Economics and Information Pascal

Petit, 2001-11-30 This book explains the way in which information and knowledge are treated in contemporary economic theories and therefore contributes to our understanding of the importance of the strategic organisation of information and the acquisition of know how to the behaviour of modern economies It gathers together contributions of experts on the role of information in the various theories covered specifically in system analysis in game theory in the statistical theory of information in theories of market pricing of financial speculation and of bounded rationality decision making in the evolutionary theory of the firm in the new industrial economics and in the economics of codification Economics and Information is divided into three parts Part One deals with general theories of information Part Two addresses the role of information in the functioning of markets Part Three considers the importance of information to the operation of organisations Conclusions are drawn in Part Four on the implications for the process of economic growth and for economic policies It therefore provides new insights into some of the puzzling features of recent developments in the so called New Economy

Organization with Incomplete Information Mukul Majumdar, Roy Radner, 1998-09-13 There have been systematic attempts over the last twenty five years to explore the implications of decision making with incomplete information and to model an economic man as an information processing organism These efforts are associated with the work of Roy Radner who joins other analysts in this collection to offer accessible overviews of the existing literature on topics such as Walrasian equilibrium with incomplete markets rational expectations equilibrium learning Markovian games dynamic

game theoretic models of organization and experimental work on mechanism selection Some essays also take up relatively new themes related to bounded rationality complexity of decisions and economic survival The collection overall introduces models that add to the toolbox of economists expand the boundaries of economic analysis and enrich our understanding of the inefficiencies and complexities of organizational design in the presence of uncertainty

Hayek's Political Theory, Epistemology, and Economics Jeffrey Friedman, 2016-04-14 Hayek thought that all economic behavior and by implication other human behavior is based on fallible interpretations of what information is important and of its implications for the future This epistemological idea animated not only his heterodox economic thought but his ideal of the rule of law his road to serfdom thesis and his critique of the notion of social justice However the epistemological idea is a protean one that Hayek did not always handle carefully This volume presents one of the most sophisticated critical reflections on Hayek ever assembled between two covers This book was originally published as a special issue of Critical Review

The Elgar Companion to Information Economics Daphne R. Raban, Julia W_odarczyk, 2024-03-14 The Elgar Companion to Information Economics dexterously navigates this interdisciplinary field of research which celebrates the crucial contribution of information to decision making market dynamics and economic well being Offering a wealth of conceptual analysis this erudite Companion embarks on an intellectual journey exploring the fundamentals of information economics This title contains one or more Open Access chapters The Collected Papers of Leonid Hurwicz Samiran Banerjee, 2022 Introduces non specialist readers to the life and work of Leonid Hurwicz a major contributor to modern theoretical economics Includes papers covering talks Hurwicz gave over the last 4 decades of his life providing a detailed and nuanced understanding of economic systems and the informational and incentive issues in designing mechanisms Contains reviews and essays on decision theory and game theory for lay readers Brings together reminiscences from co authors and colleagues offering insights into Hurwicz as a person and scholar Book jacket Game Theory and Economic Analysis Christian Schmidt, 2002-06-20 This book presents the huge variety of current contributions of game theory to economics The reader is taken through a concise history of game theory and exposed to original pieces of work that are significant to game theory as a whole **Knowledge: Its Creation, Distribution and Economic Significance, Volume III** Fritz Machlup, 2014-07-14 Volume III examines in clear and elegant prose the roles of knowledge and information in economics Part One analyzes the effects of new or uncertain information on market performance examines the formation and revision of expectations and provides a classification of literature and an extensive bibliography Part Two discusses private and social valuations of education and training the controversy over nature vs nurture the issue of credentialism and the depreciation of human capital Originally published in 1984 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Joan Robinson and Modern Economic Theory** George R. Feiwel, 1989-06-18 This and its companion volume *The Economics of Imperfect Competition and Employment* are about Joan Robinson her impact on modern economics her challenges and critiques and the advances made in the science and art of economics **Comparison of Economic Systems** Alexander Eckstein, 2023-07-28 *Comparison of Economic Systems Theoretical and Methodological Approaches* offers a profound exploration of the analytical frameworks and methodologies that define the field of comparative economics Emerging from a University of Michigan research conference the book charts the evolution of comparative economic systems as a discipline initially focused on evaluating grand isms like capitalism and socialism It shifts the focus toward a nuanced understanding of the traits institutions and decision making mechanisms that influence economic behavior and performance across different systems By examining theoretical models

such as those proposed by Koopmans, Montias and Hurwicz, the volume highlights the interplay of variables like property relations, incentive structures and resource allocation methods within mixed economic systems. The book seeks to bridge ideological labels with empirical data, fostering a more sophisticated analysis of economic systems in practice. This collection is not just an academic critique of economic ideologies but also a practical guide to comparing performance metrics like growth, efficiency and stability across national economies. It delves into contemporary challenges including decision making in large bureaucracies, the role of public versus private ownership and the impact of technological advancement on economic organization. With contributions from leading economists and case studies such as Bergson's work on the Soviet Union and the United States, the book underscores the necessity of interdisciplinary approaches to refine the methodologies of comparative economics. It is an essential resource for economists and policy analysts seeking to understand the complexities of economic systems and their implications for global development. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach and impact. Drawing on a backlist dating to 1893, Voices Revived makes high quality, peer reviewed scholarship accessible once again using print on demand technology. This title was originally published in 1971.

