Firearms And Violence:

Firearms and Violence National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Committee to Improve Research Information and Data on Firearms, 2004-12-13 For years proposals for gun control and the ownership of firearms have been among the most contentious issues in American politics For public authorities to make reasonable decisions on these matters they must take into account facts about the relationship between guns and violence as well as conflicting constitutional claims and divided public opinion In performing these tasks legislators need adequate data and research to judge both the effects of firearms on violence and the effects of different violence control policies Readers of the research literature on firearms may sometimes find themselves unable to distinguish scholarship from advocacy Given the importance of this issue there is a pressing need for a clear and unbiased assessment of the existing portfolio of data and research *Firearms and Violence* uses conventional standards of science to examine three major themes firearms and violence the quality of research and the quality of data available The book assesses the strengths and limitations of current databases examining current research studies on firearm use and the efforts to reduce unjustified firearm use and suggests ways in which they can be improved

Roth,1994 **Gun Culture or Gun Control?** Peter Squires,2012-12-06 n 1996 the shooting and killing of 16 young children in a Dunblane primary school provoked wide reaching parliamentary reform to British gun laws Within months virtually all privately owned handguns had been outlawed Gun Culture or Gun Control presents the first substantial analysis of the social and political reactions to events in Dunblane and also examines many of the wider issues relating to gun control in the United Kingdom Rigorously comparative throughout Peter Squires provides a non partisan exploration of the differences between attitudes to firearms and their control in Britain and in the United States Amongst the topics the author considers are the social history of firearms on both sides of the atlantic the differing policy directions adopted in Britain and the USA media

coverage of the gun question firearms and policing the future of the gun in society *Guns and Violence* Laura K. Egendorf, 2005 Gun related violence is an issue that grips most American communities The authors in this book debate whether gun violence is a serious problem what measures can reduce violent incidents the constitutionality of gun control and whether guns are the best tool for self defense *Guns, Violence, and Teens* Vic Cox, 1997 America's youth are being drafted into a deadly game More young people are using guns than ever before Vic Cox presents readers with an honest and balanced outlook at both sides of the gun control issue and provides a clear picture of the harsh reality affecting young people today Includes chapter notes resource list and further reading list *Point Blank* Gary Kleck, 2017-07-12 By 1990 there were approximately 200 million guns in private hands in the United States and around half of American households contained a gun Over 30 000 people a year are killed with guns in suicides homicides and accidents and Americans use guns for defensive purposes as many as a million times a year There is little doubt that gun violence and control are issues of vital importance and they continue to inspire national debate It is doubtful however that most gun debates are worth listening to Not surprisingly they generally leave their participants exactly where they began with their biases intact and onlookers perplexed Written deliberately to counter an atmosphere of hysteria and extremism *Point Blank* now in paperback offers logical argument supported by empirical information It confronts fundamental questions head on On its initial publication in 1993 *Point Blank* won the Michael J Hindelang Award of the American Society of Criminology for the book that made the most outstanding contribution to criminology *Point Blank* reports both original research and assesses existing evidence drawn from a wide variety of academic disciplines including criminology sociology law and medicine *Priorities for Research to Reduce the Threat of Firearm-Related Violence* National Research Council, Division of Behavioral and Social Sciences and Education, Committee on Law and Justice, Institute of Medicine, Executive Office, Institute of Medicine, Committee on Priorities for a Public Health Research Agenda to Reduce the Threat of Firearm-Related Violence, 2013-11-03 In 2010 more than 105 000 people were injured or killed in the United States as the result of a firearm related incident Recent highly publicized tragic mass shootings in Newtown CT Aurora CO Oak Creek WI and Tucson AZ have sharpened the American public's interest in protecting our children and communities from the harmful effects of firearm violence While many Americans legally use firearms for a variety of activities fatal and nonfatal firearm violence poses a serious threat to public safety and welfare In January 2013 President Barack Obama issued 23 executive orders directing federal agencies to improve knowledge of the causes of firearm violence what might help prevent it and how to minimize its burden on public health One of these orders directed the Centers for Disease Control and Prevention CDC to along with other federal agencies immediately begin identifying the most pressing problems in firearm violence research The CDC and the CDC Foundation asked the IOM in collaboration with the National Research Council to convene a committee tasked with developing a potential research agenda that focuses on the causes of possible interventions to and strategies to

minimize the burden of firearm related violence Priorities for Research to Reduce the Threat of Firearm Related Violence focuses on the characteristics of firearm violence risk and protective factors interventions and strategies the impact of gun safety technology and the influence of video games and other media

Guns and Violence Joyce Lee Malcolm, 2009-06-01 Behind the passionate debate over gun control and armed crime lurk assumptions about the link between guns and violence Indeed the belief that more guns in private hands means higher rates of armed crime underlies most modern gun control legislation But are these assumptions valid Investigating the complex and controversial issue of the real relationship between guns and violence Joyce Lee Malcolm presents an incisive thoroughly researched historical study of England whose strict gun laws and low rates of violent crime are often cited as proof that gun control works To place the private ownership of guns in context Malcolm offers a wide ranging examination of English society from the Middle Ages to the late twentieth century analyzing changing attitudes toward crime and punishment the impact of war economic shifts and contrasting legal codes on violence She looks at the level of armed crime in England before its modern restrictive gun legislation the limitations that gun laws have imposed and whether those measures have succeeded in reducing the rate of armed crime Malcolm also offers a revealing comparison of the experience in England experience with that in the modern United States Today Americans own some 200 million guns and have seen eight consecutive years of declining violence while the English prohibited from carrying weapons and limited in their right to self defense have suffered a dramatic increase in rates of violent crime This timely and thought provoking book takes a crucial step in illuminating the actual relationship between guns and violence in modern society

