EDUCATIONAL ADMINISTRATION Theory and Practice Edgar Leroy Morphet, 1959 **Educational Management' 2000 Ed.** G. Aquino, 2001 **State School Administration** Ellwood P. Cubberley, 1927 Mastering Theories of Educational Leadership and Management Donnie Adams, 2018-10-08 The field of Educational Leadership and Management originated and grew to maturity in the Western societies of the USA UK and Australia However since the mid 1990s scholars in east Asia have asserted the need to ground leadership theories and practices in the local contexts in which school leaders practice Mastering Theories of Educational Leadership and Management is one of the first volumes published which seeks to do this The edited chapters illustrate and elaborate how perspectives on key concepts and theories of educational leadership are being interpreted and enacted in East Asian societies By doing so the book makes a valuable contribution which will hopefully reduce the gap between theories as explained by Western scholars and practices as enacted in East Asian societies Professor Dr Philip Hallinger **Handbook of Research on the Education of School Leaders ,**

International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, Judith Chapman, P. Corson, P. Hallinger, Ann Hart, 2012-12-06 EDITORS This introduction to the International Handbook of Educational Leadership and Administration describes some of the motivation for developing the book and several assumptions on which is based much of the work represented in its 31 chapters A synopsis of the contents of those chapters is also provided SOME KEY ASSUMPTIONS It is sometimes suggested that the search for an adequate understanding of leadership is doomed to fail After all there is little evidence of agreement about the concept in spite of prodigious efforts dating back hundreds if not thousands of years Such a view is captured for example in Bennis observation that Of all the hazy and confounding areas in social psychology leadership theory undoubtedly contends for top nomination Probably more has been written and less is known about leadership than any other topic in the behavioural sciences 1959 page 259 We do not find this state of affairs discouraging nor entirely accurate and of course it did not prevent Bennis from proceeding either One reason for our desire to continue in the face of such discouraging words is that a great deal of leadership research aspires to develop a general

theory a theory which applies to all or most domains of organized human activity This aspiration inevitably produces decontextualized and therefore abstract categories of practice Howard Gardner s 1995 depiction of leadership as story telling is a case in point **Initiation of Educators into Educational Management Secrets** Christos Saitis,Anna Saiti,2017-08-18 This book provides a comprehensive method for learning modern management processes and applying those methods to improve leadership in educational settings The authors include case studies and techniques to solve a variety of managerial problems so that members of the educational community may improve their abilities and skills in a range of related disciplines including strategic planning effective decision making time management management conflict strategies oral communication management strategies for school crises and the development of good relations and a cooperative spirit

Drayton Strayer,Edward Lee Thorndike,1913 In this volume Professors Strayer and Thorndike present materials of essential value that relate to educational administration from various articles and monographs in such a compact form that every educational administrator can have a copy for his desk It permits also an effective use of these materials for class discussion since the book can be in the hands of the students as a reference text The volume does not attempt to show the relations of the various topics discussed to the field of education in general or to show general administrative perspective It is expected that the educational administrator is already familiar with these matters and that where the book is used as a text comment and perspective will be supplied by lectures and readings from other books already in the field **Ethical Foundations for Educational Administration** Eugenie Samier,2003-12-16 Christopher Hodgkinson is one of the most important contributors to the field of educational administration This collection of essays open up the philosophical foundations of ethical educational administration by reviewing his writings and exploring the ethical theories of major philosophers as they apply to administration and leadership Ethical Foundations of Educational Administration is published in honour of the work of

Christopher Hodgkinson It is divided into two sections The first comprises biographical essays and a critical evaluation of Professor Hodgkinson's work focusing on his personal and intellectual contributions to a moral theory of educational administration and leadership The second section looks at how his moral philosophy can inform administrative practice The work of a broad range of philosophers is discussed from the pre 20th century theories of Aquinas Adam Smith and Kant to the pragmatists Peirce James and Dewey Heidegger MacIntyre Bourdieu Churchland and Thagard Christopher Hodgkinson's definition of administration as philosophy in action is now famous within the field This collection illustrates the essential truth of that maxim showing that moral philosophy approached in the spirit promoted by Hodgkinson has both practical and critical purpose when brought to bear upon educational administration and leadership *Handbook of Research on the Education of School Leaders* Michelle D.
