The contributors, park management academics and members of nongovernmental organizations, contend that successful institutional change in protected area systems involves not only the adoption of appropriate legal and regulatory regimes covering sustainable use, but also the development of an informal culture of sustainable resource use among all of a park's stakeholders. While this latter requirement is often difficult to achieve, the contributors show how these informal attitudes may evolve over time, both within the management structure of a park agency and the community of resource users. The case studies cited represent examples of successful institutional change, demonstrating both financial and conservation benefits to protected area agencies that should serve as model for managing parks today      **Field & Stream**, FIELD STREAM America's largest outdoor sports magazine celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations      **The Explosives Engineer** Harry Roberts (Jr.), Nelson Sutro Greensfelder, 1935      *The Code of Federal Regulations of the United States of America Having General Applicability and Legal Effect in Force June 1, 1938*, 1939 The Code of federal regulations is the codification of the general and permanent rules published in the Federal register by the executive departments and agencies of the federal government      **Code of**