The Knowledge We Have Lost in Information Philip Mirowski, Edward Nik-Khah, 2017-06-01 Information is a central concept in economics and The Knowledge We Have Lost in Information explores its treatment in modern economics. The study of information far from offering enlightenment resulted in all manner of confusion for economists and the public. Philip Mirowski and Edward Nik Khah argue that the conventional wisdom suggesting economic rationality was the core of modern economics is incomplete. In this trenchant investigation they demonstrate that the history of modern microeconomics is better organized as a history of the treatment of information. The book begins with a brief primer on information and then shows how economists have responded over time to successive developments on the concept of information in the natural sciences. Mirowski and Nik Khah detail various intellectual battles that were fought to define, analyze and employ information in economics. As these debates developed, economists progressively moved away from pure agent conscious self awareness as a non negotiable desideratum of economic models toward a focus on markets and their design as information processors. This has led to a number of policies, foremost among them auction design of resources like the electromagnetic spectrum, crucial to modern communications. The Knowledge We Have Lost in Information provides insight into the interface between disputes within the economics discipline and the increasing role of information in contemporary society. Mirowski and Nik Khah examine how this intersection contributed to the dominance of neoliberal approaches to economics, politics and other realms.

The Information Technology Revolution and Economic

Development Nagy Hanna,1991 Information is a major development resource joining the ranks with human natural and financial resources Therefore development agencies must understand the role of information and information technologies informatics in the developing countries to respond to a rapidly evolving global environment The ongoing information explosion in the industrialized economies contrasts sharply with the information poverty of developing countries This poverty takes many forms including poor information support for macroeconomic and sectoral policy formulation and implementation limited access to information for rural populations and isolation of researchers and professionals from international research findings and so on Informatics applications offers new ways to make the most of the managerial and institutional resources of developing countries with the most widespread benefits likely to come from applying it to priority sectors Governments are recognizing their roles as information providers and users facilitators of information technology diffusion and providers of information and communication infrastructures as well as their role in setting policies for informatics During the 1990s the impact of information technology will be felt increasingly Developing countries at all levels of development must stay abreast of the information revolution they cannot afford to ignore this second industrial revolution

Designing Economic Mechanisms

Leonid Hurwicz,Stanley Reiter,2006-05-22 A mechanism is a mathematical structure that models institutions through which economic activity is guided and coordinated There are many such institutions markets are the most familiar ones Lawmakers administrators and officers of private companies create institutions in order to achieve desired goals They seek to do so in ways that economize on the resources needed to operate the institutions and that provide incentives that induce the required behaviors This book presents systematic procedures for designing mechanisms that achieve specified performance and economize on the resources required to operate the mechanism The systematic design procedures are algorithms for designing informationally efficient mechanisms Most of the book deals with these procedures of design When there are finitely many environments to be dealt with and there is a Nash implementing mechanism our algorithms can be used to make that mechanism into an informationally efficient one Informationally efficient dominant strategy implementation is also studied

Managerial Economics, International Adaptation

William F. Samuelson,Stephen G. Marks,Jay L. Zagorsky,2022-04-26 Managerial Economics introduces undergraduates MBAs and executives to the complex decision

problems today's managers face providing the knowledge and analytical skills required to make informed decisions and prosper in the modern business environment Going beyond the traditional academic approach to teaching economic analysis this comprehensive textbook describes how practicing managers use various economic methods in the real world Each chapter opens with a central managerial problem challenging readers to consider and evaluate possible choices and concludes by reviewing and analyzing the decision through the lens of the concepts introduced in the chapter Extensively updated throughout this International Adaptation makes use of new central managerial problems and case studies from across the world to discuss the foundational principles of managerial economics illustrate key concepts and strengthen students critical thinking skills Favoring practical skills development over complicated theoretical discussion the book includes mini problems and spreadsheet problems that reinforce students quantitative understanding without overwhelming them with an excessive amount of mathematics

Explorations in Information Space Max H. Boisot, Ian C.

MacMillan, Kyeong Seok Han, 2007-12-27 With the rise of the knowledge economy the knowledge content of goods and services is going up just as their material content is declining Economic value is increasingly seen to reside in the former that is in intangible assets rather than in the latter Yet we keep wanting to turn knowledge back into something tangible something with definite boundaries which can be measured manipulated appropriated and traded In short we want to reify knowledge Scholars have been debating the nature of knowledge since the time of Plato Many new insights have been gained from these debates but little theoretical consensus has been achieved Through six thematically linked chapters the book articulates the theoretical approach to the production and distribution of knowledge that underpins Max Boisot's conceptual framework the Information Space or I Space In this way the book looks to provide theoretical and practical underpinnings to Boisot's book Knowledge Assets OUP 1998 Following an introductory chapter how knowledge relates to data and information is first examined in chapter 1 and how different economic actors entrepreneurs managers etc use knowledge as a basis for action is explored in chapter 2 Chapter 3 looks at how the heterogeneity of economic actors arises naturally from their respective data processing strategies in spite of any similarities in the data that they might share Chapter 4 argues contra much transaction based economics that an organizational order must have preceded a market order something that should be reflected in any knowledge based theory of the firm Chapter 5 discusses the cultural and institutional significance of different kinds of knowledge flows Finally chapter 6 presents an agent based simulation model SimISpace that illustrates how the I Space might be applied to concrete problems such those of intellectual property rights A concluding chapter proposes a research agenda based on the theorizing developed in the book The approach the book sets out is used by a whole range of organizations to issues of knowledge management policy economics and organizational and cultural change
