Grad School Life Jacqueline M. Kory-Westlund, 2024-04-02
Grad school isn't easy. It's even less easy when you're also managing a second job, a family, or depression, or when you are a first-generation student or if you come from an underrepresented group or a lower socioeconomic status background. Grad students are overworked, overstressed, and over it. Most grad school advice books focus on the professional side: finding funding, managing research and teaching, and applying for academic jobs. But students today face a difficult job market. Only a handful will obtain coveted tenure-track professorships, so they need alternative career prep. Plus, grad school is only one part of your life. And with an average age of 33 years, today's students are juggling far more than school. That's where this book comes in. It will help you keep up a personal life, make the most of your time, and prepare for your career, whether in academia or beyond. This pragmatic book explains how to persevere through the grad school long haul, covering challenges both on and off campus. It shares candid, specific advice on personal finances, mental health, setting your own learning and career goals, maintaining friendships and relationships, and more. Peppy, sensible, and smart, Grad School Life points out the pitfalls of academia and helps you build the life you want. With fresh insights, concrete suggestions, and exercises, and helpful lists of resources, this book gives grad students a new roadmap for not only surviving but thriving both in school and in the real world.

Diverse Careers in Community Psychology Judah J. Viola, Olya Glantsman, 2017-03-29
Community psychology is a diverse field. Community psychologists may work for the government, for nonprofit foundations, as researchers or teachers in academic settings, at NGOs, as independent consultants, overseas in international development, and more. Despite such professional diversity, very little information has formally been made available to students and practitioners about the range of careers they can pursue when studying community psychology. Diverse Careers in Community Psychology details a range of potential career paths for someone with community psychology or related social science training, describes the different types of careers, e.g., tasks involved, benefits, and challenges, salary range, etc., and outlines steps one can take to develop such a career. The volume is built on three foundations: 1) a career survey of almost 450 respondents which provides quantitative information about the different types of settings in which individuals with community psychology training might find themselves; 2) more than twenty chapters by contributors who share their personal stories and guidance on how to select, prepare for, find, and succeed in careers similar to theirs; 3) and interviews with community psychologists further illustrating examples discussed in the authored chapters. This volume provides both a depth and breadth of information about the

possible careers available for someone with community psychology or related training *The Power of a PhD* Dr. Isaiah Hankel, 2022-09-13 What if all your years of hard work in academia finally paid off Imagine never having to work in another dead end academic position or being able to tell the world you are in a leadership position within a thriving company PhDs are in demand in industry but often these PhDs are invisible to potential employers Dr Isaiah Hankel leverages his expertise as the CEO of the world's largest career training platform for PhDs Cheeky Scientist to help PhDs overcome their biggest obstacle obscurity The Power of a PhD is the stepwise blueprint that 18 million PhDs worldwide are seeking Dr Isaiah Hankel's eight core steps within The Power of a PhD include Industry career options for PhDs Communicating the right skills Writing industry resumes Mastering LinkedIn profiles Networking and job referrals Generating informational interviews Acing industry interviews Negotiating your salary This eight step approach provides a consistent and proven methodology that allows PhDs to transition into industry without suffering the painful process of trial and error You could be the next PhD hired at Amazon Google Apple Intel Dow Chemical BASF ERM Merck Genentech Nestle Hilton Tesla Syngenta Siemens the CDC UN or Ford Foundation
