**Educational Scenario in South Asian Countries** G. Ananda,2002      **Economic Integration in South Asia: Issues and Pathways** Action Aid International,2010 Economic Integration in South Asia Issues and Pathways is one of the volumes of the series Imagine a New South Asia presented by ActionAid International Asia It envisions a new South Asia free from human deprivation and demonstrates how South Asian countries can learn from the best practices in the region as well as from their failures and also by trying to emulate the successful strategies of East Asia China and Southeast Asian countries to introduce education and health systems      Economic Integration in South Asia Muinul Islam,Nitai Chandra Nag,2010 Economic Integration in South Asia Issues and Pathways is one of the volumes of the series titled Imagine a New South Asia presented by ActionAid International Asia This volume envisions a new South Asia free from human deprivation and poverty where countries will become successful proud and inclusive societies This book demonstrates how South Asian countries can learn from the best practices in the region as well as from their failures and also by trying to emulate the successful strategies of introducing egalitarian education and health systems of East Asia China and Southeast Asian countries Rich in analysis and research this volume seeks an alternative people centred perspective and takes into account all those voices that have so long been unheard in policy making processes through reviews of case studies Not only will the findings of this volume be useful in conducting campaigns for appropriate policy and mindset changes but these will also eventually make the emergence of a highly integrated South Asia truly possible      **Encyclopaedia of Education in South Asia** Ramesh Chandra,2003-08 The literacy is the most potent factor so far as the social characteristic having deep bearing on the development of overall personalities of an individual is concerned The competence with knowledge not only makes us feel as responsible citizens it also      **More and Better Jobs in South Asia** The World Bank,2011-12-20 South Asia has created nearly 800 000 jobs per month during the last decade Robust economic growth in large parts of the region has created better jobs those that pay higher wages for wage workers and reduce poverty for the self employed the largest segment of the region s employed Going forward South Asia faces the enormous challenge of absorbing 1 to 1 2 million entrants to the labor force every month for the next two decades at rising levels of productivity This calls for an agenda that cuts across sectors and includes improving the reliability of electricity supply for firms in both urban and rural settings dealing decisively with issues of governance and corruption making access to land easier for urban informal firms and strengthening transport links between rural firms and their markets It requires improving nutrition in early childhood to avoid cognitive impairment intensifying the focus on quality of learning in education systems equipping workers with the skills that employers demand and reorienting labor market regulations and programs to protect workers rather than jobs The continuance of high economic growth to help improve job quality is not assured But the region s demography can provide a favorable tailwind The growth of workers exceeds that of dependents in much of the region The resources saved from having fewer dependents

can be shifted to high priority investments in physical and human capital accumulation necessary to create productive jobs in countries with an enabling policy framework But the demographic window of opportunity is open for only the next three decades a fact which lends urgency to the reform agenda This book will be of interest to policy makers their advisers researchers and students of economics who seek solutions not only to the challenge of creating more and better jobs in South Asia but globally as well It is the first title in South Asia Development Matters a new series that will serve as a vehicle for in depth synthesis of economic and policy analysis on key development topics for South Asia **Sociology of Education in**

Dickson, Barry B. Hughes, Mohammed T. Irfan, 2015-12-22

Education is one of the most fundamental prerequisites to economic growth and social stability in the world It is also one of the most inadequately realised goals of development with the average education of global adults remaining essentially at primary levels Advancing Global Education is the second in a series of volumes that explores prospects for human development how development appears to be unfolding globally and locally how we would like it to evolve and how better to assure that we move it in desired directions The first volume addressed the reduction of global poverty The third will turn to the enhancement of global health Advancing Global Education presents the most extensive set of forecasts of global education participation and attainment levels to date providing and exploring a massive multi issue database and proposing a scenario for accelerating educational attainment throughout major world regions and 183 countries The International Handbook of Educational Research in the Asia-Pacific Region J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present

alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region **Girls' Education and Empowerment** Geeta Menon, Namita Ranganathan, Sanjeev Rai, 2024-12-31 The book builds an understanding on the issue of girls education and empowerment in the backdrop of a broad geographic canvas of countries in South Asia Using select education and gender related indicators and qualitative data it presents the status of girls education across these countries It proceeds to explore the dominant structural systemic situational and macro and micro level inter related barriers to girls education Country specific situational issues like economic crises political instability natural disasters and conflict that impact girls lives and education are underscored for contextual understanding Within this landscape the impact of COVID 19 on girls education has also been discussed The book s uniqueness lies in its approach to linking praxis with theory by distilling the fundamental principles and assumptions underlying the strategies using these for theorizing and generating discourse in the field The attempts to theorize are multidisciplinary in nature as they draw from the disciplines of Sociology Psychology Education Development Studies Conflict Studies and Gender Studies This book would be useful to the students researchers and teachers working in the fields of Education Development Studies Gender Studies Social Work Sociology and Psychology It would also be an invaluable companion to policymakers and professionals from government and non government organizations working in the fields of Education Social Development and Gender
