Education, Justice and the Human Good Kirsten Meyer,2014-05-16

The education system is faced with many demands of justice. What these demands imply and how they are justified is however disputed. In this book international contributors present cutting edge research to discuss the relationship between educational justice and the value of education. By combining reflections on educational justice with reflections on the human good and the aims of education the book reveals that it is not enough to assess certain patterns of distribution the value of what is to be distributed must also be clarified. In this respect deliberations about the value of education have to play an integral part in giving an account of educational justice. Questions addressed in the volume include: In what sense should justice, fairness and equality be realised in the education system? How is educational equality related to equality of opportunity? Is the main concern that everyone should be educated equally well or just well enough? Education Justice and the Human Good discusses the positional value of education and its relation to educational justice emphasising that education is valuable not only for competitive reasons but in its contribution to human flourishing. The book will appeal to those from the field of the philosophy of education as well as applied political philosophy from undergraduates to professional academics.

A CHOICE Outstanding Academic Title 2013. *Educating Activist Allies* offers a fresh take on critical education studies through an analysis of social justice pedagogy in schools serving communities privileged by race and class. By documenting the practices of socially committed teachers at an urban private academy and a suburban public school Katy Swalwell helps educators and educational theorists better understand the challenges and opportunities inherent in this work. She also examines how students responded to their teachers efforts in ways that both undermined and realized the goals of social justice pedagogy. This analysis serves as the foundation for the development of a curricular framework helping students to foster an Activist Ally identity the skills knowledge and dispositions necessary to negotiate privilege in ways that promote justice. *Educating Activist Allies* provides a powerful introduction to the ways in which social justice curricula can and should be enacted in communities of privilege.
