political nature including the serving of the state economic agenda the democratisation of educational organisations the neo conservative agenda and globalisation The broad international perspective from which these topics are covered makes this volume an excellent addition to the fields of educational leadership organizational studies and educational administration theory [A Critical Realist Perspective of Education](#) Brad Shipway,2010-07-20 Explores the capability of critical realism to throw light on educational theory This book investigates the convergence and divergence between two forms of critical realism It outlines the key characteristics that are necessary for a theological position to claim the term critical realist **Global Teachers, Australian Perspectives** Carol Reid,Jock Collins,Michael Singh,2013-09-04 This is the first book on global teachers and the increasingly important phenomenon of brain circulation in the global teaching profession A teaching qualification is a passport to an international professional career the global teacher is found in more and more classrooms around the world today It is a two way movement This book looks at the growing importance of immigrant teachers in western countries today and at teachers who exit from western countries emigrant teachers seeking teaching experience in other countries Drawing on the international literature in Europe North America Asia and elsewhere supplemented by rich insights derived from recent Australian research the book outlines the personal institutional and structural processes nationally and internationally underlying the increasing global circulation of teachers It identifies the key drivers of global teacher mobility a range of factors including family lifestyle classroom experience travel opportunities for advancement discipline linguistic skills taxation rates cultural factors and institutional frameworks and policy support The book is the first detailed contemporary account of the experiences of Australian immigrant and emigrant teachers in the schools and communities where they teach and live It makes an important and original theoretical and empirical contribution to the contemporary fields of sociology of education and immigration studies **Professional Development for Leaders and Managers of Self-Governing Schools** David Gamage,2006-08-05 Current Context Currently self governing schools SGS or school based site based management SBM or local management of schools LMS identifies the individual school as the primary unit of improvement It relies on the

redistribution of decision making authority to stimulate and sustain improvements in a school For this purpose varying degrees of formal authority to make decisions in the domains of school's mission goals priorities and school policies relating to financial material and human resources are not simply delegated but transferred by legislation to a representative governing body called the school council or board Accordingly it is the position of the principal or the head teacher previously at the apex of the hierarchical structure of the school which undergoes the most radical reform Under the new concept authority is shifted to the corporate body that is to the council or board while the principal becomes an ex officio member of that body and the chief executive officer CEO of the school Traditionally and legally the principal or the head teacher was vested with the full authority for the total management of the school But in terms of SGS or SBM the principal becomes a partner with the representatives of other relevant stakeholders in a democratic structure When the bureaucratic model of a school gets modified with the school governing body occupying the apex of the school hierarchy it becomes the key power centre with legal authority
