Education and the Social Order, 1940-1990 Brian Simon, 1991-01-01 **Education and the Social Order, 1940-1990**
Brian Simon, 1999 The fourth and final in the Studies in History of Education in England this volume examines the changes and developments in the British education system from the Second World War to the eve of the millennium Education has always been a battlefield and never more so than in Britain in the second half of the twentieth century Simon argues that educational policy usually reflects the outcome of a struggle between progressives who see reform as a first step towards social change and conservatives who prefer a stratified system which reflects existing social divisions It documents the changes that took place as the result of these battles it begins with the 1944 Education Act and the massive extension of educational opportunity that took place in the postwar period it then deals with the subsequent prolonged debates about comprehensive education and other measures of liberalisation during the 1960s and 1970s and it ends with the years of Conservative government the 1980s and 1990s when systematic attempts were made to reverse the advances that had been made during the earlier period Winner of the History of Education Society Prize 1991 92 Winner of the Standing Conference for Studies in Education Prize 1991 92 *Policy Issues in National Assessment* Patricia Broadfoot, 1993 This book is the work of the British Educational Research Association Assessment Policy Task Group who produced two of the four papers featured They all address the reasons behind current UK assessment policy and how it might be improved Brian Simon and the Struggle for Education Gary McCulloch, Antonio Fco Canales, Hsiao-Yuh Ku, 2023-09-21 This is the first full length study of the life and career of Brian Simon 1915 2002 leading Marxist intellectual and historian of education in twentieth century Britain Using documentary sources that have only recently become publicly available it reveals the remarkably broad range of Simon s life as student soldier and school teacher Communist Party activist and educational academic campaigner and reformer In a sympathetic biography that yet retains critical distance the authors analyse Simon s contribution to Marxism and the CP explore the influence of both on his work as a historian of education and trace the significance of his Marxist beliefs political associations and historical approach to the cause of educational reform In so doing they consider the full nature and limitations of Simon s achievements in his struggle for education Unlike many Marxist scholars he remained loyal to the CP in the 1950s which damaged his reputation as a public intellectual Nevertheless his support for comprehensive education helped to promote egalitarian educational reforms in Britain although he was later unable to provide sufficient resistance to the 1988 Education Reform Act and to a decline in the position of the comprehensive schools In all this the significance of Simon s family and especially his relationship with his wife Joan is to the fore Joan and Brian forged a formidable 60 year partnership in politics and the CP as well as in life that lasted until Brian s death in January 2002
 Schooling and Social Change Since 1760 Roy Lowe, 2021-02-21 Schooling and Social Change in England since 1760 offers a powerful critique of the situation of British education today and shows the historical processes that have helped generate

the crisis confronting policymakers and practitioners at the present time The book identifies the key phases of economic and social change since 1760 and shows how the education system has played a central role in embedding sustaining and deepening social distinctions in Britain Covering the whole period since the first industrialization it gives a detailed account of the development of a deeply divided education system that leads to quite separate lifestyles for those from differing backgrounds The book develops arguments of inequalities through a much needed account of the changes in education This book will be of great interest for academics scholars and post graduate students in the field of history of education and education politics It will also appeal to administrators teachers and policy makers especially those interested in the historical development of schooling

The TUC and Education Reform, 1926-1970 Dr Clive Griggs, Clive Griggs, 2013-09-05 This book covers a crucial period for the development of state education in Britain the advent of the comprehensive debate before and during the Second World War the War years themselves and the 1944 Education Act the post War Labour Government and Churchill's last government in a time of education expansion From the 1960s the focus shifted to questions of social deprivation and educational opportunities secondary school selection the debate on standards Robbins and higher education and the continuing theme of the dominance of public schools The book is divided into four sections which are then divided into chapters Each chapter takes as its main reference point a key issue within the chronological framework of the book e.g. resistance to secondary education for all politics and textbooks multilateral and technical schools pressure groups and the 1944 Education Act Churchill and the Conservatives Much new light is thrown on the topics by the author's use of new material and he has made a valuable contribution to the politics of education

Education for Democracy in England in World War II Hsiao-Yuh Ku, 2020-04-07 Education for Democracy in England in World War II examines the educational discourse and involvement in wartime educational reforms of five important figures Fred Clarke R H Tawney Shena Simon H C Dent and Ernest Simon These figures campaigned for educational reforms through their books publishing articles in newspapers delivering speeches at schools and conferences and by organizing pressure groups Going beyond the literature in this key period the book focuses on exploring the relationship between democratic ideals and reform proposals in each figure's arguments Displaying a variety of democratic forums for debates about education beyond parliament the book reinterprets wartime educational reforms from a different perspective and illustrates the agreements and contradictions in the educational discourse itself

