Ecophysiology Of Economic Plants In Arid And Semi-arid Lands:

Ecophysiology of Economic Plants in Arid and Semi-Arid Lands Gerald E. Wickens, 2013-04-17 This book deals with arid and semi arid environments and their classification and the physiological restraints and adaptations of plants to the environment Further it discusses economic botany and the needs and methods of conserving economic plants A broad view is taken regarding the definition of economic plants taking into account their value to the environment as well as to man and to livestock The individual deserts and associated semi arid regions are described in separate chapters providing background information on the regional environments in terms of climate and major plant formations The economic plants within these formations their usages geographical distribution together with their morphological and physiological adaptations are treated in detail *Ecophysiology of Economic Plants in Arid and Semi-Arid Lands* G. E. Wickens, 1998-07-20 This book

Wickens, 2014-01-15 *Encyclopedia of Deserts* Michael A. Mares, 2017-01-19 Encyclopedia of Deserts represents a milestone it is the first comprehensive reference to the first comprehensive reference to deserts and semideserts of the world Approximately seven hundred entries treat subjects ranging from desert survival to the way deserts are formed Topics include biology birds mammals reptiles amphibians fishes invertebrates plants bacteria physiology evolution geography climatology geology hydrology anthropology and history The thirty seven contributors including volume editor Michael A Mares have had extensive careers in deserts research encompassing all of the world s arid and semi-arid regions The Encyclopedia opens with a subject list by topic an organizational guide that helps the reader grasp interrelationships and complexities in desert systems Each entry concludes with cross references to other entries in the volume inviting the reader to embark on a personal expedition into fascinating previously unknown terrain In addition a list of important readings facilitates in depth study of each topic An exhaustive index permits quick access to places topics and taxonomic listings of all plants and animals discussed More than one hundred photographs drawings and maps enhance our appreciation of the remarkable life landforms history and challenges of the world s arid land **Plant Abiotic Stress** Matthew A. Jenks, Paul M.

Hasegawa, 2008-04-15 Over the past decade our understanding of plant adaptation to environmental stress has grown considerably This book focuses on stress caused by the inanimate components of the environment associated with climatic

edaphic and physiographic factors that substantially limit plant growth and survival. Categorically these are abiotic stresses which include drought, salinity, non-optimal temperatures and poor soil nutrition. Another stress herbicides is covered in this book to highlight how plants are impacted by abiotic stress originating from anthropogenic sources. The book also addresses the high degree to which plant responses to quite diverse forms of environmental stress are interconnected, describing the ways in which the plant utilizes and integrates many common signals and subsequent pathways to cope with less favorable conditions. The book is directed at researchers and professionals in plant physiology, cell biology and molecular biology in both the academic and industrial sectors.

The Baobabs: Pachycauls of Africa, Madagascar and Australia G.E. Wickens, 2008-03-02. This is the only comprehensive account of all eight species in the genus *Adansonia*. It describes the historical background from the late Roman period to the present. It covers the extraordinary variety of economic uses of baobabs. There are also appendices on vernacular names, gazetteer, economics, nutrition and forest mensuration. This book fills a gap in the botanical literature. It deals with a genus that has fascinated and intrigued scientists and lay persons for centuries.

Evaluation of Native Plant Seeds and Seeding in the East-side Central Cascades Ponderosa Pine Zone Nan C. Vance, 2010. In dry open coniferous forests of the montane West, stand replacing wildfires and land use activities alter the composition and abundance of native grasses and forbs by degrading the habitat and accelerating the invasion of exotic annuals. On these lands, native forbs and grasses delayed or prevented from recovery by natural processes may require intervention through supplementary seeding. However, effective seeding of native plants requires that their seed traits and the potential outcome of the seeding be better understood. This study evaluated seeds and seedlings of 13 native forbs and 5 grasses common in the dry *Pinus ponderosa*, *Purshia tridentata*, *Festuca idahoensis* plant communities east of the Oregon Cascades crest and their potential for establishment in a landscape altered by past grazing and a recent stand replacing wildfire. Their potential for germination and establishment was examined in the laboratory and in 20 test plots located within the burned boundary of a 2002 wildfire. Seed collection, handling, testing and sowing procedures are described. Data on seedling emergence, height, second year survival and cover are presented in tables and figures. Onsite emergence and early growth data helped to reveal cause of early mortality related to biological and site conditions including invasive competition and differences in early growth and site occupancy. The study supports the efficacy of using multiple and functionally diverse species in a seeding program. Additional information on each of the 18 species is included in an appendix.

