Disasters and Democracy Rutherford H. Platt,2012-07-16 In recent years the number of presidential declarations of major disasters has skyrocketed Such declarations make stricken areas eligible for federal emergency relief funds that greatly reduce their costs But is federalizing the costs of disasters helping to lighten the overall burden of disasters or is it making matters worse Does it remove incentives for individuals and local communities to take measures to protect themselves Are people more likely to invest in property in hazardous locations in the belief that if worse comes to worst the federal government will bail them out *Disasters and Democracy* addresses the political response to natural disasters focusing specifically on the changing role of the federal government from distant observer to immediate responder and principal financier of disaster costs **Crucibles of Hazard** James K. Mitchell,1999 In this study of environmental risks in ten of the world s major cities the contributors examine the hazard experiences of and analyze the future risks They conclude that the natural disaster potential of the biggest cities is expanding at a pace which exceeds the rate of urbanization *Forthcoming Books* Rose Arny,1993 **Memory, Trauma, and Identity** Ron Eyerman,2019-04-09 This volume brings together Ron Eyerman s most important interventions in the field of cultural trauma and offers an accessible entry point into the origins and development of this theory and a framework of an analysis that has now achieved the status of a research paradigm This collection of disparate essays published between 2004 and 2018 coheres around an original introduction that not only

provides a historical overview of cultural trauma but is also an important theoretical contribution to cultural trauma and collective identity in its own right The Afterword from esteemed sociologist Eric Woods connects the essays and explores their significance for the broader fields of sociology behavioral science and trauma studies *Sensing the Spirit* Rebecca B Prichard,1999 In the First Feminist Constructive Theology of the Spirit Prichard uses the five senses to explore the Bible historical theology medieval mystics contemporary experience and more as ways to speak metaphorically of God s Spirit This poetic book combines theology with hymns scripture poetry and the reflections of such mystics as Julian of Norwich and Hildegard of Bingen to talk about and to evoke a sense of the Spirit s presence *Juri Lotman - Culture, Memory and History* Marek Tamm,2019-10-09 This volume brings together a selection of Juri Lotman s late essays published between 1979 and 1995 While Lotman is widely read in the fields of semiotics and literary studies his innovative ideas about history and memory remain relatively unknown The articles in this volume most of which are appearing in English for the first time lay out Lotman s semiotic model of culture with its emphasis on mnemonic processes Lotman s concept of culture as the non hereditary memory of a community that is in a continuous process of self interpretation will be of interest to scholars working in cultural theory memory studies and the theory of history **Luba Memory Codes** Linda Hill,AI,2025-05-03 Luba Memory Codes explores the ingenious methods employed by the pre literate Luba Kingdom of Central Africa to preserve and transmit their history and governance Lacking a written language the Luba people developed sophisticated memory aids most notably the lukasa a wooden board adorned with beads and carvings These served as mnemonic devices enabling trained specialists basangwa to recount intricate narratives and legal precedents This book delves into the Luba s system of indigenous knowledge highlighting their capacity for abstract thought The book examines the lukasa in detail deciphering its symbolic language and demonstrating its function as a memory aid It also considers the broader cultural context including oral traditions and initiation ceremonies that reinforced the memory codes By understanding these elements readers gain insight into the complex governance structures of the Luba Kingdom which flourished from the 16th to the 19th centuries Organized into three parts Luba Memory Codes first introduces the Luba Kingdom then analyzes the lukasa and finally explores the social context of memory in Luba culture Through a combination of historical accounts museum collections and ethnographic research the book offers a nuanced perspective on pre colonial African history and challenges conventional views reliant solely on written records This interdisciplinary approach will appeal to scholars students and anyone interested in African history cultural preservation and the fascinating world of mnemonic devices **Brigid's Mantle** Fitzgerald, Nancy,2025 Drawing on the latest research Brigid s Mantle looks at the role of women in the ancient Irish church led by the legendary Brigid of Kildare to find ways to help women move forward in the church today as we make our way along the synodal path journeying together more deeply into our faith Historic Fires of Fall River Stefani Koorey, PhD,2016 Fall River s textile boom in the nineteenth century brought with it a series of fiery disasters The Big Fire of 1843 left more than one thousand

people homeless and destroyed two hundred buildings as well as twenty some acres of land After the Steiger Store Fire of 1916 mill owners pushed the city to replace horse drawn brigades with fire engines The intense heat from the Kerr Mill Thread Fire of 1987 melted hoses as first responders battled the blaze Author Stefani Koorey chronicles the historic infernos of the Spindle City and celebrates the community s resilience in the face of adversity **Why Things Bite Back** Edward Tenner,1997-09-02 In this perceptive and provocative look at everything from computer software that requires faster processors and more support staff to antibiotics that breed resistant strains of bacteria Edward Tenner offers a virtual encyclopedia of what he calls revenge effects the unintended consequences of the mechanical chemical biological and medical forms of ingenuity that have been hallmarks of the progressive improvement obsessed modern age Tenner shows why our confidence in technological solutions may be misplaced and explores ways in which we can better survive in a world where despite technology s advances and often because of them reality is always gaining on us For anyone hoping to understand the ways in which society and technology interact *Why Things Bite Back* is indispensable reading A bracing critique of technological determinism in both its utopian and dystopian forms No one who wants to think clearly about our high tech future can afford to ignore this book Jackson Lears *Wilson Quarterly* *A State of Mixture* Richard E. Payne,2015-09-01 Christian communities flourished during late antiquity in a Zoroastrian political system known as the Iranian Empire that integrated culturally and geographically disparate territories from Arabia to Afghanistan into its institutions and networks Whereas previous studies have regarded Christians as marginal insular and often persecuted participants in this empire Richard Payne demonstrates their integration into elite networks adoption of Iranian political practices and imaginaries and participation in imperial institutions The rise of Christianity in Iran depended on the Zoroastrian theory and practice of hierarchical differentiated inclusion according to which Christians Jews and others occupied legitimate places in Iranian political culture in positions subordinate to the imperial religion Christians for their part positioned themselves in a political culture not of their own making with recourse to their own ideological and institutional resources ranging from the writing of saints lives to the judicial arbitration of bishops In placing the social history of East Syrian Christians at the center of the Iranian imperial story *A State of Mixture* helps explain the endurance of a culturally diverse empire across four centuries **City on Fire** Anna Rose Alexander,2016-09-02 By the mid nineteenth century efforts to modernize and industrialize Mexico City had the unintended consequence of exponentially increasing the risk of fire while also breeding a culture of fear Through an array of archival sources Anna Rose Alexander argues that fire became a catalyst for social change as residents mobilized to confront the problem Advances in engineering and medicine soon fostered the rise of distinct fields of fire related expertise while conversely the rise of fire profiteering industries allowed entrepreneurs to capitalize on crisis *City on Fire* demonstrates that both public and private engagements with fire risk highlight the inequalities that characterized Mexican society at the turn of the twentieth century Perspectives on
