Ecology And Religion Toward A New Christian Theology Of Nature:

Ecology and Religion John Carmody,1983 **Christianity and Ecological Theology** E. M. Conradie,2006-10-01

There has been a proliferation of publications in the field of Christian ecological theology over the last three decades or so. These include a number of recent edited volumes each covering a range of topics and consolidating many of the emerging insights in ecological theology. The call for Christian churches to respond to the environmental crisis has been reiterated numerous times in this vast corpus of literature also in South Africa.

Systematic Theology, Volume 2, Second Edition James Leo Garrett Jr.,2014-09-14 Rivals the major systematic theologies of this century Baptist History and Heritage Journal July 1996 One of the characteristics of Garrett's system that needs especially to be noted is its balanced judicious and nearly invariably objective presentation of materials. While holding true to the teachings of his own Baptist faith Garrett so carefully and judiciously presents alternatives that teachers and students from other confessional and denominational positions will find his work instructive. Consensus 1997 If one is searching for an extensive exposition of the biblical foundations and historical developments of the various loci of systematic theology there is no more complete presentation in a relatively short work than this. Pastors will especially find this feature to be a real help in teaching theology. It is an indispensable contribution to the task of systematic theology. Journal of the Evangelical Theological Society September 1999 Many students and pastors will find all they need here and will in addition be helped to relate their knowledge to recent developments in the theological world. The Churchman A Journal of Anglican Theology 1991 A gold mine of helpful material. The Christian Century May 29 June 5 1991 No book that I know is more loaded with biblical and theological facts than this one. The prodigious research that must have gone into the preparation of this volume is truly mind boggling. Faith and Mission Fall 1991 Garrett has provided a massive and scholarly systematic theology from a thoroughly conservative and comprehensive viewpoint. The work is well documented in both biblical and historical scholarship and will prove to be a classic. William Hendrickson Southern Baptist Theological Seminary One of the most comprehensive concise books of its type available it should receive wide use in the classroom and in the study. Robert H Culpepper Southern Baptist Theological Seminary

This Sacred Earth Roger S. Gottlieb, 1996 This is the first comprehensive survey of the critical connections between religion nature and the environment

It includes writings from sacred texts and a broad spectrum of new eco theological selections

Historical and contemporary selections from key authors and a multicultural range of sources make This Sacred Earth an invaluable teaching resource and a unique introduction to the theory and practice of religious environmentalism

Ecotheology and the Practice of Hope Anne Marie Dalton, Henry C. Simmons, 2010-09-29 Is there any hope for a more sustainable world

Can we reimagine a way of living in which the nonhuman world matters

Anne Marie Dalton and Henry C Simmons claim that the ecotheology that arose during the mid twentieth century gives us reason for hope

While ecotheologians acknowledge that Christianity played a significant role in creating societies in which the nonhuman world counted for very little these thinkers have refocused religion to include the natural world

To borrow philosopher Charles Taylor s concept they have created a new social imaginary reimagining a better world and a different sense of what is and what should be

A new mindset is emerging inspired by ecotheological texts and evident in the many diverse movements and activities that operate as if the hope imparted by ecotheology has already been realized

While making this powerful argument Dalton and Simmons also provide an essential overview of key ecotheological thinkers and texts

The ^A Wealth of Nature Donald Worster, 1994-10-27 Hailed as one of the most eminent environmental historians of the West by Alan Brinkley in The New York Times Book Review

Donald Worster has been a leader in reshaping the study of American history

Winner of the prestigious Bancroft Prize for his book Dust Bowl Worster has helped bring humanity s interaction with nature to the forefront of historical thinking

Now in The Wealth of Nature he offers a series of thoughtful eloquent essays which lay out his views on environmental history tying the study of the past to today s agenda for change

Worster ranges across such areas as agriculture water development and other questions examining them as environmental issues and showing how they have affected and continue to affect human settlement

He also examines urban life and history in the context of environmental history and goes on to argue for a comprehensive approach to understanding our past as well as our present in environmental terms

Nostalgia runs all through this society

Worster writes fortunately for it may be our

only hope of salvation These reflective and engaging essays capture the fascination of environmental history and the beauty of nature lost or endangered underscoring the importance of intelligent action in the present **Nature, God and**

Humanity Richard L. Fern, 2002-04-04 Nature God and Humanity clarifies the task of forming an ethics of nature thereby empowering readers to develop their own critical faith based ethics Calling on original thought provoking analyses and arguments Richard L Fern frames a philosophical ethics of nature assesses it scientifically finds support for it in traditional biblical theism and situates it culturally Though defending the moral value of beliefs affirming the radical Otherness of God and human uniqueness this book aims not to compel the adoption of any particular ethic but rather illumine the contribution diverse forms of inquiry make to an ethics of nature How does philosophy clarify moral conviction What does science tell us about nature Why does religious faith matter Rejecting the illusion of a single rationally compelling ethics Fern answers these questions in a way that fosters both agreement and disagreement allowing those holding conflicting ethics of nature to work together for the common good Handbook of Cross-cultural Psychology: Social behavior and applications John W.

Berry, Ype H. Poortinga, Janak Pandey, 1997 Presenting the human relations in a cultural context this book explores various social psychology concepts and applied topics in the light of cross cultural research It also features the developments in the field as well as diversity in the cultural and theoretical backgrounds of the editors and chapter authors *Imaging God* Douglas John Hall, 2004-03-14 The deterioration of our natural environment under the impact of a rampant technological society is one of the major crises of our time For many analysts a primary cause of this crisis is the influence on Western culture of the Judaeo Christian concept of the human being as having dominion over the rest of creation In this book Douglas John Hall does not attempt to exonerate historical Christianity from that charge But he argues confession alone is not enough The crisis of nature forces us to rethink our whole understanding of the relation between humanity and nature an understanding that is based on the concept that human beings are created in the image of God imago Dei Hall carefully examines the biblical historical and theological meanings of this term which more than any other biblical expression became Christianity's symbolic way of designating the essence of the human Hall argues that the image of God is not an endowment it is not something that human beings have rather it is a quality that pertains to our relationship with God We should think of imago as a verb not a noun he says The human vocation within the created order is to image the Creator When this is applied in a consistent and serious way the idea of human dominion over all of nature must be radically reinterpreted Taking the Lordship of Jesus as an authentic model for understanding our human relation to the natural order means that dominion is expressed not as mastery but as service sacrificial service of the others with and for whom one is responsible Thus the concept of dominion as stewardship eschews any idea of ownership or superiority in relation to nature yet assumes a special accountability for its welfare A provocative and original work Hall's book retains the biblical centrality of homo sapiens while at the same time raising both nature and God to a new kind of prominence in the dialogue that is life