Sustainability James N. Furze, Saeid Eslamian, Safanah M. Raafat, Kelly Swing, 2022-01-31 Earth Systems Protection and Sustainability qualifies imperatives and discusses the use of mathematical approaches to assess and achieve sustainability in threatened and vulnerable Earth systems globally Mathematical advances in this context include both operational and Boolean methods as well as linguistic logic based Bayesian approaches and generative mathematics relevant to scenario formation The mathematic methods are refined into functional areas and deeper learning which enable the use of searching algorithms to achieve optimal solutions for the circular nature and application of sustainability Pertinent sections and synergistic elements are covered in order to synthesize key informative nodes advising of the very real dangers facing planet Earth and its biodiversity Each volume stands in its own right Analytical and scientific chapters are blended with social resilience and socio economic development consideration thus enabling the settings of sustainability within varying scenarios of climatic forces and species dynamics Volume 1 focuses on ground breaking evolutionary expansion assisting with life s continuation on Earth sustainable management of pathogens and halophyte uses in agroecology bioremediation methods in drilling waste management conservation and sustainability of diversity climate change mitigation strategies displacement management in a large scale ongoing crisis risk reduction and management policy sustainably intelligent driven markets sustainability consensus in an uncertain environment and path planning in static and dynamic environments Pictorial contributions made from across the world refine particularly urgent problems for attention and provide solutions and methods of environmental sustainability operated in communities complementing the descriptive chapter sections Both volumes are targeted for a global audience of academic professional classroom governmental unit and community members and seek to include all sectors to ensure ongoing and comprehensive Earth Systems Protection **Halophytes: An**

Integrative Anatomical Study Marius-Nicusor Grigore, Lacramioara Ivanescu, Constantin Toma, 2014-06-13 This book focuses on morphological and anatomical strategies developed by halophytes during evolution that allow them to survive in high salt environments These adaptive strategies refer to well integrated structural features such as succulence salt secretion salt glands and vesicular hairs aerenchyma Kranz anatomy bulliform cells successive cambia tracheoidioblasts and endodermis with pronounced Casparian strips The authors present cross sections of the roots stems and leaves of 62 halophyte species belonging to 18 families from different habitats and climates temperate Mediterranean They also discuss the ecological physiological and evolutionary aspects of the various adaptive structures in an integrative way Beginning with the structural level this book offers novel insights into the ecology of halophytes and opens new perspectives for the identification of salt tolerant crop plants or halophytes that can be used for ecological purposes such as bio remediation and revegetation **Cereals and Pulses** Martin Brink, 2006 Microbiology of Hot Deserts Jean-Baptiste Ramond, Don A. Cowan, 2022-07-28 This book covers the wider aspects of the microbiology of hot desert soil ecosystems compiling disparate information from a range of relevant desert soil microbial fields The reader learns about microbial ecology of the more

dominant and possibly most important desert habitats detailing the phylogenetic and functional diversity of these different habitats as well as their potential role in desert ecosystem ecology Particular attention is also given to microbial stress adaptation in hot desert soils Furthermore it is the first volume in this particular field to cover modern metagenomics technologies that can be applied to studies of all aspects of desert microbial communities Additionally the book explores viruses and viral communities which are among the least studied and little understood components of desert soil microbial communities Particular attention is also given to the roles of desert microbial communities in biogeochemical cycling of carbon nitrogen and phosphorus Through this book the reader discovers how desert microbiology has been at the forefront of Astrobiology and how it may be used conceptually in future terraforming strategies Desert ecosystems are increasingly coming into focus given the impacts of climate change and desertification trends making this volume particularly timely Each of the chapters is authored by leading international researchers and is a must read for microbial ecologists The Ecozones

of the World Jürgen Schultz, 2005-12-08 Recent studies have greatly contributed to a better understanding of the earth's ecosystem This abundantly illustrated book provides a fundamental introduction to the ecological zones of the geosphere Nine terrestrial ecozones have been distinguished and described in individual chapters with respect to distribution climate relief hydrology soil vegetation animal life and land use The first chapter provides the reader with a general introduction to each subject area The second edition is a completely revised and updated version A large number of new Anglo American ecological studies are included The book also includes more than 70 new figures and tables and detailed maps on global agricultural regions and soil classification Another new feature is the discussion of the correlation between northern ecosystems and the carbon dioxide balance in the global atmosphere **Heating with Wolves, Cooling with Cacti** Negin Imani, Brenda Vale, 2022-01-27 This book describes the detailed process behind the development of a comprehensive thermo bio architectural framework the ThBA This framework systematically connects the thermal performance requirements of a building to relevant solutions found in the natural world This is the first time that architecture has been connected to biology in this manner The book provides an in depth understanding of thermoregulatory strategies in animals and plants and links these to equivalent solutions in architectural design The inclusion of this fundamental knowledge along with the systematic process of accessing it should open up new avenues for the generation of energy efficient and sustainable buildings **Date**

