Alter,2013-06-19 For many scholars the study of community and community development is at a crossroads Previously dynamic theories appear not to have kept pace with the major social changes of our day Given our constantly shifting social reality we need new ideas and research that pushes the boundaries of our extant community theories Theory Practice and Community Development stretches the traditional boundaries and applications of well established community development theory and establishes new theoretical approaches rooted in new disciplines and new perspectives on community development Expanded from a special issue of the journal Community Development Theory Practice and Community Development collects previously published and widely cited essays

as well as new theoretical and empirical research in community development Compiled by the editors of Community Development the essays feature topics as varied as placemaking democratic theory and rural organizing Theory Practice and Community Development is vital for scholars and practitioners coming to grips with the rapidly changing definition of community

The Theory, Practice and Potential of Regional Development Kelly Vodden, David J.A. Douglas, Sean Markey, Sarah Minnes, Bill Reimer, 2019-07-04 Canadian regional development today involves multiple actors operating within nested scales from local to national and even international levels Recent approaches to making sense of this complexity have drawn on concepts such as multi level governance relational assets integration innovation and learning regions These new regionalist concepts have become increasingly global in their formation and application yet there has been little critical analysis of Canadian regional development policies and programs or the theories and concepts upon which many contemporary regional development strategies are implicitly based This volume offers the results of five years of cutting edge empirical and theoretical analysis of changes in Canadian regional development and the potential of new approaches for improving the well being of Canadian communities and regions with an emphasis on rural regions It situates the Canadian approach within comparative experiences and debates offering the opportunity for broader lessons to be learnt This book will be of interest to policy makers and practitioners across Canada and in other jurisdictions where lessons from the Canadian experience may be applicable At the same time the volume contributes to and updates regional development theories and concepts that are taught in our universities and colleges and upon which future research and analysis will build

Biophysical Perspective Blair Fix, 2014-12-09 Neoclassical growth theory is the dominant perspective for explaining economic growth At its core are four implicit assumptions 1 economic output can become decoupled from energy consumption 2 economic distribution is unrelated to growth 3 large institutions are not important for growth and 4 labor force structure is not important for growth Drawing on a wide range of data from the economic history of the United States this book tests the validity of these assumptions and finds no empirical support Instead connections are found between the growth in energy consumption and such disparate phenomena as economic redistribution corporate employment concentration and changing labor force structure The integration of energy into an economic growth model has the potential to offer insight into the future effects of fossil fuel depletion on key macroeconomic indicators which is already manifested in stalled or diminished growth and escalating debt in many national economies This book argues for an alternative biophysical perspective to the study of growth and presents a set of stylized facts that such an approach must successfully explain Aspects of biophysical analysis are combined with differential monetary analysis to arrive at a unique empirical methodology for investigating the elements and dependencies of the economic growth process **Community Economics** Ron Schaffer, Steven C.
