Finding God Charles C. Hollen, 1996 Abstract This study addresses the question What is the experience of a spiritual awakening The concept of a spiritual awakening was defined as a life changing experience in which an individual after a period of unawareness pain and confusion awakens to the presence of a Higher Power surrenders to that Power and moves through a recovery process culminating in increased peace of mind and often substantial changes in lifestyle and values A review of relevant literature revealed that the total process of a spiritual awakening can be seen to proceed through five distinct phases 1 the unawakened life 2 the precipitating crisis 3 the moment of surrender 4 the spiritual awakening and 5 the life afterwards The heuristic research model was chosen to guide this inquiry Because of its passion and deep intimacy heuristic research provides a deeper level of explanation and more insightful understanding of the phenomenon under investigation than do other types of research An immersion into the researcher s own spiritual awakening was undertaken Interviews were conducted with ten co researchers including six women and four men Interviews were tape recorded

transcribed and reviewed for themes A total of 32 themes were identified These were organized into three categories those describing the life before the spiritual awakening those describing the spiritual awakening process and those describing life after the spiritual awakening The themes depicted the pain and confusion of a spiritually empty life the lengthy and arduous healing journey of a spiritual awakening and the gradual emergence into a more peaceful and joyful life after the spiritual awakening Some of the themes of life after a spiritual awakening were discovering a true self beneath the false self meditation and inner peace learning to follow inner guidance or divine guidance an attitude of gratitude a heightened sense of the preciousness of life handling pain differently launching new dreams and giving love The findings of this study have important implications for psychotherapists for people in twelve step recovery programs for those administering rehabilitation and treatment to recovering addicts and for our society in general

Healing Through Awakening Mica Akullian, 2015-12-24

What if you were reborn in this moment completely free from the voice of fear negativity or doubt And what if instead you found yourself filled with deep love joy and gratitude for all of life How would you create your life from this place of freedom and happiness How would you experience yourself and life from this feeling of unconditional love The keys to awakening this heavenly realm within are available to everyone but require a journey inward to the most essential part of yourself your heart and soul Though it requires effort to embark on this path of awakening it is not the effort of doing more or trying to become something greater than what you already are Instead it is the effort of letting go letting go of fear and letting go of the false self that has been constructed in the mind over the course of a lifetime The path to spiritual liberation requires honest self reflection inward investigation and a desire to know the truth of who you are beyond the limitations of your mind emotions and body Our purpose on the planet is to remember and reawaken to the truth of who we are that of unconditional love peace and joy The loving energy that we are is ever changing evolving and expanding and cannot fully be grasped nor contained within the limited confines of the mind The suffering that many people experience in life and the collective dysfunction perpetuating much of the pain and destruction on the planet at this time is the result of a deep forgetfulness of our Being of who we are in our essence This is my story of stepping out of the mind made reality of the ego and directly experiencing the greater reality existing within and all around us This is a story of the magic grace and healing that has accompanied my awakening process uncovering more of my true nature The first part of the book is my personal journey while the following chapters serve as a guide for the awakening and healing journey for anyone who desires to live in greater connection and happiness Though the scope of this book may seem ambitious covering such a wide array of topics relating to the mind emotions and body I feel that this is the most balanced approach to spiritual awakening The reason is that the journey of awakening and healing is truly a holistic process where each part of our human experience profoundly effects and shapes all other parts of the self By learning to integrate back into wholeness on every level we grow and evolve in a balanced way The holistic approach also creates a solid foundation to begin creating a new reality for oneself

a reality that is filled with infinite potential for peace happiness and well being May these words inspire and awaken the memory more fully within you of a greater reality and of your true nature **Consciousness Rising** Nicky

The Leap Steve Taylor, 2017-03-07 It is commonly thought that enlightenment is unattainable for ordinary people living in modern Western society and is reserved for monks or gurus leading a spiritually dedicated life in remote locations After researching mystical experiences and interviewing people who claim to have had them psychologist Steve Taylor found that normal modern day people from different faiths and walks of life have also reached modes of higher consciousness In fact these experiences are more common than we realize Drawing on his knowledge of different religious traditions Taylor set out to find the common features of these awakened states and how the rest of us might also achieve wakefulness In this book Taylor uncovers The different types of wakefulness natural gradual and sudden The difference between fraudulent spiritual teachers and the genuinely awakened The sometimes disorienting effects of spiritual awakenings on those who undergo them How different theories of consciousness explain or try to debunk mystical experiences Above all Taylor reminds us that we don t have to join an ashram in a distant country to attain enlightenment but that we can find it where we are right now
