## **Economic Policy Issues For The Next Decade:**

*Economic Policy Issues for the Next Decade* Karl Aiginger, G. Hutschenreiter, 2013-03-09 There are several reasons why it has become important to rethink economic policy. Out of the European perspective it is the new currency, the enlargement towards Central and Eastern European countries, the sluggish growth and the end of productivity convergence towards the USA and the insufficient creation of employment. From the transatlantic perspective, increasing differences in the economic policy and the potential rise of conflicts between Europe and the USA for example in trade competition and health issues are important. The current volume touches most but not all of these topics. It starts with the overview by Joseph Stiglitz on policy issues. Then macroeconomics policy is discussed, followed by the problem of an ageing society and European enlargement. Differences between Europe and the USA are large in taxation and in the role of public finance. The relative competitiveness of countries as well as of Europe will be decided by investments into new technologies and progression towards the Science Based Economy. In the final section, the role of economists in shaping the economic agenda and giving policy advice is discussed.

Committee on Foreign Relations. Subcommittee on African Affairs, 1976      **Bridging The Pacific** C. Fred Bergsten, Gary Clyde Hufbauer, Sean Miner, 2014-10-28 The terrain of the world trading system is shifting as countries in Asia, Europe and North America negotiate new trade agreements. However, none of these talks include both China and the United States, the two biggest economies in the world. In this pathbreaking study, C. Fred Bergsten, Gary Clyde Hufbauer and Sean Miner argue that China and the United States would benefit substantially from a bilateral free trade and investment accord. In the process, they contend, each country would also achieve progress in addressing its internal economic challenges, such as the low saving rate in the United States. Achieving greater trade and investment integration could be accomplished with one comprehensive effort or through step by step negotiations over key issues. The authors call on the United States to seek liberalization of China's services sector as vital to securing an agreement, and they explain that such contentious matters as cyber espionage and currency manipulation be handled through parallel negotiations rather than in the agreement itself. This is an important study of the benefits and difficulties of a complex matter that could yield dividends to the two economies and help stabilize the security and well being of the rest of the world.      *The Economic Rise of East Asia* Linda Glawe, Helmut

highlights probable developments in Britain's system of industrial relations into the 1990s. It also provides a basis for further and detailed analysis and debate of issues central to the nation's future. Written by distinguished scholars in their respective fields, the three main sections give reviews from three contrasting traditions: mainstream industrial relations, industrial sociology, and management and labour economics. These accounts are highly complementary in the ways in which, in each and every case, issues of collective bargaining, managerial strategy, and union response, and the behaviour of governments are all set against a broad backdrop of economic, political, and social changes. The authors see the ultimate outcome as depending greatly on the policies and types of action of organised labour, managements, and governments, and possibly of wider social movements as well. This book will be an essential read for scholars and researchers of labour economics, industrial sociology, economics, and public policy.

**Policy Concertation and Social Partnership in Western Europe** Stefan Berger, Hugh Compston, 2002-02. Policy concertation, the determination of public policy by means of agreements struck between governments, employers, and trade unions, continues to thrive in Western Europe despite the impact of liberalizing trends that were expected to lead to its demise. This volume brings together a team of 23 experts with the aim to undertake paired historical and political studies of policy concertation in ten West European countries which were then subjected to systematic comparative analysis. It shows that overall the incidence of broad policy concertation in Western Europe can be explained by the changing configurations of just three variables.