Making of the 1944 Education Act Michael Barber, 2000-01-01 The 1944 Education Act was a crucial piece of British legislation one of the most important this century It was passed against a background of war and growing popular demand for social reform It provided a framework for the education service which remained largely intact for almost fifty years Since 1988 however with the introduction of a National Curriculum and competition between schools the workings of the Act have been largely dismantled In The Making of the 1944 Education Act Michael Barber presents a lively evaluation of the Act its background passage and effect fifty years after it was introduced He looks briefly at the

frustrated attempts at reform between the wars and how the upheaval of World War II created the right conditions for successful legislation The book then follows the passage of reform and quotes liberally from contemporary sources such as the Times Educational Supplement and Hansard to illustrate its narrative It is a fascinating history of educational policy and of British culture and politics towards the end of the war *The RoutledgeFalmer Reader in History of Education* Gary McCulloch,2005 Provides the reader with an impressive selection of articles on the history of education from a broad base including a new introduction from the editor **Education And Politics For The 1990s** Denis Lawton,2003-12-16 Examines the ideological differences between the education policies of the two main political parties in the UK and discusses the emergence of these differences within the context of the 1988 Education Reform Act It also looks at the world wide influence of the New Right politics on education Inclusive Education Felicity Armstrong,Derrick Armstrong,Len Barton,2016-01-08 First published in 2000 This book looks at inclusive education in the context of policy and practice in a number of different countries particularly in relation to children and young people of school age At the heart of the idea of inclusive education lie serious issues concerning human rights equal opportunities and social justice The papers in this book will hopefully contribute to stimulating further debate and dialogue over both the conceptualisation and understanding of a cross cultural approach to inclusion and exclusion *Sex Before the Sexual Revolution* Simon Szreter,Kate Fisher,2010-10-14 What did sex mean for ordinary people before the sexual revolution of the 1960s and 1970s who were often pitied by later generations as repressed unfulfilled and full of moral anxiety This book provides the first rounded first hand account of sexuality in marriage in the early and mid twentieth century These award winning authors look beyond conventions of silence among the respectable majority to challenge stereotypes of ignorance and inhibition Based on vivid compelling and frank testimonies from a socially and geographically diverse range of individuals the book explores a spectrum of sexual experiences from learning about sex and sexual practices in courtship to attitudes to the body marital ideals and birth control It demonstrates that while the era s emphasis on silence and strict moral codes could for some be a source of inhibition and dissatisfaction for many the culture of privacy and innocence was central to fulfilling and pleasurable intimate lives **Education, Work and Social Change** R. Simmons,R. Thompson,L. Russell,2014-06-17 Drawing on a longitudinal study of the lives of NEET young people this book looks beyond dominant discourses on youth unemployment to provide a rich detailed account of young people s experiences of participation and non participation on the margins of education and employment highlighting the policy implications of this research *Education and Economic Decline in Britain, 1870 to the 1990s* Michael Sanderson,1999-04-22 Since the 1870s the British economy has steadily declined from its position as the workshop of the world to that of a low ranking European power Michael Sanderson examines the question of how far defects in education and training have contributed to this economic decline By looking at issues such as literacy the quality of scientific and technical training the supposed anti industrial bias of public schools and the older universities the

neglect of vocational and technical training and the neglect of the non academic teenager Michael Sanderson demonstrates that education was far from the sole cause of economic decline but that its deficiencies have certainly played a part This book offers an accessible and concise analysis of a topic of current importance interest and debate and will be of interest to students and teachers of the history of education and its impact on British economic development in the twentieth century

Politics, Education and Social Change Agnieszka Gromkowska-Melosik, Inetta Nowosad, Aleksandra Boroń, Marzanna Farnicka, Marcin Gierczyk, 2025-01-20 The authors analyse macro level political decisions across various societies as well as individual actions and experiences to advocate for a more inclusive and effective education system capable of driving social change They consider relationships between politics education and social change in various contexts and dimensions The macro level of educational policy and politics is confronted with the micro realities of human biographies However the authors do not consider people who are influenced by political decisions as incapacitated mass Thus social change always results from these macro micro connections This interdisciplinary book includes themes related to political sciences education and sociology which resulted from the authors study of contemporary social and education phenomena It gives insight into interesting paradoxes and controversies

Social Policy: An Introduction Blakemore, Ken, Warwick-Booth, Louise, 2013-10-01 What are social policies How are social policies created and implemented Why do certain policies exist The fourth edition of this highly respected textbook provides a clear and engaging introduction to social policy The book has been thoroughly updated to include Changes in social policy introduced by the Coalition government Incorporation of an international perspective throughout as well as a new chapter The global social policy environment Updated pedagogy to stimulate thought and learning Comprehensive glossary Social Policy is essential reading for students beginning or building on their study of social policy or welfare The wide ranging coverage of topics means that the book holds broad appeal for a number of subject areas including health social policy criminology education social work and sociology This textbook has always been a useful teaching resource because it combines substantial and engaging analysis with stand alone extracts The new edition adds a chapter on global social policy updates on the Coalition Government and guides to what is in the book The added activities are well thought out and can be adapted or expanded to suit the needs of particular students Hedley Bashforth Teaching Fellow in Social Policy University of Bath UK Social Policy An Introduction now in its fourth edition and eleventh year will remain a core social policy text on reading lists across the country due to its well written and comprehensive nature Completely revised it has been updated and extended to reflect contemporary developments in social policy including the policy implications of the Coalition Government and now includes a chapter on global social policy environments reflecting the continued internationalisation of social policy debates Updated pedagogical features which include activities for the reader learning outcomes at the start of each chapter and detailed case studies throughout enhance this thought provoking and stimulating text Dr Liam Foster University of Sheffield UK This book provides as it states an

