Educating All Students In The Mainstream Of Regular Education:

Educating All Students in the Mainstream of Regular Education Susan Bray Stainback, William C. Stainback, Marsha Forest, 1989 This book builds from a historical overview of educational integration and explores the rationale behind the movement toward a merger of regular and special education. Noted authorities advance this argument in well structured chapters organized around key themes including educational equality in practice strategies to promote merger educational practices to meet diverse student needs and family and community support. Case histories and boxed statements highlighting pertinent points are among the effective instructional aides in this textbook. A thought provoking question and answer format also confronts 22 of the most commonly addressed concerns about merging regular and special education. **Embarking on a New Century** Robert L. Schalock, Pamela C. Baker, M. Doreen Croser, 2002 Captures the challenging and controversial era between 1975-2000 that led the field of intellectual disability into an age of community acceptance and inclusion. This title includes chapters that focus themes such as public policy and health care. Educating All Students Together Leonard C. Burrello, Carl Lashley, Edith E. Beatty, 2001 A convincing conceptualization of schools as complex adaptive systems. The authors' recommendations that leaders must tinker at the margins and lead in the zone of complexity provide sound and practical advice for school leaders faced with creating unified educational systems that will be able to effectively support students with increasingly diverse learning needs. David W. Peterson, Superintendent Northern Suburban Special Education District Highland Park IL. Far too long we have failed to acknowledge the large number of students relegated to parallel educational systems. This thought provoking book provides an important first step in helping us surface the mental models we hold of the teaching and learning of diverse student populations. Nelda Cambron McCabe, Department of Educational Leadership, Miami University Oxford OH. An insightful, informative and thought provoking book that deals with a topic that concerns every educator. Kate Kinley, Director of Administrative Training and Staff Development, Clark County School District NV. Learn to create unified learner centered schools where all students learn. By focusing on student learning as the central goal of school administrators, Burrello, Lashley, and Beatty establish a plan for creating a truly integrated educational system, one that unifies the separate and parallel systems of special and general education. The authors call for an end to the piecemeal strategy of including students one classroom, one grade level, or one school at a time. Instead, they demonstrate how administrators, school leaders, and the community must work together on decisions to implement personalized education plans, accountable curricular outcomes, and appropriate instructional adaptations. Some of the key concepts include: Schools embracing special services personnel, The roles of the community and other stakeholders, Reconceptualizing schools based on learner centered principles, Program evaluation and incentives, Brain and holographic design as a framework for complex adaptive systems, Collaboration between school administrators and teachers, Adapting curriculum and instruction. In this groundbreaking work of practical application, Burrello, Lashley, and Beatty demonstrate effective leadership strategies that

will enable administrators to better manage the cultural imperative of equity and excellence for all students They further support the plan for unified schools through case studies and a program evaluation of self study guide An essential resource for general and special educators parents and communities

Special Educational Needs and Inclusive Education:

Inclusive education David R. Mitchell,2004 Demonstrates how the fields of special education and inclusive education have evolved philosophically and technically over the past 30 years

Inclusive Education Lissa A. Power-deFur,Fred P. Orelove,1997 A comprehensive look at inclusion this book provides success stories by administrators and teachers who have found that inclusion is the best way to meet the least restrictive environment needs of their students Complete with checklists in service materials and pre and post evaluation methods this detailed guide will help you meet student needs in a way that complements the educational fiscal and legal outlooks as well as the attitudes of your school division

Educational Administration in a Pluralistic Society Colleen A. Capper,1993-07-01 In this bold provocative supplemental text for the field of educational administration Colleen Capper and contributors challenge administrators policymakers practitioners and communities to confront the realities of schools and students in a pluralistic society The book examines recent educational initiatives aimed at addressing the needs of students and staff from traditionally underrepresented groups marginalized on the basis of race language gender sexual orientation social class or disability Each chapter critically reviews the literature and research to probe the current characteristics of a nondominant group including such information as its demographic characteristics its role in school reform its representation in organizational theory and behavior its presence within curriculum and instruction and its relationship with the school as community Capper argues for the adoption of a multiparadigmatic framework from which to approach educational leadership for today's schools Book jacket
