Economic Development Of Italy Since 187:

The Oxford Handbook of the Italian Economy Since Unification Gianni Toniolo, 2013-01-04 The Oxford Handbook of the Italian Economy Since Unification provides for the first time a comprehensive quantitative new economic history of Italy

Italy's Economic Revolution Saskia T. Roselaar, 2019-09-19 The Roman conquest of Italy in the Republican period from c 400 to 50 BC led to widespread economic changes in which the conquered Italians played an important role Italy's Economic Revolution analyses the integration of Italy during this period and explores the interplay between economic activities and unification in its civic legal social and cultural senses On one hand it investigates whether Italy became more integrated economically following the Roman conquest and traces the widely varying local reactions to the globalization of the Italian economy on the other it examines whether and how economic activities carried out by Italians contributed to the integration of the Italian peoples into the Roman framework Throughout the Republican period Italians were able to profit from the expansion of the Roman dominion in the Mediterranean and the new economic opportunities it afforded which led to gradual changes in institutions culture and language through overseas trade and commercial agriculture they had gained significant wealth which they invested in the Italian landscape and they were often ahead of Romans when it came to engagement with Hellenistic culture However their economic prosperity and cultural sophistication did not lead to civic equality nor to equal opportunities to exploit the territories the Italians had conquered under Rome's lead Eventually the Italians rose in rebellion against Rome in the Social War of 91-88 BC after which they were finally granted Roman citizenship This volume investigates not only whether and how economic interaction played a role in this civic integration but also highlights the importance of Roman citizenship as an instrument of further economic political social and cultural integration between Romans and Italians

The Political Economy of Mediterranean Europe Luis Cárdenas, Javier Arribas, 2024-08-19 Applying the demand led growth models framework this book examines the recent macroeconomic performance of the key Mediterranean economies Italy Spain Portugal and Greece including the responses to the economic and financial crisis 2008 the debt crisis 2010 and the COVID 19 crisis 2020 As the book explains the central idea of the growth model approach is that the widespread breakdown of the old labor institutions such as the existence of strong unions centralized wage bargaining and the participation of the workforce in corporate governance has led to a fall in the wage share and a rise in inequality in most advanced economies Thus the two main contemporary growth models are usually characterized as debt led and export led In both models the same processes that cumulatively drive growth such as over consumption also simultaneously undermine the foundations on which this expansion takes hold The book examines the extent to which these processes hold true for Mediterranean economics and explores the key factors of their economies including productive capacity growth of aggregate demand components wage led or profit led regimes personal income distribution the foreign sector the financial sector labor relations the labor market and welfare states In particular the book examines whether policy responses and

state interventions in recent years have led to a divergence between the economies To what extent are these changes transforming the existing growth models Are we facing a change in the Mediterranean model or the disappearance of the Mediterranean bloc as a whole This book marks a significant addition to the literature on the economics and politics of Southern Europe and the fields of political economy comparative economics and macroeconomics more broadly *European Integration Since the 1920s* Mark Hewitson, 2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re examines why the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of citizens As a consequence supranational bodies such as the European Commission have been accompanied and often overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in important respects as a type of confederation The volume addresses a series of large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique experiment of the European Union **An Economic History of Regional Industrialization** Bas van Leeuwen, Robin C.M. Philips, Erik Buyst, 2020-10-22 This book offers a comprehensive study of regional industrialization in Europe and Asia from the early nineteenth century to the present Using case studies on regional industrialization the book provides insights into similarities and differences in industrialization processes between European Eurasian and Asian countries Important factors include the transition from traditional to modern industrial production industrial policy agglomeration forces market integration and the determinants of industrial location over time The book is an invaluable reference that attempts to bridge the fields of economic history political history economic geography and economics while contributing to the debates on economic divergence between Europe and Asia as well as on the role of economic integration and globalization The Political Economy of Uneven