introduction to the field and does so by adopting a highly attractive pedagogic style that evidences at every turn a sensitivity to the approaches to learning of contemporary students. Although it is tailored to meet the needs of primarily first year specialist students it is equally suitable for those on other programmes who are taking an option in social policy. Because the book anticipates theoretical issues and debates and students will confront as they progress to a more advanced level it will also retain value as be a longer term reference resource. I will certainly be citing it on a second year core course I teach. It is immediately clear that a great deal of thought has been invested into designing this book. What Blakemore and Warwick Booth have produced is a clearly laid out and well structured analysis of impressive breadth that is a readily accessible learning instrument both for student and teacher. Importantly it provides numerous opportunities to experiment with new ways of approaching the teaching of the subject. Each chapter sets out clearly expressed learning outcomes with a fair balance of theoretical and empirical concerns. Visual displays in box material graphs and flow charts provides a most effective means for absorbing the large amount of ground covered. There is good incorporation of statistical material and up to date policy developments. Students are also encouraged to exploit useful links to internet and other media sites. Particularly attractive from a teaching point of view are the range of tasks set for the students which are aimed clearly at rapid capacity building. Chapters end by listing the key terms and concepts addressed to aid revision of material. This is repeated in the glossary at the end of the book. Most of the materials are derived from the British context but there is also a secondary focus on EU member states and beyond as well as a good chapter on global social policy. Steen Mangen, Department of Social Policy, London School of Economics and Political Science, UK. **Education, Equality and Human Rights** Mike Cole, 2022-08-12

The fifth edition of the market leading *Education Equality and Human Rights* has been fully updated to reflect economic, political and cultural changes in the UK including the impacts of Brexit and Covid 19. It considers the great changes we are witnessing in recent years such as climate change, emergency pandemics, the Fourth Industrial Revolution and their interrelationships. Written by world experts in their respective fields, each of the five equality issues of gender, race, sexuality, disability and social class is covered in their own right as well as in relation to education. Key issues explored include human rights, equality and education, women and equality historically and now, gender, education and social change, race and racism through history and today, racism and education from Empire to Johnson, sexualities, identities and equality challenges in teaching and learning about sexuality and homo and trans phobia in schools, disability, equality as the last Civil Right, developing inclusive education and governments resistance, social class, neoliberal capitalism and the Marxist alternative, selective schooling, mystifying social class, neoliberalism and alternatives. With an uncompromising and rigorous analysis of equality issues and a foreword from Peter McLaren addressing challenges to democracy in the US, this new edition of *Education Equality and Human Rights* is an essential and contemporary resource across a wide range of disciplines and for all those interested in education, social policy and human rights. **Education, Reform and the State** John Furlong, Robert

Phillips,2002-11-01 The last quarter of the twentieth century was a very important period in history of education Beginning with the so called Great Debate the period witnessed intense public and political interest in educational issues culminating in an almost unprecedented amount of education related legislation the most symbolic of which was the Education Reform Act of 1988 Some scholars have rightly claimed that the education system was transformed during this period pointing to major changes in the ways in which schools further education colleges and universities were organised managed and controlled Others have claimed that these changes altered the power relationships which had underpinned the education system since 1944 Given the sheer scale and pace of the education policy related reforms of this period this edited collection brings together some of the leading scholars in education to reflect on the major legislative and structural changes in education over the past few decades Published in the year of the twenty fifth anniversary of Callaghan s Ruskin College speech in 1976 it provides a definitive contemporary history of education policy in the late twentieth century The editors bring together some of the leading educationalists to reflect on the major legislative and structural changes in the field over the last twenty five years The book will be of use to education students on undergraduate and postgraduate courses as well as students and academics working in social policy *The Comprehensive Public High School* G. Sherington,Craig Campbell,2006-02-04 This book traces the decline of the public comprehensive high school New educational markets emphasized school diversity and parental choice rather than social equity through common schooling and they were criticized for declining standards The book also considers government education policies and their regional manifestations *Routledge International Companion to Education* Miriam Ben-Peretz,Sally Brown,Bob Moon,2004-04-28 The Routledge International Companion to Education addresses the key issues underpinning the rethinking and restructuring of education at the beginning of the new millennium The volume contains over fifty major contributions exploring a wide range of issues including philosophy of education the economics and resourcing of education testing and assessment current issues and future prospects standards multiculturalism anti racism computers in classrooms mother tongue education civics and moral education Each chapter gives a contemporary account of developments in the field and looks to the future and the directions that new activity and inquiry are likely to take All the chapters are written from an international perspective
