Firearms evidence examination and fingerprint comparison have had a long and interesting history. The role of fingerprints in human identification can actually be traced back several thousand years. The development of the science of fingerprint comparison and the scientific examination of firearms, however, began in the early 19th century. The goal of the preservation of physical evidence is to associate each piece of evidence with its responsible source, allowing forensic scientists to answer questions regarding the who, what, when, where, how and why of a crime. *Firearms and Fingerprints, Revised Edition* traces these early beginnings and the icons that laid the groundwork for the current science. Coverage includes the highly specialized education, training and experience required for current practitioners in the modern forensic laboratory. Providing a thorough examination of the capabilities and limitations of firearms and latent print evidence, this eBook also looks at future possibilities as these fields continue to evolve and looks at the recent legal challenges that have arisen. Author Edward Hueske uses his extensive experience as a forensic scientist, professor and consultant to paint a detailed picture of this fascinating science, which is sure to engage students. Chapters include: Overview, A Brief History of Firearms and Fingerprints and the Scientists Involved, Scientific Principles, Instrumentation and Equipment, Forensic Applications, The Future. This fascinating overview of the latest neuroscience findings on spontaneous thought processes or 'snaps' describes

how everyone not just geniuses can learn to improve the likelihood of their own eureka moments by adopting certain rewarding attitudes and habits As the author explains snaps are much more than new ideas Snaps are insights plus momentum they instantly compel or snap us toward action They often occur after ordinary problem solving hits an impasse We may feel stuck but while we re in a quandary the brain is rebooting Then when we least expect it the solution pops into our heads She describes the results of numerous scientific experiments studying this phenomenon She also recounts intriguing stories of people in diverse disciplines who have had a snap experience Both the research and the stories illustrate that it s possible to enhance our facility for snap moments by training ourselves to scan sift and solve In the emerging economy businesses and individuals need new strategies and it s clear that just thinking harder no longer works People who can snap are often a step ahead they have a vigilance advantage from exercising brain cells that build mental agility While snapping is rewarding fun and good for improving our mental skills it s also much more people who snap life changing ideas that affect many others will redirect our future Written in an accessible jargon free narrative that weaves together the latest research with illuminating stories of innovative people this book teaches us how to cultivate our own inner epiphanies to gain an edge in our imaginations our careers our goals indeed in every aspect of our lives C. Racial Science and Human Diversity in Colonial Indonesia Fenneke Sysling, 2016-07-15 Indonesia is home to diverse peoples who differ from one another in terms of physical appearance as well as social and cultural practices The way such matters are understood is partly rooted in ideas developed by racial scientists working in the Netherlands Indies beginning in the late nineteenth century who tried to develop systematic ways to define and identify distinctive races Their work helped spread the idea that race had a scientific basis in anthropometry and craniology and was central to people s identity but their encounters in the archipelago also challenged their ideas about race In this new monograph Fenneke Sysling draws on published works and private papers to describe the way Dutch racial scientists tried to make sense of the human diversity in the Indonesian archipelago The making of racial knowledge it contends cannot be explained solely in terms of internal European intellectual developments It was on the ground that ideas about race were made and unmade with a set of knowledge strategies that did not always combine well Sysling describes how skulls were assembled through the colonial infrastructure how measuring sessions were resisted what role photography and plaster casting played in racial science and shows how these aspects of science in practice were entangled with the Dutch colonial Empire
