Benchmark Input-output Accounts of the United States, 1992 ,1998      *The 1982 Benchmark Input-output Accounts of the United States* ,1992      *Measuring the Government Sector of the U.S. Economic Accounts* National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Committee on National Statistics,1998-07-10 This report had its origin in a Committee on National Statistics workshop in November 1993 one of a series on improving economic statistics jointly sponsored by the Bureau of Economic Analysis BEA and the Bureau of the Census of the U S Department of Commerce The focus of the workshop was on revising the presentation of the government sector in the U S economic accounts to bring it more into line with the international System of National Accounts SNA and current data collection capability to enhance information about the public sector and to make the U S accounts more comparable to those of other countries      **Nature, Economy and Society** Nilanjan Ghosh,Pranab Mukhopadhyay,Amita Shah,Manoj Panda,2015-09-01 This book presents an enquiry into the interface between nature economy and society which is still in its early stages notwithstanding the commendable progress and advances made in the field of environmental and natural resource economics within the ever expanding boundaries of economics as a discipline It further delineates the evolution of an inter disciplinary framework for analyzing the status the future goals mechanisms and policy instruments that can help move towards a more ecologically sustainable economically beneficial and

socially just future A pre requisite for preparing a comprehensive and coherent framework involves unfolding the multiple layers of interconnectedness between the three systems nature economy and society each of which has its own internal consistencies as well as externalities Against this backdrop the book presents scholarly contributions that focus on four broadly defined building blocks namely i accounting for ecosystems services for life and human well being ii impacts of economic growth on ecosystems iii social norms equity and governance and iv alternative approaches to green and socio economic systems The analyses presented by some of the most eminent national and international scholars address the major environmental challenges that nations around the world face today and consider which specific policy directions at the international and national level are needed In particular the choices India and South Asia now face as development and environment both need to be addressed adequately touch on many of these challenges

**The New System of National Accounts** John W. Kendrick, 2012-12-06 National income estimates date back to the late 17th century but only in the half century since the Second World War have economic accounts developed in their present form becoming an indispensable tool for macroeconomic analysis projections and policy formulation Furthermore it was in this period that the United Nations issued several versions of a system of national accounts SNA to make possible economic comparisons on a consistent basis The latest version SNA 1993 published in early 1994 occasioned this collection of essays and commentaries The three chief objectives of the volume are to enhance understanding of socioeconomic accounts generally and of SNA 1993 in particular to offer a critique of SNA 1993 including constructive suggestions for future revisions of the system making it even more useful for its national and international purposes and to serve as a textbook or book of readings in conjunction with SNA 1993 for courses in economic accounts
