Edison The Electric Chair:

Edison and the Electric Chair Mark Essig, 2005-10-01 Describes how Thomas Edison an avowed opponent of the death penalty became the creator of the electric chair offering a look at the social cultural economic and political factors involved in the invention

Executioner's Current Richard Moran, 2007-12-18 A fascinating and provocative story The Washington Post of high stakes competition between two titans that shows how the electric chair developed through an effort by one nineteenth century electric company to discredit the other In 1882 Thomas Edison ushered in the age of electricity when he illuminated Manhattan s Pearl Street with his direct current DC system Six years later George Westinghouse lit up Buffalo with his less expensive alternating current AC The two men quickly became locked in a fierce rivalry made all the more complicated by a novel new application for their product the electric chair When Edison set out to persuade the state of New York to use Westinghouse s current to execute condemned criminals Westinghouse fought back in court attempting to stop the first electrocution and keep AC from becoming the executioner s current In this meticulously researched account of the ensuing legal battle and the horribly botched first execution Moran raises disturbing questions not only about electrocution but about about our society s tendency to rely on new technologies to answer moral questions

Edison and the Electric Chair Mark Essig, 2003 In 1879 Thomas Edison unveiled a world changing invention electricity an invisible force that produced light powered streetcars and carried telephone conversations A decade later Edison formerly an avowed opponent of the death penalty championed the creation of a completely different sort of device the electric chair Edison promoted the electric chair for reasons that remain controversial to this day Was he genuinely concerned to find a humane alternative to the gallows Was it part of his bitter battle with rival George Westinghouse for commercial dominance Or in fact was he warning the public of real dangers posed by the high voltage wires that looped above America s streets In *Edison the Electric Chair* Mark Essig delivers a provocative new examination of Edison the man and the inventor He also explores America s fascination with technology and violent death

Crusader Nation David Traxel, 2006

Blood and Volts Thom Metzger, Th Metzger, 1996 At the dawn of the twentieth century General Electric using Thomas Edison s direct current and Westinghouse employing Nikola Tesla s groundbreaking alternating current were locked in combat to determine which would dominate the technological fate of the nation Electricity was thought to be a highly ambiguous force both godlike creative power and demonic destroyer of life Th Metzger argues that for scientists of the day as well as the general populace the electric chair was both harbinger and early pinnacle of modernity the high altar of the rising cult of progress In the popular imagination Tesla and Edison were seen as nearly superhuman beings and their struggle was not only for wealth and power but to reshape the face of America In *Blood and Volts* Metzger creates a unique synthesis of scholarship storytelling and cultural critique to present a clear and compelling story of America struggling to define itself through scientific innovation

Roth, 2022-11-15 On a cold windy December night in 1926 hell was unleashed on a tenant farm near Farwell the last Texas town before the New Mexico border Prone to the bottle and fits of rage the burly man with the smiling blue eyes was in no mood to quarrel with his third wife over his bootleg whisky and sexual abuse of his stepdaughter He went from room to room in the house killing his wife and

each child with primitive cutting tools and his bare hands By the time he concluded his bloody work he had taken the lives of nine family members ranging in age from 2 to 41 committing what one local reporter called the blackest crime in the history of the West Texas Panhandle Husband father uncle embezzler serial mass murderer philanderer child molester convict and military deserter George Jefferson Hassell was many things to many people most of them bad His pattern of familicide crime had begun in 1917 when he slaughtered his common law wife and her three kids in Whittier California Later in Texas he married his brother's wife and became stepfather to her eight children Using Hassell's confessions and his many interviews with reporters as well as the trial transcripts and reminiscences of those who crossed paths with him in Texas Oklahoma and California Mitchel P Roth presents the first comprehensive account of the life and crimes of one of the least known multiple murderers in Texas let alone American history Roth situates Hassell's saga within the 1920s Texas criminal justice system including the death penalty which Hassell ultimately received from Old Sparky the electric chair at Huntsville