Palm Biotechnology Shri Mohan Jain, Jameel M. Al-Khayri, Dennis V. Johnson, 2011-08-13 This important reference book is the first comprehensive resource worldwide that reflects research achievements in date palm biotechnology documenting research events during the last four decades current status and future outlook This book is essential for researchers policy makers and commercial entrepreneurs concerned with date palm The book is invaluable for date palm biotechnology students and specialists This monument is written by an international team of experienced researchers from both academia and industry It consists of five sections covering all aspects of date palm biotechnology including A Micropropagation B

Somaclonal Variation Mutation and Selection C Germplasm Biodiversity and Conservation D Genetics and Genetic Improvement and E Metabolites and Industrial Biotechnology The book brings together the principles and practices of contemporary date palm biotechnology Each chapter contains background knowledge related to the topic followed by a comprehensive literature review of research methodology and results including the authors own experience including illustrative tables and photographs

Anatomical Adaptations of Halophytes Marius-Nicușor Grigore,Constantin Toma,2017-10-04 This book describes important anatomical adaptations in halophytes based on a large review of relevant literature since the 17th century and recent research findings Scientists involved in the study of plant biology from a molecular to ecosystemic level will find information about all major structural strategies of salt tolerant plants The book starts with an introductory theoretical background where several aspects related to the definition and classification of halophytes and saline environments are included Major anatomical adaptations are then grouped around major concepts succulence tracheoidioblasts salt secretion Kranz anatomy successive cambia and bulliform cells Each of them is treated following a general scheme introductory considerations anatomical basis and ecological implications a review of relevant literature is then conducted and the text is supported by a large number of figures especially ink drawings and color micrographs

Plant Ecology in the Middle East Ahmad Hegazy,Jonathan Lovett-Doust,2016-01-14 This advanced textbook explores the intriguing flora and plant ecology of the Middle East framed by a changing desert landscape global climate change and the arc of human history This vast region has been largely under recognized under studied and certainly under published due in part to the challenges posed to research by political disputes and human conflict and a treatise on the subject is now timely The book integrates Middle Eastern plant geography and its major drivers geo tectonics seed and fruit dispersal plant functional types etc with the principles of plant ecology The authors include the many specialized adaptations to desert and dryland ecosystems including succulence water conserving photosynthesis and a remarkable range of other life history strategies They explore the formation of climate relicts and describe the long history of domestication in the region together with the many reciprocal effects of agriculture on plant ecology The book concludes by discussing conservation in the region highlighting five regional biodiversity hotspots where the challenges of desertification habitat loss and other threats to plant biodiversity are particularly acute Plant Ecology in the Middle East is a timely synthesis of the field setting a new baseline for future research It will be important reading for both undergraduate and graduate students taking courses in plant ecology evolution systematics biodiversity and conservation and will also be of interest and use to a professional audience of botanists conservation biologists and practitioners working in dryland ecosystems

Ethnobotany of Northern Africa and Levant Rainer W. Bussmann,Mostafa Elachouri,Zaal Kikvidze,2024-11-15 Research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline including climate change research conservation and sustainable development It has by now widely been recognized that traditional knowledge is

always in flux and adapting to a quickly changing environment Trends of globalization especially the globalization of plant markets have greatly influenced how plant resources are managed nowadays While ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market Scholars in plant sciences worldwide will be interested in this dynamic content The field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years Student interest is on the rise attendance at professional conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly Various societies of such professionals include the Society for Economic Botany the International Society of Ethnopharmacology the Society of Ethnobiology the International Society for Ethnobiology and many regional and national societies in the field that currently have thousands of members Growth has been most robust in BRIC countries The objective of this new MRW on Ethnobotany of Mountain Regions is to take advantage of the increasing international interest and scholarship in the field of mountain research We anticipate including the best and latest research on a full range of descriptive methodological theoretical and applied research on the most important plants for each region Each contribution will be scientifically rigorous and contribute to the overall field of study

Enjoying the Beat of Expression: An Mental Symphony within **Ecophysiology Of Economic Plants In Arid And Semiarid Lands**

In a world used by monitors and the ceaseless chatter of quick interaction, the melodic beauty and emotional symphony produced by the prepared term usually diminish in to the background, eclipsed by the constant noise and distractions that permeate our lives. Nevertheless, located within the pages of **Ecophysiology Of Economic Plants In Arid And Semiarid Lands** a wonderful fictional treasure filled with fresh emotions, lies an immersive symphony waiting to be embraced. Crafted by an elegant composer of language, that interesting masterpiece conducts viewers on a psychological trip, skillfully unraveling the concealed songs and profound affect resonating within each cautiously crafted phrase. Within the depths of the touching analysis, we will investigate the book is central harmonies, analyze their enthralling publishing model, and surrender ourselves to the profound resonance that echoes in the depths of readers souls.