Promising Strategies to Reduce Gun Violence David I. Sheppard, 1999 Culmination of a survey and review conducted by a U S Department of Justice Work Group and COSMOS Corporation

Under the Gun Peter H. Rossi, 2017-09-29 In 1978 the Social and Demographic Research Institute of the University of Massachusetts Amherst received a grant from the National Institute of Justice to undertake a comprehensive review of the literature on weapons crime and violence in the United States The purpose of the project is best described as a sifting and winnowing of the claims and counterclaims from both sides of the Great American Gun War the perennial struggle in American political life over what to do if anything about guns about violence and about crime The review and analysis of the available studies consumed the better part of three years the results of this work are contained in this volume The intention of any review is to take stock of the available fund of knowledge in some topical area Under the Gun is no different our goal has been to glean from the volumes of previous studies those facts that in our view seem firmly and certainly established those hypotheses that seem adequately supported by or at least approximately consistent with the best available research evidence and those areas or topics about which it seems we need to know a lot more than we do One of our major conclusions can be stated in advance despite the large number of studies that have been done many critically important questions have not been adequately researched and some of them have not been examined at all Much of the available research in the area of weapons and crime

has been done by advocates for one or another policy position As a consequence the manifest intent of many studies is to persuade rather than to inform We have tried to approach the topic from a purely agnostic point of view treating as an open question what policies should be enacted with regard to gun or crime control Thus we have tried to judge each study on its own merits on the basis of the routine standards normally applied to social scientific research and not on the basis of how effectively it argues for a particular policy direction It would of course be presumptuous to claim that we have set aside all our own biases in conducting this study Whether or not our treatment is fair and objective is clearly something for the reader and not us to decide

The Behavioral Science of Firearms Gianni Pirelli, Hayley Wechsler, Robert J. Cramer, 2019 This book focuses on how the principles and empirical knowledge within behavioral science can inform and improve firearm related policy practice and research It features a formal framework for the assessment of civilians seeking firearms permits reinstatement of their firearms subsequent to revocation and considerations for relevant others

Guns in America Donald J. Campbell, 2021-08-09 This work provides readers with an authoritative resource for understanding the true extent and nature of gun violence in America examining the veracity of claims and counterclaims about mass shootings gun laws and public attitudes about gun control This work is part of a series that uses evidence based documentation to examine the veracity of claims and beliefs about high profile issues in American culture and politics Each book in the Contemporary Debates series is intended to puncture rather than perpetuate myths that diminish our understanding of important policies and positions to provide needed context for misleading statements and claims and to confirm the factual accuracy of other assertions This particular volume examines beliefs claims and myths about gun violence gun laws and gun rights in the United States Issues covered in the book include trends in firearm violence mass shootings the impact of gun ownership on rates and types of crime regulations and Supreme Court decisions regarding gun control and the Second Amendment and the activities and influence of organizations ranging from the National Rifle Association to Everytown for Gun Safety All of these topics are examined in individualized entries with objective responses grounded in up to date evidence

Promising strategies to reduce gun violence report, **At Gunpoint** Dr Rahn Kennedy Bailey, 2018-08-13 Firearms violence is as American as apple pie in a country where the right to bear arms is enshrined in the U S Constitution Yet our forefathers could not have imagined armor piercing bullets automatic assault rifles in the hands of criminals and suspects using such weapons to kill concert attendees church goers and school children Dr Rahn Bailey and his coauthors take a hard look at firearm violence from the seat of a medical professional the issues behind such violence and finally how the medical community should be responding to such issues There is a notion by some pushed by the National Rifle Association that the only way to stop a bad guy with a gun is a gun is a good guy with a gun Dr Bailey and his colleagues take on that notion head on His has seen firearm violence up close as a physician and what it does to the victim and everyone around him or her As an African American psychiatrist Dr Bailey has something to say on the subject that is authoritative noteworthy and one many

should hear There is a prevailing feeling among some that bringing more guns into a situation will actually make an area or situation safer That simply is not true Dr Bailey s book will examine the impact of suicide and guns active shooters how guns are used interpersonally Many are dying needlessly simply because guns have been introduced into a situation That does not mean fist fights do not lead to deaths or conflicts with knives bats rocks etc will leave people dead When someone can take a weapons that can fire off hundreds of rounds of ammunition in minutes even seconds victims have little chance to survive much less fight back Gun violence is a health care issue and must be acknowledged as such researched and treated in such a manner Dr Bailey and his colleagues will make that case in the following pages **Regulating Gun Sales** Daniel W Webster,Jon S Vernick,Emma E McGinty,Ted Alcorn,2013-03-26 This excerpt from the masterful timely data driven study of the gun control debate examines the potential of stronger purchasing laws Choice As the debate on gun control continues evidence based research is needed to answer a crucial question How do we reduce gun violence One of the biggest gun policy reforms under consideration is the regulation of firearm sales and stopping the diversion of guns to criminals This selection from the major anthology of studies Reducing Gun Violence in America presents compelling evidence that stronger purchasing laws and better enforcement of these laws result in lower gun violence Additional material for this edition includes an introduction by Michael R Bloomberg and Consensus Recommendations for Reforms to Federal Gun Policies from the Johns Hopkins University The Great American Gun Debate Don B. Kates,Gary Kleck,1997 The Great American Gun Debate will prove to be the issue of debate as we move into the 21st century By two of the nation s leading authors on the issue of guns and violence the book gives iconoclastic perspectives on a number of hot button gun issues and the way guns have been demonized in professional medical literature The authors sort out fact from fiction on the issue of guns and violence