Imagining the American Death Penalty Birte Christ, 2025-04-29 Imagining the American Death Penalty traces the US American cultural imaginary of capital punishment through popular visual representations from the 1890s to the twenty first century The book focuses on three generic and historical clusters of representations early film from the 1890s through Intolerance 1916 crime film noir of the 1950s and 1960s and legal TV series from the 1990s through the early 2000s The book makes two central arguments First it demonstrates that an increased concern with the death penalty in popular media does not mean that these texts promote an abolitionist agenda their cultural work is ambiguous at best This ambiguity is always contingent upon both the affordances of the particular genre and medium in question and on political legal discursive context The book explores both in detail Early film is enchanted with its own representational possibilities due to the progress of technology and in analogy with the progress in execution technique specifically the electric chair In film noir genre conventions and the legal back and forth before and after Furman predicate ambiguity In legal TV series the genre's ensemble casts and its focus on conversational exchange invite open debate The second argument is that popular visual representations consistently whitewash the death penalty The book demonstrates that this is the case because the most common narrative around executions in film and TV is to cast the condemned man as a hero who defies the violence of the state gains dignity by accepting his fate and faults and in some ways triumphs over death The American imaginary until very recently did or could not imagine Black men to possess that measure of agency that it attributed to its white heroes

Deadly Justice Frank R. Baumgartner, Marty Davidson, Kaneesha R. Johnson, Arvind Krishnamurthy, 2018 Forty years and 1 400 executions after the US Supreme Court ruled the death penalty constitutional eminent political scientist Frank Baumgartner and a team of younger scholars have collaborated to assess the empirical record and provide a definitive account of how the death penalty has been implemented A Statistical Portrait of the Death Penalty shows that all the flaws that caused the Supreme Court to invalidate the death penalty in 1972 remain and indeed that new problems have arisen Far from perfecting the mechanism of death the

Hunt,2010-04-08 In the nineteenth century science and technology

developed a close and continuing relationship. The most important advancements in physics, the science of energy and the theory of the electromagnetic field were deeply rooted in the new technologies of the steam engine, the telegraph and electric power and light. Bruce J Hunt here explores how the leading technologies of the industrial age helped reshape modern physics. This period marked a watershed in how human beings exerted power over the world around them. Sweeping changes in manufacturing, transportation and communications transformed the economy, society and daily life in ways never before imagined. At the same time, physical scientists made great strides in the study of energy, atoms and electromagnetism. Hunt shows how technology informed science and vice versa, examining the interaction between steam technology and the formulation of the laws of thermodynamics, for example, and that between telegraphy and the rise of electrical science. Hunt's groundbreaking introduction to the history of physics points to the shift to atomic and quantum physics. It closes with a brief look at Albert Einstein's work at the Swiss patent office and the part it played in his formulation of relativity theory. Hunt translates his often demanding material into engaging and accessible language suitable for undergraduate students of the history of science and technology.

Carceral Fantasies Alison Griffiths, 2016-08-23 A groundbreaking contribution to the study of nontheatrical film exhibition, *Carceral Fantasies* tells the little-known story of how cinema found a home in the U.S. penitentiary system and how the prison emerged as a setting and narrative trope in modern cinema. Focusing on films shown in prisons before 1935, Alison Griffiths explores the unique experience of viewing cinema while incarcerated and the complex cultural roots of cinematic renderings of prison life. Griffiths considers a diverse mix of cinematic genres from early actualities and reenactments of notorious executions to reformist exposés of the 1920s. She connects an early fascination with cinematic images of punishment and execution, especially electrocutions, to the attractions of the nineteenth-century carnival, electrical wonder show and Phantasmagoria, a ghost show using magic lantern projections and special effects. Griffiths draws upon convict writing, prison annual reports and the popular press obsession with prison house cinema to document the integration of film into existing reformist and educational activities and film's psychic extension of flights of fancy undertaken by inmates in their cells. Combining penal history with visual and film studies and theories surrounding media's sensual effects, *Carceral Fantasies* illuminates how filmic representations of the penal system enacted ideas about modernity, gender, the body and the public, shaping both the social experience of cinema and the public's understanding of the modern prison.
