Research in Education ,1971-12 **International Encyclopedia of Civil Society** Helmut K. Anheier,Stefan

Toepler,2009-11-24 Recently the topic of civil society has generated a wave of interest and a wealth of new information Until now no publication has attempted to organize and consolidate this knowledge The International Encyclopedia of Civil Society fills this gap establishing a common set of understandings and terminology and an analytical starting point for future research Global in scope and authoritative in content the Encyclopedia offers succinct summaries of core concepts and theories definitions of terms biographical entries on important figures and organizational profiles In addition it serves as a reliable and up to date guide to additional sources of information In sum the Encyclopedia provides an overview of the contours of civil society social capital philanthropy and nonprofits across cultures and historical periods For researchers in nonprofit and civil society studies political science economics management and social enterprise this is the most systematic appraisal of a rapidly growing field The Political Economy of Poverty, Equity and Growth: A Comparative Study Deepak Lal,H. Myint,1998-10-08 This wide ranging and innovative book synthesises the findings of a major international study of the political economy of poverty equity and growth It is based primarily on analytical economic histories of 21 developing countries from 1950 to 1985 but also takes account of the wider literature on the subject The authors take an ambitious interdisciplinary approach to identify patterns in the interplay of initial conditions institutions interests and ideas which can help to explain the different growth and poverty alleviation outcomes in the Third World Three different types of poverty are distinguished based on their causes and a more nebulous idea of equity in contrast to egalitarianism is shown to have influenced policy Since growth is found to be the major means of alleviating mass structural poverty much of the book is concerned with discovering explanations for policies which are found to be the most important influences on the proximate causes of growth Lal and Mynt also consider the available evidence on the role of direct transfers public and private in alleviating destitution and conjunctural poverty The Political Economy of Poverty Equity and Growth develops a novel framework for the comparative analysis of different growth outcomes This framework distinguishes between the different relative factor endowments of land labour and capital and between the different organizational structures of peasant versus plantation and mining economies It also differentiates between the polities of autonomous and factional states in the countries studied breaking the analysis down into further typological subdivisions and providing important new insights into

the differing behaviour of economies that are rich in natural resources and those with abundant labour These insights constitute a richer explanation for the divergent developmental outcomes in East Asia compared with Latin America and Africa The evidence collated is used to argue for the continuing relevance of the classical liberal viewpoint on public policies for development and to show why even so nationalist ideologies are likely to be adopted and lead to cycles of interventionism and liberalism The evidence is also used to provide an explanation for the surprising current worldwide Age of Reform

Prisoners of Reason S. M. Amadae, 2016-01-14 Is capitalism inherently predatory Must there be winners and losers Is public interest outdated and free riding rational Is consumer choice the same as self determination Must bargainers abandon the no harm principle Prisoners of Reason recalls that classical liberal capitalism exalted the no harm principle Although imperfect and exclusionary modern liberalism recognized individual human dignity alongside individuals responsibility to respect others Neoliberalism by contrast views life as ceaseless struggle Agents vie for scarce resources in antagonistic competition in which every individual seeks dominance This political theory is codified in non cooperative game theory the neoliberal citizen and consumer is the strategic rational actor Rational choice justifies ends irrespective of means Money becomes the medium of all value Solidarity and good will are invalidated Relationships are conducted on a quid pro quo basis However agents can freely opt out of this cynical race to the bottom by embracing a more expansive range of coherent action
