Regional Inequality in Spain Alfonso Diez-Minguela, Julio Martinez-Galarraga, Daniel A. Tirado-Fabregat, 2018-12-28 This book traces regional income inequality in Spain during the transition from a pre industrial society to a modern economy using the Spanish case to shed further light on the challenges that emerging economies are facing today. Regional inequality is currently one of the most pressing problems in the European Union and this text presents a novel dataset covering 150 years to analyse long run trends in regional per capita GDP. Spatial clustering and a new economic geography approach also contribute to the historical analysis provided which points to the role played by spatial externalities and their growing relevance over time. To identify the presence of spatial dependence is crucial not only for getting a better understanding of distribution dynamics but also for economic policy purposes. What are the potential causes behind the disparities in regional per capita income and productivity? The authors answer this by comparing results with evidence available for other countries chiefly France Italy and Portugal but is of global relevance.

Effects of Financial Globalization on Developing Countries Mr. Ayhan Kose, Mr. Kenneth Rogoff, Mr. Eswar Prasad, Shang-Jin Wei, 2003-09-03 This study provides a candid systematic and critical review of recent evidence on this complex subject Based on a review of the literature and some new empirical evidence it finds that 1 in spite of an apparently strong theoretical presumption it is difficult to detect a strong and robust causal relationship between financial integration and economic growth 2 contrary to theoretical predictions financial integration appears to be associated with increases in consumption volatility both in absolute terms and relative to income volatility in many developing countries and 3 there appear to be threshold effects in both of these relationships which may be related to absorptive capacity Some recent evidence suggests that sound macroeconomic frameworks and in particular good governance are both quantitatively and qualitatively important in affecting developing countries experiences with financial globalization
