Communication Peter K. Manning, 1988 This first major empirical work on the semiotics of social action goes a long way toward answering substantive theoretical and pragmatic questions on how codes actually operate in a specific social setting. It underscores the important yet often ignored role of the police as sign or information workers. Calls to the police represent a rich variety of human troubles, concerns, and needs by focusing on how police handle calls from the public, how they ascertain what a call means, and what should be done with it, and how this is transformed through subsystems within the organization. Peter Manning provides a novel way of looking at organizational communication. *Symbolic Communication* provides examples of how members of an organization interpret their environment. In this instance, how the meaning of a call to the police is transformed as it moves across the boundaries of the organization, a transformation that involves a series of codings and recodings, ensuring a continuous, loose linkage of organization and environment. Manning shows why the police act in ways that differ from the way citizens and politicians would have them act, revealing the uncertainties that surround a policy agency's responsiveness. And he points out how today's computer technologies constrain the coding process, limiting in particular the effectiveness of the 911 systems used in most of our major cities. Peter K. Manning is a Professor of Psychiatry and of Sociology at Michigan State University and a member of the Centre for Socio-Legal Studies at Oxford. *Symbolic Communication* brings to fruition themes and ideas introduced in his previous books *Police Work* and *The Narc's Game*. *Symbolic Communication* is included in the *Organization Studies* series edited by John van Maanen. *The Tide of Poverty* Jack Walts, 2012-08-10 *The Tide of Poverty* is a soberingly plausible account of how easy it would be to bring a nuclear device into our nation and to destroy not only the northern half of the State of Washington but to deliver four additional nuclear dirty bombs to our nation's capital. As wildfires ravage our nation, as states secede from the union, as right-wing hate groups gain leverage not only in local areas but in national politics, as well, the reader will begin to realize how perilously close to anarchy our nation has drifted. It is also a delightful account of how in many crises ordinary people rise to what is demanded of heroes and thwart diabolical plots of massive intrigue and power. It is seldom the superhero that saves the day. It is the ordinary person who lives up to the standard set by Robert Service when he in the 1800s wrote *Carry On*. America needs to wake up to what is happening. For too long we have allowed political ideology to supplant common sense, science, even religion. You may deny that far-right wing groups pose a danger to our nation, and to your very last breath you may cast blame on others; yet when radiation burns your flesh, when wildfires consume your homes, or floods sweep you out to sea, you will still be dead. And so will your nation.
