**Madhubun**

## **Finding Squares:**

Understanding Mathematics □ 8 C. Sailaja, Smita Ratish, Lata Wishram, Understanding Mathematics is a carefully written series of mathematics to help students encourage the study of mathematics in the best interactive form It contains ample practice material attractive illustrations and real life examples for the students to relate the topics with their everyday life Special care has been taken while teaching topics like geometry and probability to the students Keeping in mind the development status and comprehension level of students the text has been presented in a well graded manner

**Laboratory Manual for Mathematics** □ 8 Rajesh Singh, An important dictum of learning is that theoretical learning must always be supplemented by practical learning This ensures proper understanding and comprehension besides better retention It eliminates the phobia and makes learning fun With this in mind the concept of activities in mathematics was introduced This series of books caters to the above requirement It is a sincere effort to sharpen the intellect through activity oriented learning to acquire mathematical skills and develop logical reasoning The ebook version does not contain CD

Maths Mate □ 8 NEW Madhubun, 1 It is a series of eight textbooks for Classes 1 to 8 that conforms to the vision of National Curriculum Framework and is written in accordance with the latest syllabus of the CBSE 2 Learning Objectives Lists well what a learner will know and be able to do after studying the chapter 3 Let s Recall Refreshes the concepts learnt in the form of a revision exercise to brush up the concepts taught in previous chapters or grades 4 Let s Begin Introduction to the chapter 5 My Notes Tips to help the learner remember the important points formulae taught in the chapter 6 Let s Try Simple straight forward questions for quick practice while studying any topic based on the first two levels of Bloom s Taxonomy Knowledge and Understanding 7 Error Alarm Common mistakes which learners commit often along with the correct way of doing the same 8 Know More Additional information for the learners relating to the concepts learnt in the chapter 9 Maths in My Life includes questions relating Maths to daily life and which can help relate the topic with the environment life around us 10 Tricky Maths Challenge questions to help the learners build thinking skills and reasoning skills by solving tricky questions 11 Project Work Projects which can help learners connect Math with our daily life or that take the concepts learnt to a new level 12 Concept Map Summary points to list the important concepts learnt in the chapter in a crisp form 13 Test Zone Revision exercise of the concepts learnt in the chapter This includes both objective and subjective type of questions 14 Mental Maths Maths problems for performing faster calculations mentally 15 Maths Master Involves deep critical thinking of learners about any topic concept relation fact or anything related to that chapter May have open ended questions or extension of the topic 16 Application in Real Life Every chapter in each book also explains how and where it is used in daily life 17 In the Lab Math lab activities for helping the learners understand the concepts learnt through hands on experience 18 Practice Zone Chapter wise practice sheets includes subjective questions for additional practice which are a part of each book *Speed Math* Gaurav Tekriwal, 2014-01-07 Do math more quickly and with more confidence with less

reliance on paper apps and calculators For people who automatically run to the nearest calculator Idiot s Guides Speed Math teaches tips tricks and straightforward methods to doing math at a fast and accurate rate Practice examples easily illustrate how even the most math shy person can better perform calculations

Amazing Properties of Squares & Their Calculations Kiran Parulekar,2013 Following are the salient features of Amazing Properties of Squares Their Calculations This book contains originality It means in most chapters things are discussed which we will not find in any other book on speed arithmetic Even if particular concept is found in some book or website author has represented it in a little different way Author has given enough examples on each type of square calculation of a number minimum 3 examples so that reader will not have any doubt Almost all the chapters are having different style from traditional learning mathematics taught in school or college or in books Each chapter has been discussed separately without any prior knowledge of previous chapters so that reader can read any chapter independently and can move in any order in reading this book After reading this book people who have hatred feeling for mathematics can develop liking for mathematics not only in calculation of squares but also in other areas like multiplication and division Methods used to calculate general and particular squares and properties of squares like those discussed in chapter 21 which is of two pages only can be useful for competitive exam also Till now methods like casting out 9 s and casting out 11 s were used in checking calculation but in this book in chapter 17 and 18 these two methods are used to calculate square of two and three digit numbers respectively which is a very new thing The book assumes that reader knows tables of 1 to 10 numbers and squares of 1 to 25 numbers which is a very minimal expectation so that not much mathematics background is required to read this book Examples are explained step by step and are plenty in number and any student above 7 th standard can understand it Also topics range from elementary to challenging level All the methods to calculate square of a number that are present in other books are discussed here in addition to some new methods Following are the methods discussed in this book to calculate square of a general number 1 In chapter 6 square is found using algebraic identity  $a^2 + b^2 = (a + b)^2 - 2ab$  2 In chapter 7 square is found using  $a^2 - b^2 = (a + b)(a - b)$  3 In chapter 8 Vedic mathematics method is considered to calculate square of two digit no 4 In chapter 9 and 10 the method given for two digit numbers is generalized to three and four digit numbers 5 In chapter 13 square of a no near to power of 10 or multiple of power of 10 or sub multiple of power 10 is considered which is given in Vedic mathematics 6 In chapter 14 the most general method the Urdhva Tiryak method is discussed which is given in Vedic mathematics 7 In chapter 15 ratio method which is based on ratio of two successive digits is given 8 In chapter 16 calculation using vinculum which is not a different method but often used when digits are big 9 In chapter 17 square of two digit number is found using casting out 9 s method which was used till now only for checking calculation 10 In chapter 18 square of three digit number is found using casting out 9 s and casting out 11 s method which was used till now only for checking calculation Hence this book can be considered as bible of calculation of squares as well as on properties of squares

Maths in Action Edward C. K. Mullan,2003 Presents a level

specific resource with materials at each of Levels C D and E written to provide comprehensive and in depth coverage of each Level s attainment targets The materials written specifically for Scotland are fully referenced to the 5 14 Guidelines and contain information you need to teach Maths in your classroom

**Ancient Egyptian Science** Marshall Clagett,1989 The volume gives a discourse on the nature and accomplishments of Egyptian mathematics The author quotes and discusses interpretations of such authors as Eisenlohr Griffith Hultsch Peet Struce Neugebauer Chace Glanville van der Waerden Bruins Gillings and others Mathematics

**The New Universal English Dictionary ... To which is Added, a Dictionary of Cant Words ... The Fourth Edition, Carefully Corrected by Mr. Buchanan, Etc** Nathan BAILEY,1759 *Success Primary Mathematics STD 6 ,*
