**Leadership for Change and School Reform** Kathryn Riley,Karen Seashore Louis,2013-01-11 School reform is a top priority for governments today This timely and challenging book edited by leading international researchers Kathryn Riley and Karen Seashore Louis offers a rich comparative perspective on leadership for change and school reform Contributors

form North America Europe and Australia demonstrate how school leadership is influenced by global pressures differing national and state contexts and local concerns They illustrate the limitations of reform initiatives which focus on school leaders to the exclusion of the many other organisations which affect school such as national and local governments professional associations and school communities This book raises some important questions such as How can school leaders create intelligent thinking schools How can leadership and learning be linked together What are the characteristics of effective local education authorities and school districts What is the role of teacher organisations in educational reform and change What happens if businesses teachers parents and local communities have different views of what makes a good school The text illustrates the ways in which leadership is rooted in learning and identifies new directions for school leadership It challenges conventional notions of leadership offering an expanded view which sees leadership just as an individual role based function but as a network of relationships among people structures and cultures This lively and provocative book should be read by all those interested in education reform

### **Educational Leadership Clive**

Dimmock, Allan Walker, 2005-06-03 A highly recommendable and powerful work I have found this book to be both a revelatory mirror on past events and an inviting window to future prospects I am certain that it will be of equal or greater value to all those involved and interested in the tangled complexities and inherent rewards of educational leadership particularly within international or cross cultural contexts Daniel H Jarvis International Review of Education Clive Dimmock and Allan Walker's books is a valuable addition to the overcrowded literature on leadership This is a useful and important book because citizenship globalization and the tensions with nationality should be the concern of all who lead any school even monofaith monoethnic and monolingual schools Tim Brighouse TES Friday The authors offer a rigorous and systematic analysis based on careful definition illustration and discussion which demonstrates the importance of understanding culture leadership and their interaction in different contexts in doing so they provide a powerful antidote to the simplistic export of ideas and lay foundations for a more sophisticated conceptual framework for the study of educational leadership John West Burnham International Leadership Centre University of Hull This key text in educational leadership focuses on the significance of the context and culture of schools The book addresses the growing recognition of cultural differences between societies and the resultant differences in schooling It also deals with vital issues relating to multicultural education and the leadership of multicultural schools Drawing on their first hand experience the authors explore the differences evident in classroom teaching and learning as well as organizational leadership and management aspects of schools They show how such differences can make over reliance on Anglo American approaches misleading ineffective and restrictive Key features of the book include a methodology to support the emerging field of international and comparative educational leadership and management in depth comparative analysis of Anglo American and Asian schooling and educational management the leadership of multi cultural schools This book is essential reading for professionals and students of educational leadership

and management as well as administrators      Learning to Read Critically in Educational Leadership and Management Mike Wallace, Louise Poulson, 2003-01-28 In Learning to Read Critically in Educational Leadership and Management Mike Wallace and Louise Poulson provide students with an eminently usable text. Although the theoretical underpinnings and conceptualizations of leadership issues invariably differ, this book provides a lucid guide to plumbing their ambiguities. Educational Review This is a book that should be regarded as essential reading for those students following courses in education and social policy, particularly at masters level. International Journal of Educational Management I bought this book just a few days ago and I was surprised to realise the simple and yet scientific way it is written. I have started my postgraduate studies in Educational Management and this book will definitely make things easier. I would like to cordially thank Professor Wallace and Mrs Louise Poulson for this book which will help the majority of the students who enter the labyrinth of postgraduate research and surely need a kind of instruction manual to start. Amazon Review One of the most useful books that I have come across for my students. Professor Les Bell, Director of Doctorate of Education, University of Leicester. Very impressed with the first chapter. Have recommended it to our research department for use with our graduate students. Thorough and practical. Philip Hallinger, Executive Director of the College of Management, Mahidol University, Thailand. This unique book combines the teaching quality of a text with exemplary reports of small scale and larger research studies as well as a literature review by leading academics. Part One shows how to develop as a critical reader and self-critical writer of literature and how to apply these insights in planning a written assignment, dissertation or thesis. The book provides a framework for the critical analysis of any text and shows how to incorporate this in a literature review. Part Two presents accounts of leading edge research offering insights into key issues in the field of educational leadership, management and administration. The reader is invited to practice literature review skills by applying the critical analysis questions to any research report. Readers can use the models of good research practice presented here in their own design of an investigation for a dissertation or thesis. Part Three shows how a high quality literature review may be constructed and addresses a key issue in the field. Contributors include Sharon Kruse, Karen Seashore, Louis Kenneth Leithwood, Phillip Hallinger and Ronald Heck, Derek Glover and Rosalind Levacic, Ray Bolam. This book will be useful to postgraduate students on research based masters and doctorate courses in educational leadership, management and administration. It is relevant for students doing research training in the social sciences and humanities. It can also be used as a teaching resource by supervisors of masters and doctorate level students. This series, edited by Mike Wallace, supports research based teaching on masters and taught doctorate courses in the humanities and social sciences fields of enquiry. Each book is a three in one text designed to assist advanced course tutors and dissertation supervisors with key research based teaching tasks and aims to develop students' critical understanding of research literature, increase students' appreciation of what can be achieved in small scale investigations similar to those which they undertake for their dissertation, present students with major findings

generalisations and concepts connected to their particular field

### **School Leadership - International Perspectives**

Stephan Huber, 2009-12-24 Recent research into school effectiveness has corroborated the theory that the school leader plays a pivotal role making their school a successful institution and is most often cited as the key factor in a school's development. Reflecting the importance it is given in today's education landscape, this book explores the latest trends in school leadership from both theoretical and practical perspectives. Each chapter provides insight into an aspect of current research with detailed case studies coming from as far afield as Hong Kong and Canada. In the context of the ever increasing burden of responsibility placed on education management to safeguard and enhance the quality of education, they provide school leadership is now a core concern of policy makers. In addition, most countries are undertaking fundamental education reforms that will have a major influence on the nature of school leadership. Offering the most up to date research on this central issue, this book will both inform and shape the debate.

*Second International Handbook of Educational Leadership and Administration* Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education. Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980s combined with a widespread belief in leadership as the single most powerful contribution to such improvement. The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well. During the two year period during which this current handbook was being written, activity in the realms of school leadership, school improvement and leadership development gained further momentum. The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development.

**School Leadership and Administration** Allan Walker, Clive Dimmock, 2012-11-12 This text calls for a broader approach to comparative educational administration, one which uses culture as the principle means of analysis. The articles collected by Allan Walker and Clive Dimmock detail the educational practices and outcomes of other systems while taking into account the mediating influence of culture. In this way, these essays stress the specific aspects of the cultures studied and map out common ground for the study of administrators' values, beliefs and actions.
