No Child Left Behind and the Transformation of Federal Education Policy, 1965-2005 Patrick J. McGuinn,2006 Education is intimately connected to many of the most important and contentious questions confronting American society from race to jobs to taxes and the competitive pressures of the global economy have only enhanced its significance Elementary and secondary schooling has long been the province of state and local governments but when George W Bush signed into law the No Child Left Behind Act in 2002 it signaled an unprecedented expansion of the federal role in public education This book provides the first balanced in depth analysis of how No Child Left Behind NCLB became law Patrick McGuinn a political scientist with hands on experience in secondary education explains how this happened despite the country s long history of decentralized school governance and the longstanding opposition of both liberals and conservatives to an active reform oriented federal role in schools His book provides the essential political context for understanding NCLB the controversies surrounding its implementation and forthcoming debates over its reauthorization how the struggle to define the federal role in school reform took center stage in debates over the appropriate role of the government in promoting opportunity and social welfare He places the evolution of the federal role in schools within the context of broader institutional ideological and political changes that have swept the nation since the 1965 Elementary and

Secondary Education Act chronicles the concerns raised by the 1983 report A Nation at Risk and shows how education became a major campaign issue for both parties in the 1990s McGuinn argues that the emergence of swing issues such as education can facilitate major policy change even as they influence the direction of wider political debates and partisan conflict McGuinn traces the Republican shift from seeking to eliminate the U S Department of Education to embracing federal leadership in school reform then details the negotiations over NCLB the forces that shaped its final provisions and the ways in which the law constitutes a new federal education policy regime against which states have now begun to rebel and that only by understanding the unique dynamics of national education politics will reformers be able to craft a more effective national role in school reform

Nafukho, Helen M. A. Muya, Beverly Irby, 2014-06-01 While universities world over are undergoing reforms and change in the case of African universities as illustrated in this book the reforms and changes are profound and can best be described as transformative This book is unique in many ways which makes it extraordinary First unlike other books that have examined issues on higher education in Africa from externalist positions the contributors to this book are scholars who have been educated are currently teaching in African universities or have taught in African universities The book specifically focuses on transformations in the governance of African universities and its implications on equity entrepreneurship innovation quality assurance information and communication technologies ICTs and reform issues in higher education in Africa The book presents pertinent research on governance in African universities in an experiential and empirical manner The contributors of the book chapters include individuals actively involved in teaching researching and governance of higher education institutions in Africa The chapters are based on empirical data including review of relevant literature The book also recognizes that university governance is more than just crisis in financial or economic issues but includes best management practices shared governance meaningful reforms strategic planning consultation transparency and accountability client students lecturers parents and the public satisfaction as well as the role of the university in development The contributions take cognizance of the fact that governance as a concept is facing fundamental changes in the context of global knowledge economy and African local conditions Contributors also take cognizance of the fact that one important source of change in Africa has been the accelerating speed of scientific and technological advancement in learning at universities where lifelong learning programs adult learning programs distance and online learning are relatively new The chapters are also sensitive to new changes in gender demographical technological education reforms social and economic transformations in the governance of African universities The book is basically an academic book for use by undergraduates and graduate students at universities policy makers and formulators in African ministries of Education supra national organizations foreign organizations working in Africa NGOs and CBOs as well as development stakeholders and community organizers

Cultural Diversity, Educational Equity and the Transformation of Higher Education Michael

Benjamin,1996-07-11 Cultural diversity policy in higher education requires detailed knowledge of the groups in question guiding principles and insight into universities as complex ecological systems The integration of these elements becomes the basis for proposing a variety of changes whose enactment would transform the university as we now know it Across North America making a comfortable place for ethnic minority students in higher education has become a hot topic Known as cultural diversity or educational equity this trend will likely play an important role in higher education over at least the next decade especially in light of on going demographic changes that will see Whites lose their population majority The result has been a growing literature the thrust of which is that policy and programming must be based on respect for difference This value is necessary but not sufficient to adequate planning and implementation of diversity policy and by itself may give rise to practice that is as likely to be harmful as helpful This book highlights and explores three additional elements judged crucial to diversity policy First clearer understanding of major ethnic minority groups second first principles upon which diversity policy should be grounded and third insight into the university as a complex ecological system Out of the integration of these elements emerges proposals for a variety of policy and programmatic changes that give substance to cultural diversity policy In turn full realization of diversity policy would involve the transformation of higher education as we now know it and together with like policies in other areas help to create the pluralistic society of the 21st century An important professional tool for administrators and faculty in higher education *Creating Learning Organizations Through Digital Transformation*
