Seasons of a Dean's Life Walter H. Gmelch, Dee Hopkins, Sandra Damico, 2023-07-03 What are the demands of being a dean What leadership development do deans need as they progress through their academic careers How are their responsibilities changing What are institutions looking for in applicants This book identifies the range of leadership skills required and illuminates the process of building leadership capacity by drawing on interviews with over 50 sitting deans both women and men on the insights derived from conducting professional development seminars for several hundred deans and on the authors 48 years of collective experience in eight different deanships The abundant examples and accounts of individual deans leadership successes and failures and the competences they developed along their career paths give the reader a taste of what the deanship is really like and how the role changes over time In the process of gathering their data and tracing their own and others administrative journeys the authors found similarities in how deans progress as leaders in the common rites of passage they encounter and in the evolution of their role They describe the stages or seasons of the deanship ranging from getting started the first three years of deanship springtime to hitting your stride years four to seven of deanship summer and keeping the fire alive eight years and beyond of deanship fall through to planning to step down and leaving the role winter What also emerged from the authors research is that most deans come to their positions without leadership training without prior executive experience without a clear understanding of the ambiguity of their new role or its responsibilities This book fills a void by offering guidance on applying for a deanship preparing for the role and purposefully building the needed skills and knowledge For anyone considering taking on a deanship this book offers a unique window into the role For sitting deans it offers a compass for shaping the trajectory of their careers

Developing Non-Hierarchical Leadership on Campus Shannon Faris, Kathleen McMahon, Charles Outcalt, 2000-10-30 Many problems that plague modern American society including

disappearance of community decaying inner cities racial tensions environmental degradation declining civic engagement and the increasing ineffectiveness of government to name a few are in many respects problems of leadership Leadership means not only what elected and appointed public officials do but also the critically important civic work performed by those individual citizens who are actively engaged in making a positive difference in society Clearly one of the major problems with contemporary civic life in America is that too few of our citizens are actively engaged in efforts to effect positive social change Educators seldom acknowledge higher education's possible contribution to these problems or the role that it might play in alleviating them Colleges and universities provide rich opportunities for developing leaders through the curriculum and co curriculum Co curricular experiences not only support and augment the students formal classroom and curricular experience but can also create powerful learning opportunities for leadership development through collaborative group projects that serve the institution or the community These projects can be implemented through service learning residential living community work and student organizations In the first section Alexander W Astin and Helen S Astin two of the most influential authors in education and co principal investigators for the research team that devised Social Change Model of Leadership Development share their insights on the model they helped create Also in this section other leading theoreticians offer provocative and challenging insights into non hierarchical leadership The second section features case studies and other examples from the practical realm Contributions come from a wide array of programs and institutions from community colleges to Ivy League institutions to urban public universities Because campuses are increasingly diverse leadership programs must not only acknowledge but embrace the multiplicity of identities personified in their students Accordingly the next section offers essays and case studies on complex issues of intersection of leadership and identity The book concludes with two chapters essential for those seeking to access leadership development one focusing on the need for assessment the other containing an account of the first ever instrument designed specifically to access non hierarchical leadership written by the creator of this instrument

Learning as a Way of Leading Stephen Preskill, Stephen D. Brookfield, 2008-11-17 This book offers a systematic look at the connections between learning and leading and the use of learning to inspire and organize for change It explores two interrelated dimensions of learning leadership the

ways leaders themselves learn about leadership practice and the way leaders foster the learning of those they work with The book focuses on a number of important leadership activities and adopts a case study approach to illuminate how leaders themselves learn how they impart knowledge to others and how they support others in becoming more effective and enduring learners

Second International Handbook of Educational Leadership and Administration Kenneth A. Leithwood, P. Hallinger, 2012-12-06 The first International Handbook of Educational Leadership and Administration Leithwood et al was published in 1996 and quickly became something of a best seller for reference works within education Such success we suggest was at least partly due to the unprecedented global waves of concern for improving schools launched in the mid 1980 s combined with a widespread belief in leadership as the single most powerful contribution to such improvement The roots of this belief can be found in evidence produced by the early effective schools research although there is a romance with leadership as an explanation for success in many non school enterprises as well During the two year period during which this current handbook was being written activity in the realms of school leadership school improvement and leadership development gained further momentum The English government created its new National College of School Leadership and several Asian nations announced new initiatives in leadership selection preparation and development