Italy Britannica Educational Publishing, 2013-06-01 It is almost impossible to think about Italy without recalling its Renaissance art masterpieces its spectacular landscapes or its widely loved cuisine Although these combined elements hint at a united Italian culture Italy is truly a country comprised of individual regions each with their own identities histories and traditions Readers will follow Italy's trajectory from a land of disparate barbarian kingdoms to a republic discovering along the way the glories of the Medici period the factors influencing Italy's development into one of the world's most industrialized countries and the diverse society that makes up its population *Economic Policy in Socialist Yugoslavia* Rudolf Bicanic, 2010-06-10 This book provides a lucid survey of the economic development of Yugoslavia from 1918 to the 1970s **International Commerce and Reconstruction** Elisha M. Friedman, 1920 *Public Choice Analysis in Historical Perspective* Alan Peacock, Alan T. Peacock, 1997-07-24 In this volume Sir Alan Peacock one of Britain's most noted public economists poses the question as to whether the history of economic thought is an essential part of the training of public finance economists He argues that the perspective gained by studying the origins of public choice analysis can offer an important stimulus to scientific progress The first lecture analyses the increasing popularity in recent years of the modernist anti historical point of view The second criticises those theories of growth in government expenditure which ignore the political process The third lecture draws on Adam Smith and David Hume to extend the conventional economic model of bureaucracy In the final lecture Peacock considers the problem of controlling public sector growth and points to ways of overcoming them The book ends with short commentaries by seven public economists **To the Threshold of Power, 1922/33** MacGregor Knox, 2007-09-10 To the Threshold of Power is the first volume of a two part work that seeks to explain the origins and dynamics of the Fascist and National Socialist dictatorships It lays a foundation for understanding the Nazi and Fascist regimes through parallel investigations of Italian and German society institutions and national myths the supreme test of the First World War and the post 1918 struggles from which the Fascist and National Socialist movements emerged It emphasizes two principal sources of movement the nationalist mythology of the intellectuals and the institutional culture and agendas of the two armies especially the Imperial German Army and its Reichswehr successor The book's climax is the cataclysm of 1914-18 and the rise and triumph of militarily organized radical nationalist movements Mussolini's Fasci di combattimento and Hitler's National Socialist German Workers Party dedicated to the perpetuation of the war and the overthrow of the post 1918 world order **Economic Policy, Crisis and Innovation** Maria Cristina Marcuzzo, Antonella Palumbo, Paola Villa, 2019-11-21 This book is a Festschrift to Annamaria Simonazzi and embraces the themes that she has contributed to over the years through her insightful and inspiring works It brings together contributions from a number of distinguished European economists which pay tribute to her by engaging in a dialogue with her research simultaneously

reflecting on the process of growing economic disintegration in the European Union its causes and its possible remedies The book shows the deep interrelations between macroeconomic issues and the social sphere and points to the need to rethink the very foundations of European economic policies as an effective antidote to growing imbalances and disintegration In particular the effects of austerity are assessed alongside the dimensions of inequality gender discrimination poverty and unemployment broadening the perspective also beyond the Eurozone The authors envision a progressive society in which investments in research and intelligent industrial policies govern the processes of technological change and drive the economy towards a more efficient and more equal model of development characterized by high productivity and high wages While some chapters deal directly with policy issues policy suggestions and proposals are scattered throughout the whole book This volume will appeal to academics economists and policy makers interested in understanding the policy response of European institutions to the challenges posed by both the Great Recession and subsequent developments in the European economies The book is written in an engaging and accessible way and the themes are broad enough to generate interest from the international public

A History of Modern Italy Anthony L. Cardoza, 2019 *A History of Modern Italy* addresses the question of how Italy's modern history from its prolonged process of nation building in the nineteenth century to the crises of the last two decades has produced a paradoxical blend of hyper modernity and traditionalism and thus made the country different in the broader context of Western Europe The text explores how Italians have experienced seismic shifts in their social and economic landscape over the past two centuries while simultaneously maintaining older cultural norms social practices and political methods As a second objective the book showcases a narrative of modern Italy that incorporates and blends the research findings and methodological insights of the new quantitative and cultural historical scholarship of the past two and a half decades In doing so it chronicles the regime changes that have taken the country from a Liberal monarchy through the Fascist dictatorship to a Democratic Republic while also delving into the simultaneous economic and social history of the nation through these periods

