Hardesty, 2015-04-25 Learn to find the happiness that is natural to you and enjoy better relationships better health more success and a longer life The peculiar thing about us humans is we spend a lot of time working to find people and things that will make us happy In fact we seem to spend the majority of our time doing this However there is no guarantee that any of this effort will work There are lots of people who have hordes

of people around them and who have lots of things but have been unable to make themselves happy The truth is happiness can be had with little effort Have you ever been happy for no reason at all Of course you have Without anything changing in life happiness just appears We see it in young children all the time In fact we expect to see it in children If you happen to ask a smiling child why he or she is so happy at best the answer may be Because For an adult this may be an unsatisfying answer but for the child it is the truth happiness exists just because As we age we seem to lose touch with happiness for no reason at all We see a world where everyone is striving for stuff striving for popularity striving striving striving The natural fount of happiness we once enjoyed disappears as we join them However that happiness is not gone All that happened is we lost our connection to it This book is about recovering that connection We all grow up believing that if we work hard and if we are good people we will enjoy good relationships with others good health success and a long life Obviously this is not true There are a lot of rich old people who are not happy What we have what we do and the other circumstances of our lives do not provide authentic happiness Instead happiness comes from inside of us and all by itself enables us to have secure relationships good health more success and longer lives So what is the secret of being happy Being happy is a little like flipping a switch When it s on you are happy and when it s off you are not It s so easy How else can you explain being happy for no reason What you need to do is learn to turn it on and keep it turned on This book discusses seven practices that help you do that There is a lot of wisdom available about how to be happy Most of it is thousands of years old but some is quite new The seven practices we will look at incorporate this wisdom to help you learn how to turn on happiness in your life This kind of happiness does not require changing anything in your life All you have to do is learn to turn it on

From Animals to Animats 8 Stefan Schaal, 2004 New research on the adaptive behavior of natural and synthetic agents Power and Influence Richard Corry, 2019-07-31 The world is a complex place and this complexity is an obstacle to our attempts to explain predict and control it In Power and Influence Richard Corry investigates the assumptions that are built into the reductive method of explanation the method whereby we study the components of a

complex system in relative isolation and use the information so gained to explain or predict the behaviour of the complex whole He investigates the metaphysical presuppositions built into the reductive method seeking to ascertain what the world must be like in order that the method could work Corry argues that the method assumes the existence of causal powers that manifest causal influence a relatively unrecognised ontological category of which forces are a paradigm example The success of the reductive method therefore is an argument for the existence of such causal influences The book goes on to show that adding causal influence to our ontology gives us the resources to solve some traditional problems in the metaphysics of causal powers laws of nature causation emergence and possibly even normative ethics What results then is not just an understanding of the reductive method but an integrated metaphysical worldview that is grounded in an ontology of power and influence
