Educational Futures Dominant And Contesting Visions:

Educational Futures Ivana Milojevic, 2005-05-19 This book provides an overview and analysis of current tensions debates and key issues within OECD nations particularly Australia the USA Canada and the UK with regard to where education is and should be going Using a broad historical analysis it investigates ideas and visions about the future that are increasingly evoked to support arguments about the imminent demise of the dominant modern educational model Focusing neither on prediction nor prescription this text suggests the goal is an analysis of the ways in which the notion of the future circulates in contemporary discourse Five specific discourses are explored globalisation new information and communications technologies feminist indigenous and spiritual The book demonstrates the connections between particular approaches to time visions of the future and educational visions and practices The author asserts that every approach to educational change is inherently based on an underlying image of the future

Breathing: Violence In, Peace Out Ivana Milojevic, 2013-10-01 An investigation into the long term impact of transgenerational trauma and the possibilities for healing this book explores the links between personal histories and world events and helps us to understand life's dualities violence and peace self and other stability and change slavery and freedom Author Ivana Milojevic asks How does violence change us Is it possible to change the inner landscape of one's thinking in the midst of pain and suffering and If this is our past how might our future be different Oscillating between two voices Milojevic journeys between the personal breathing in which describes her experience of violence while the second academic voice breathing out tries to make sense of it The rhythm created by inhaling and exhaling reflects not only what we take from the world but also what we give back to it Breathing is an inquiry into alternative futures as Milojevic explores a range of possibilities both for each of us personally and for the world

Postformal Education Jennifer M. Gidley, 2016-08-05 This book explains why the current education model which was developed in the 19th century to meet the needs of industrial expansion is obsolete It points to the need for a new approach to education designed to prepare young people for global uncertainty accelerating change and unprecedented complexity The book offers a new educational philosophy to awaken the creative big picture and long term thinking that will help equip students to face tomorrow's challenges Inside readers will find a dialogue between adult developmental psychology research on higher stages of reasoning and today's most evolved education research and practice This dialogue reveals surprising links between play and wisdom imagination and ecology holism and love The overwhelming issues of global climate crisis growing economic disparity and the youth mental health epidemic reveal how dramatically the current education model has failed students and educators This book raises a planet wide call to deeply question how we actually think and how we must educate It articulates a postformal education philosophy as a foundation for educational futures The book will appeal to educators educational philosophers pre service teacher educators educational and developmental psychologists and educational researchers including postgraduates with an interest in transformational educational theories

designed for the complexity of the 21st century This is the most compelling book on education I have read for many years It has major implications for all who are in a position to influence developments in teacher education and educational policy
Gidley is one of the very rare scholars who can write intelligently and accessibly about the past present and future in education I was challenged and ultimately convinced by her contention that what masquerades as education today must be seen for what it is an anachronistic relic of the industrial past
Gidley's challenge is to co evolve a radically new education All who seek to play a part must read this book
Brian J Caldwell PhD Educational Transformations former Dean of Education at the University of Melbourne and Deputy Chair Australian Curriculum Assessment and Reporting Authority ACARA

Feminist Utopianism & Education Christine Forde,2007-01-01 This book looks to feminist utopian thinking to seek alternative conceptualisations of the issue of gender and education We are currently faced with a situation where the issue of gender has become one of competing needs Debates on gender have swung from a concern for the progress of girls and women to a moral panic about the lack of engagement of boys in education The formulation of policy that swings from concerns and initiatives to support the educational progress of girls and women to a crisis about the engagement of boys and young men in education is ultimately to the detriment of both genders to the educational system and to society as a whole There is an urgent need for us to consider alternative approaches to the issue of gender and education In utopian writing education has been constructed as one of the means of bringing about the good society but importantly within feminist utopian writing and thinking what we understand as education is itself being transformed In feminist utopian thinking side by side with a critique of formal educational institutions there is an attempt to think more holistically about the relationship between the educative process and the achievement of girls and women's self determination both individually and collectively to bring about a realignment of gender relationships in the sociopolitical order This book draws from the debates about gender in the visions of alternative sociopolitical orders found in feminist utopian thinking to explore the issue of gender and education This book will be of special relevance to those interested in feminism gender studies educational futures and utopian thinking
