Maturing Usability Effie Lai-Chong Law, Ebba Hvannberg, Gilbert Cockton, 2007-10-24 Maturing Usability provides an understanding of how current research and practice has contributed towards improving quality issues in software interaction and value. Divided into three parts Quality in Software looks at how using development tools can enhance the usability of a system and how methods and models can be integrated into the process to help develop effective user interfaces. Quality in Interaction addresses theoretical frameworks on the nature of interactions techniques and metrics for evaluation interaction quality and the transfer of concepts and methods from research to practice. Finally Quality in Value assesses the impact that a system has in the real world focusing on increasing the value of usability practice for software development and on increasing value for users. A balance between theoretical and empirical approaches is maintained throughout and all those interested in exploring usability issues in human computer interaction will find this a very useful book.

Extreme Programming and Agile Processes in Software Engineering Hubert Baumeister, Michele Marchesi, Mike Holcombe, 2005-06-13 Extreme Programming has come a long way since its first use in the C3 project almost 10 years ago. Agile methods have found their way into the mainstream and at the end of last year we saw the second edition of Kent Beck's book on Extreme Programming containing a major refactoring of XP. This year the 6th International Conference on Extreme Programming and Agile Processes in Software Engineering took place June 18-23 in Sheffield. As in the years before XP 2005 provided a unique forum for industry and academic professionals to discuss their needs and ideas on Extreme Programming and its methodologies. These proceedings reflect the activities during the conference which ranged from presentation of research papers invited talks posters and demonstrations panels and activity sessions to tutorials and workshops. Included are also papers from the Ph.D. and Master's Symposium which provided a forum for young researchers to present their results and to get feedback. As varied as the activities were the topics of the conference which covered the presentation of new and improved practices empirical studies experience reports and case studies.

and last but not least the social aspects of agile methods The papers and the activities went through a rigorous reviewing process Each paper was reviewed by at least three Program Committee members and was discussed carefully among the Program Committee Of 62 papers submitted only 22 were accepted as full papers
