Economic Thought and the Irish Question 1817-1870 Black, R. D. Collison Black, 1993-03-01 This study based on primary and secondary source material provides an account of the inter relations between classical economic thought and the actual economic policy pursued in Ireland between 1817 and 1870 It shows how professional economists failed to influence successive governments

**A History of Irish Economic Thought** Thomas Boylan, Renee Prendergast, John Turner, 2013-03 For a country that can boast a distinguished tradition of political economy from Sir William Petty through Swift Berkeley Hutcheson Burke and Cantillon through to that of Longfield Cairnes Bastable Edgeworth Geary and Gorman it is surprising that no systematic study of Irish political economy has been undertaken In this book the contributors redress this glaring omission in the history of political economy for the first time providing an overview of developments in Irish political economy from the seventeenth to the twentieth century Logistically this is achieved through the provision of individual contributions from a group of recognized experts both Irish and international who address the contribution of major historical figures in Irish political economy along the analysis of major thematic issues schools of thought and major policy debates within the Irish context over this extended period

Economic Development John Eatwell, Murray Milgate, Peter Newman, 1989 First published in the New Palgrave a dictionary of economics in four volumes 1987 T p verso Includes bibliographical references

*Location and Dislocation in Contemporary Irish Society* Jim Mac Laughlin, 1997 This volume of essays fills a number of gaps in the existing literature on emigration and provides a wide ranging treatment of Irish emigration in contemporary Irish society and the expanding Irish diaspora By addressing the issues from a world perspective the contributors suggest that emigration is not simply a cultural tradition or behavioural trait of the Irish but a social class and gendered response to structures operating in Irish society and the global economy generally The geographical focus ranges across Britain the United States and Europe It will appeal to those interested in modern Irish emigration women s studies national identity popular culture literary criticism the sociology of contemporary Irish society and those working in the rapidly growing field of diaspora studies

Boylan, Timothy P. Foley, 1992 Through the first half of the nineteenth century there was a widespread notion that political economy was little known and not highly thought of in Ireland and that the Irish and Roman Catholic character was either non economic or anti economic Such economic ignorance came to be seen as a major cause of Irish backwardness and social divisions The educational system was identified as the chief non coercive means of establishing hegemony over the Irish with political economy playing a leading role in promoting the economically progressive virtues seen as English and rational of self interest and individualism the socially desirable objective of neutralising class antagonisms and above all the political objective of tranquillising Ireland and assimilating it to English norms the better to promote the integrity of Empire In a country so spectacularly divided as Ireland ideological consensus was sought in that allegedly value free and incontrovertible form of knowledge political economy But this book argues that political economy was partisan and defended the social political and ideological status quo The Great Famine of 1846 7 provoked an Irish outcry against political economy and especially its constant companion laissez faire The validity and universality of its laws were impugned and it was subjected to unrelenting moral and political attacks Although the establishment strenuously defended it within ten years a moral critique of the discipline had seriously questioned its scientific status Its basic tenets such as individualism and self interest were challenged in the name of social and cooperative values and the family rather than the individual was seen as the basic unit of society A political economy based on English experience and ideas was rejected and the notion was embraced that Ireland should be governed by Irish ideas This is the first history of the academic and non academic propagation of the discipline in Ireland It deals with the foundation and careers of university chairs the role of the Statistical Society and the Barrington Trust and the teaching of the subject to children in the national schools In all of these areas the central role of Archbishop Richard Whately is emphasised      **Political Economy and Colonial Ireland** Thomas Boylan, Tadhg Foley, 2005-08-08 In a bitterly divided 19th century Ireland consensus was sought in the new discipline of political economy which claimed to transcend all divisions This book explores the failure of that mission in the wake of the great famine of 1846 7      **The Evolution of Modern Economic Theory and Other Papers on the History of Economic Thought** Lionel Robbins Baron Robbins, 1970