Child Poverty and Deprivation in the Industrialized Countries, 1945-1995 Giovanni Andrea Cornia, Sheldon Danziger, 1997 The authors in this volume utilize a common analytical framework to evaluate how economic family structure and public policy changes affected the well being of children in the industrialized countries in the West and the East from the end of the Second World War to the mid 1990s Throughout the industrialized world the living standards and social well being of children improved remarkably over these five decades But the quarter century golden age that followed the Second World War gave way to a period of stagnation after the early 1970s Many of the negative developments of the past two decades could not have been easily prevented because of the profound structural changes that have affected all industrialised economies and the profound political changes that have affected the former Soviet Bloc Nonetheless adverse or neglectful social policies share some of the blame for the recent unfavourable changes in child well being The evidence presented suggests that given current economic prospects and family structures

further weakening of social policies targeted at children could erode much of the progress of the past fifty years *Private Foreign Investment and Economic Development* R. Vedavalli, 1976-09-02 Monograph on the role of multinational enterprise foreign investments in the industrial development of the petroleum industry in India examines the impact on pricing distribution industrial production profitability the balance of payments etc and explores issues relating to joint ventures and the growth of the public sector aided by the role of USSR Bibliography pp 202 to 219 map and statistical tables *Women at Work in Italy (1750-1950)* Manuela Mosca, 2024-09-23 This book reconstructs the economic thought of Italian women who produced written sources and of those whose only legacy was their actions The conceptual tools of economic history and the history of economic thought alike are used to reveal the economic ideas of women overlooked by historiography in four fields namely as entrepreneurs workers educators and politicians As for the entrepreneurs the book examines the businesswoman Isabella De Mari Doria eighteenth century and other figures active in both the industrialized and the informal sectors in the nineteenth century The important issues of female employment and wage discrimination based on gender are analyzed taking into account the debates of the period In turn the role of women in economic education in the first half of the twentieth century is reconstructed through the figure of Aurelia Jozs an educational entrepreneur who trained female agricultural entrepreneurs managers and teachers and by exploring the presence of women at universities both as students of economics and as educators and researchers Lastly the book takes a closer look at women involved in politics who dealt with economic issues the socialist Anna Kuliscioff the fascist Margherita Grassini Sarfatti and the 21 women who took part in the Italian Constituent Assembly in June 1946 Given its scope the book appeals to scholars and students of the history of economic thought economic history and women s studies **Public Affairs Information Service Bulletin** ,1922 **European Welfare Policy** Vic George, Peter Taylor-Gooby, 1996-05-01 This broad and accessible text examines one of the most crucial issues facing western governments today how to raise sufficient funds to meet the rising aspirations of their electorate for more and better welfare services Looking at seven European countries representing different policy traditions government ideologies and levels of economic affluence it discusses health social security housing personal social services and education policies against a background of economic demographic and familial change **The Europa International Foundation Directory 2023** Europa Publications, 2023-07-27 This fully revised directory of international foundations trusts charitable and grantmaking NGOs and other similar non profit institutions provides a comprehensive picture of foundation activity on a worldwide scale Now in its 32nd edition The Europa International Foundation Directory includes Information on some 2 700 organizations organized by country or territory including details of funding priorities and projects geographical area of activity principal staff and contact details Details of co ordinating bodies and centres that assist foundations grantmaking organizations and other NGOs Bibliography Comprehensive index section This new edition has been revised and expanded to include the most comprehensive and up to date information on this growing sector **Encyclopedia of Historians and**

Historical Writing Kelly Boyd, 2019-10-09 The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like Jürgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies
