## **Fires Across The Water Transnational Problems In Asia:**

**Fires Across the Water** James Shinn,1998 This book argues that Asia s transnational problems once dismissed as distant fires across the water are rudely forcing themselves onto the diplomatic agenda and that governments on both sides of the Pacific are unprepared to deal with these harsh challenges to global governance BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved *Rethinking Japanese Security* Peter J. Katzenstein,2008 Since the unexpected end of the Cold War standard arguments about power politics can no longer be adopted uncritically This has led to a renewed interest in Japan s unusually peaceful security policy Japan s championing of comprehensive security is central to this collection Peter J Katzenstein s essays explore this concept which not only encompasses traditional military concerns but also domestic aspects of security The book s focus on counter terrorism and national security highlights a policy approach which over decades Japan has developed with political patience and diplomatic finesse These essays advocate an eclectic approach that helps in recognizing new questions and that seek to combine elements from different analytical perspectives in the exploration of novel lines of argument Additionally the book features an entirely new substantial introduction that explores and elaborates the themes of the collection while bringing it up to date This collection will be of significant interest to students and scholars of Japanese politics security studies and international relations

**Pacific Asia?** Melvin Gurtov,2002 Emphasizing human and environmental security over traditional power politics Mel Gurtov offers a provocative reinterpretation of security in the Asia Pacific region The author questions a number of prevailing assumptions such as the China threat a U S centered balance of power and the necessity of a greater Japanese security role He argues instead for a cooperative framework for future security that focuses on people s basic needs is sensitive to Asian nationalism and gradually replaces military power with developmental priorities With its concise appraisals of the security policies of the United States China Japan the two Koreas and the ASEAN countries this work will be a valued reference for policymakers scholars and students alike **Rethinking Security in East Asia** J. J. Suh,Peter J. Katzenstein,Allen Carlson,2004 Is East Asia heading towards war This text makes a case for a new theoretical approach called analytical eclecticism by the authors to the study of Asian security **Trafficking & the Global Sex Industry** Karen D. researched this collection gives the reader a clearer understanding of the problem and the actions being taken to combat it. Trafficking the Global Sex Industry will have a broad market for readers on a national and international level especially among those interested in political science, women's studies, international relations, and criminology. *The Expanding Roles of Chinese Americans in U.S.-China Relations* Peter Koehn, Xiao-Huang Yin, Xiao-huang Yin, 2015-02-12. This book addresses the historical and contemporary involvement of Chinese Americans from diverse walks of life in U.S.-China relations. The contributors present new evidence and fresh perspectives on familiar and unfamiliar national and transnational networks including families, businesspersons, community newspapers, students, lobbyists, philanthropists, and scientists, and consider the likely future impact of such contacts on the most important bilateral relationship at the start of the new millennium. The volume makes a multidisciplinary contribution to understanding the extensive and vital roles and promise of Chinese Americans at this critical juncture in U.S.-China relations and to revealing the importance of migrants as actors in contemporary global politics. The assessments shared by the contributors suggest that the nature and scope of the Chinese American involvement, particularly in global civil society networks, increasingly will determine the outcome of state-to-state relations between the United States and the PRC.

**China's Struggle for Status** Yong Deng, 2008-04-28. At the end of the Cold War, the People's Republic of China found itself in an international crisis facing severe problems in both domestic politics and foreign policy. Nearly two decades later, Yong Deng provides an original account of China's remarkable rise from the periphery to the center stage of the post-Cold War world. Deng examines how the once beleaguered country has adapted to and proactively realigned the international hierarchy, great power politics, and its regional and global environment in order to carve out an international path within the globalized world. Creatively engaging with mainstream international relations theories and drawing extensively from original Chinese material, this is a well-grounded assessment of the promises and challenges of China's struggle to manage the interlacing of its domestic and international transitions and the interactive process between its rise and evolving world politics.

**Historical Dictionary of International Organizations in Asia and the Pacific** Derek McDougall, 2014-10-01. *Historical Dictionary of International Organizations in Asia and the Pacific*, Second Edition, covers global, international, and regional organizations in Asia and the Pacific and encompasses both governmental and non-governmental organizations. This second edition covers the history through a chronology, an introductory essay, appendixes, and an extensive bibliography. The dictionary section has over 200 cross-referenced entries on important personalities, thematic topics, and major international issues affecting the region. This book is a valuable tool for anyone seeking details about international organizations in Asia and the Pacific and the international context within which those organizations function.

*East Asia Imperilled* Alan Dupont, 2001-10-15. Security issues have traditionally been defined in military terms, yet the post-Cold War security landscape contains numerous non-military challenges to security. In this 2001 analysis, Alan Dupont argues that an emerging new class of non-military threats has the potential to destabilize East Asia and

reverse decades of hard won economic and social development He shows that these transnational shifts must be grasped and dealt with by governments and non government organizations both regionally and internationally if conflict is to be avoided Transnational threats stem from overpopulation deforestation and pollution global warming unregulated population movements transnational crime virulent new strains of infectious diseases and other issues not previously associated with international security Collectively they represent a new agenda and pose novel challenges for foreign and defence policy This highly informative compelling and authoritative book is essential reading for East Asia specialists and makes a significant contribution to international security debates      *China's International Relations in the 21st Century* Weixing R. Hu, Gerald Chan, Daojiong Zha, 2000-12-13 Most people believe China's foreign behavior is driven by its growing power status in world politics Chinese leaders still firmly uphold some traditional values in foreign policy such as sovereignty territorial integrity and national unification However it is often neglected that China's behavior is also shaped by its changing perception of the globalizing world and to a large extent is a result of external pressure on China By examining the dynamics of paradigm shifts in China's foreign policy thinking this book explores the ideological sources of China's international relations in the new century With growing economic interdependence with the outside world which creates both constraints as well as incentives to adapt to the prevailing norms in contemporary international relations authors of this volume analyze indigenous Chinese sources of intellect on the paradigm shifts The concepts studied in this volume include national identity nationalism globalism multilateralism sovereignty and the role of international law in Chinese foreign policy This volume helps to shed new light on how the dynamics of paradigm shifts affect China's behavior in international affairs      *A World of Regions* Peter J. Katzenstein, 2015-11-16 Observing the dramatic shift in world politics since the end of the Cold War Peter J Katzenstein argues that regions have become critical to contemporary world politics This view is in stark contrast to those who focus on the purportedly stubborn persistence of the nation state or the inevitable march of globalization In detailed studies of technology and foreign investment domestic and international security and cultural diplomacy and popular culture Katzenstein examines the changing regional dynamics of Europe and Asia which are linked to the United States through Germany and Japan Regions Katzenstein contends are interacting closely with an American imperium that combines territorial and non territorial powers Katzenstein argues that globalization and internationalization create open or porous regions Regions may provide solutions to the contradictions between states and markets security and insecurity nationalism and cosmopolitanism Embedded in the American imperium regions are now central to world politics      **China, the United States, and 21st-Century Sea Power** Andrew S. Erickson, Lyle J Goldstein, Nan Li, 2010-12-01 China's reaction to the United States new maritime strategy will significantly impact its success according to three Naval War College professors Based on the premise that preventing wars is as important as winning wars this new U S strategy they explain embodies a historic reassessment of the international system and how the United States can best pursue its interests in cooperation with

other nations The authors contend that despite recent turbulence in U S China military relations substantial shared interests could enable extensive U S China maritime security cooperation as they attempt to reach an understanding of competitive coexistence But for professionals to structure cooperation they warn Washington and Beijing must create sufficient political and institutional space

**Remapping East Asia** T. J. Pempel, 2018-08-06 An overarching ambiguity characterizes East Asia today The region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes However a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia In *Remapping East Asia* T J Pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics This collection is about the people processes and institutions behind that region building In it experts on the area take a broad approach to the dynamics and implications of regionalism Instead of limiting their focus to security matters they extend their discussions to topics as diverse as the mercurial nature of Japan s leadership role in the region Southeast Asian business networks the war on terrorism in Asia and the political economy of environmental regionalism Throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly

**US National Defense for the Twenty-first Century** Edward A. Olsen, 2014-07-10 This provocative critique of Washington s current security policies draws on the arguments made by an array of non interventionist and conservative nationalist scholars It provides a blueprint for a more restrained and unilateral US role in global affairs

*Illicit Trafficking* Robert J. Kelly, Jesse L. Maghan, Joseph D. Serio, 2005-06-29 A detailed survey of a growing scourge of the global economy the smuggling of people materials and money Smuggling used to be a family business Today it is big business *Illicit Trafficking A Reference Handbook* offers a thorough introduction to the problems of illegal trafficking that have emerged from and been intensified by globalization This title provides an examination of how criminal enterprises have exploited opportunities to enrich themselves and broadened their involvement in many areas of illegal trafficking while compromising or evading legal authorities The coverage includes a brief history of illicit trafficking analyzes current problems and examines local and global containment policies such as Presidential Decision Directive 42 It also explores key international agreements on money laundering bank secrecy laws extradition treaties and technologies that have exploited legitimate business opportunities to enrich their profits while compromising or evading legal authorities

*Same Bed, Different Dreams* David M. Lampton, 2001-01-11 The title of this unique insider s look at a crucial decade of Sino American interchange derives from a Chinese expression that describes a relationship of two people whose lives are intimately intertwined but who do not fundamentally communicate with each other David M Lampton former president of the National Committee on U S China Relations demonstrates that while the United States and China have enormous interests at stake in their bilateral

relationship neither has been particularly deft in dealing with the other His fascinating account shows how the processes of globalization along with the development of international regimes and multilateral organizations have brought America and China increasingly close in the global bed At the same time their respective national institutions interests popular perceptions and the very characters of their two peoples assure that the nations continue to have substantially different dreams Lampton explores the reasons why the Sino American relationship is so difficult for both nations to manage and suggests ways it can be more effectively conducted in the future His unique experience in China nearly thirty years as a scholar as the head of a policy oriented exchange organization and as director of Washington think tank research programs enabled him to spend extended periods with Chinese leaders and see them as they encountered America as well as to observe U S leaders as they tried to come to grips with Chinese circumstances Among many other key events Lampton witnessed firsthand the aftermath of Tiananmen Square successive congressional battles over most favored nation tariff treatment the end of the Bush era and the rocky beginning of the Clinton administration the death of Deng Xiaoping and Jiang Zemin s transition to power the reversion of Hong Kong to Chinese sovereignty and the Asian financial crisis that unfolded from mid 1997 to the end of the decade Lampton s careful documentary research is supplemented by interviews and accounts of his personal interaction throughout the period with leaders and key players in Washington Beijing Taipei and Hong Kong The book thus represents a singular combination of historical research policy analysis and personal observation and offers guidance for those in both America and China who must shape this critical relationship in the twenty first century
