Under Fire Zondervan,2009-08-08 Of all the teachings of Christianity the doctrine of hell is easily the most troubling so much so that in recent years the church has been quietly tucking it away Rarely mentioned anymore in the pulpit it has faded through disuse among evangelicals and been attacked by liberal theologians Hell is no longer only the target of those outside the church Today a disturbing number of professing Christians question it as well Perhaps more than at any other time in history hell is under fire The implications of the historic view of hell make the popular alternatives annihilationism and universalism seem extremely appealing But the bottom line is still God s Word What does the Old Testament reveal about hell What does Paul the apostle have to say or the book of Revelation Most important what does Jesus the ultimate expression of God s love teach us about God s wrath Upholding the authority of Scripture the different authors in Hell Under Fire explore a complex topic from various angles R Albert Mohler Jr provides a historical theological and cultural overview of The Disappearance of Hell Christopher Morgan draws on the New Testament to offer three pictures of hell as punishment destruction and banishment J I Packer compares universalism with the traditional understanding of hell Morgan does the same with annihilationism and Sinclair Ferguson considers how the reality of hell ought to influence preaching These examples offer some idea of this volume s scope and thoroughness Hell may be under fire but its own flames cannot be quenched by popular opinion This book helps us gain a biblical perspective on what hell is and why we cannot afford to ignore it And it offers us a better understanding of the One who longs for all people to escape judgment and obtain eternal life through Jesus Christ

The Guardian from the New York Times bestselling author of *Superforecasting* and *Future Babble*. From terror attacks to collapsing economies from painkiller epidemics to mass gun violence and poisonous toys from China, our list of fears seems to be exploding. Yet we are the safest and healthiest humans in history. Why are we so worried? *The Science of Fear* is an introduction to the new brain science of risk, dissecting the fears that misguide and manipulate us every day. Award-winning journalist Dan Gardner demonstrates how irrational fear springs from the ways humans miscalculate risks based on our hunter-gatherer brains. With the exclusive cooperation of risk science pioneer Paul Slovic and other leading experts, Gardner reveals how our gut reactions lead us astray. Understanding our irrational fears frees us from political and corporate manipulation and makes our choices better. Ultimately *The Science of Fear* will make you brave. Excellent. Analyzes everything from the media's predilection for irrational scare stories to the cynical use of fear by politicians. A cheery corrective to modern paranoia. *The Economist*. An entertaining, often jolting account of why trivial risks terrify us even as we engage in wildly dangerous activities with hardly a qualm. Kirkus starred review.
